📖 **TORQUE** PETER WHERRETT,1977

📖 **ADVANCES IN HAPTICS** MEHRDAD HOSSEINI ZADEH,2010-04-01 Haptic interfaces are divided into two main categories: force feedback and tactile. Force feedback interfaces are used to explore and modify remote/virtual objects in three physical dimensions in applications including computer-aided design, computer-assisted surgery, and computer-aided assembly. Tactile interfaces deal with surface properties such as roughness, smoothness, and temperature. Haptic research is intrinsically multi-disciplinary, incorporating computer science/engineering, control, robotics, psychophysics, and human motor control. By extending the scope of research in haptics, advances can be achieved in existing applications such as computer-aided design (CAD), tele-surgery, rehabilitation, scientific visualization, robot-assisted surgery, authentication, and graphical user interfaces (GUI), to name a few. Advances in Haptics presents a number of recent contributions to the field of haptics. Authors from around the world present the results of their research on various issues in the field of haptics.

📖 **STRUCTURED WRITING** MARK BAKER,2018-09-10 Structured writing has never been more important or more confusing. We keep trