Global Social Media Design Huatong Sun, 2020 Social media users fracture into tribes, but social media ecosystems are globally interconnected technically, socially, culturally, and economically. At the crossroads, Huatong Sun, author of Cross-Cultural Technology Design, presents theory, method, and case studies to uncover the global interconnectedness of social media design and reorient universal design standards. Centering on the dynamics between structure and agency, Sun draws on practice theories and transnational fieldwork and articulates a critical design approach. The CLUE2 (CLUE squared) framework extends from situated activity to social practice, and connects macro institutions with micro interactions to redress asymmetrical relations in everyday life. Why were Japanese users not crazed about Facebook? Would Twitter have had been more successful than its copycat Weibo in China if not banned? How did mobilities and value propositions play out in the competition of WhatsApp, WeChat, LINE, and KakaoTalk for global growth? Illustrating the cultural entanglement with a relational view of design, Sun provides three provocative accounts of cross-cultural social media design and use. Concepts such as affordance, genre, and uptake are demonstrated as design tools to bind the material with the discursive and leap from the critical to the generative for culturally sustaining design. Sun calls to reshape the crossroads into a design square where differences are nourished as design resources, where diverse discourses interact for innovation, and where alternative design epistemes thrive from the local. This

timely book will appeal to researchers, students, and practitioners who design across disciplines, paradigms, and boundaries to bridge differences in this increasingly globalized world.

Political Campaigning in Digital India Anil M. Varughese, Holli A. Semetko, 2024-06-28 This book provides a conceptual toolkit to understand the changing technologies and dynamics of political campaigning in India. Examining political campaigning and party strategies across many Indian states, with special attention to regional politics, histories, cultures, social and technological contexts, the book discusses the potential impacts of campaign strategies on electoral outcomes. Political campaigning reached a tipping point with millions of social media users engaging online with family and friends, political issues, parties and candidates in India's 2019 parliamentary election. Although India's political parties had been working with consultants and professional advertising agencies for decades, by 2019, millions of first-time voters as well as older voters were microtargeted with campaign messaging by parties and their affiliates, including frequent misinformation from unknown sources supporting one party or another. Filling a key gap in political communication research on election campaigns in digital India, the chapters in this book capture how political campaigning is important for the electoral fortunes of political parties in India's diverse regions and states. This book will appeal to students, scholars, and practitioners in political communication, public administration, and political consulting, as well as anyone interested in data-driven political campaigning. It will also be an invaluable reading for those interested in South Asian studies. This book was originally published as a special issue of South Asian History and Culture.

Communicating Causes Nicky Garsten, Ian Bruce, 2018-06-13
Non-profit organizations (NPOs) across the world are facing criticism alongside approbation. In order for NPOs to effectively support their causes, they require public trust. The editors of this book have persuaded PR experts from the UK and around the world, from a variety of PR specialisms operating across different organizational forms, to share their knowledge and experience. These contributions are scaffolded with authoritative academic and practical advice, as well as solutions. The book starts with foundations that underpin communications for causes. These include arguments that support the importance of non-profits in civil society; lessons in corporate governance; and a new approach to issues management. PR planning subjects tailored, or specific, to the sector include: strategic global communications planning, agile digital communications; branding internal communications and the securing of meaningful outcomes. Corporate partnerships are examined with a new 'Fit to Partner Test' and consideration of the mandated corporate social responsibility (CSR) in India, corporate volunteering in Brazil, and CSR in South Africa. Relations between governments and non-profits are also considered, both generally and with a particular focus on China. *Communicating Causes* looks at effective strategy and practice of PR in the modern non-profit. Including forewords by both John Grounds and Jon Snow, the expert perspectives offered in this book provide valuable support

to current and future communicators.

Mergers, Acquisitions, and Other Restructuring

Activities Donald DePamphilis, 2015-07-28 Mergers, Acquisitions, and Other Restructuring Activities is unique in that it is the most current, comprehensive, and cutting-edge text on M&A and corporate restructuring available. It is current in that it includes many of the most up-to-date and notable deals (e.g., Facebook's takeover of WhatsApp, the Dell privatization, and Verizon's mega buyout of Vodafone's share of Verizon Wireless), precedent setting judicial decisions (e.g., efforts to overturn defenses at Airgas and Sotheby's), new regulations (e.g., expediting backend mergers), trends (e.g., increasing role of activist investors in takeovers), and new tactics (e.g., two-tiered poison pill) employed in M&As. Most integrative case studies are new for this edition

and involve transactions that have been announced or completed since 2013. It is comprehensive in that nearly all aspects of M&As and corporate restructuring are explored. It is cutting edge in that conclusions and insights are anchored by the most recent academic research, with references to more than 200 empirical studies published in leading peer-reviewed journals just since 2012. And the substantially updated content is illustrated with numerous practical exhibits, case studies involving diverse transactions, easy-to-understand numerical examples, and hundreds of discussion questions and practice exercises. The highlights of the new edition are listed here:

- **New Chapters:** Two new chapters: Chapter 9 and 14. Chapter 9 discusses the basics of applying financial modeling methods to firm valuation and assists the reader in understanding the power (and limitations) of models in analyzing real world situation. Chapter 14 illustrates how complex financial models often are used to support the deal structuring process during M&A negotiations.
- **New Cases:** Ninety percent of the nearly forty case studies are new and involve transactions announced or completed during the last three years. These cases represent friendly, hostile, highly leveraged, and cross-border deals in ten different industries, involving public and private firms as well as firms experiencing financial distress. All end of chapter case studies begin with a Key Objectives section indicating what the student should learn from the case study and include discussion questions and solutions available in the online instructors' manual.
- **Latest Research:** This edition focuses on the most recent and relevant academic studies, some of which contain surprising insights changing the way we view this subject matter. Recent research has significant implications for academicians, students, M&A practitioners, and government policy makers shedding new light on current developments and trends in the ever-changing mergers and acquisitions market. The market for corporate control and corporate restructuring strategies are constantly changing,

reflecting the ongoing globalization of both product and capital markets, accelerating technological change, escalating industry consolidation, changing regulatory practices, and intensifying cross-border competition. While continuing to be relevant, empirical research covering the dynamics of the M&A markets of the 1970s, 1980s, and 1990s may be less germane in explaining current undercurrents and future trends.

The Fragile Balance of Terror Vipin Narang, Scott D. Sagan, 2023-01-15 In *The Fragile Balance of Terror*, the foremost experts on nuclear policy and strategy offer insight into an era rife with more nuclear powers. Some of these new powers suffer domestic instability, others are led by pathological personalist dictators, and many are situated in highly unstable regions of the world—a volatile mix of variables. The increasing fragility of deterrence in the twenty-first century is created by a confluence of forces: military technologies that create vulnerable arsenals, a novel information ecosystem that rapidly transmits both information and misinformation, nuclear rivalries that include three or more nuclear powers, and dictatorial decision making that encourages rash choices. The nuclear threats posed by India, Pakistan, Iran, and North Korea are thus fraught with danger. *The Fragile Balance of Terror*, edited by Vipin Narang and Scott D. Sagan, brings together a diverse collection of rigorous and creative scholars who analyze how the nuclear landscape is changing for the worse. Scholars, pundits, and policymakers who think that the spread of nuclear weapons can create stable forms of nuclear deterrence in the future will be forced to think again. Transcendent Parenting Sun Lim,Sun Sun Lim,2019-12-03
Whether members of the family are headed to school or work, smartphones accompany family members throughout the day. The growing sophistication of mobile communication has unleashed a proliferation of apps, channels, and platforms that link parents to their children and the key institutions in their lives. While parents

may feel empowered by their ability to provide their children assistance with a click on their smartphone, they may also feel pressured and overwhelmed by this need to always be on call for their children. This book focuses on the phenomenon of transcendent parenting, where parents actively use technology to go beyond traditional, physical practices of parenting. In drawing on the experiences of intensely digitally-connected families in Singapore to tell a global story, Sun Sun Lim argues how transcendent parenting can embody and convey, intentionally or not, the parenting priorities in these households. Chapters outline how parents exploit mobile connectivity to transcend the physical distance between themselves and their children, the online and offline social interaction environments, and the timelessness of seemingly ceaseless parenting. Transcendent Parenting further explores how mobile communication allows parents to be more involved than ever in their children's lives, leaving readers to question whether or not parents have become too involved as a result. With its clear discussions of the effects of transcendent parenting on parents' wellbeing and children's personal development, Transcendent Parenting will appeal to a broad audience of readers, from scholars, educators and policy makers to parents and young people across the globe.
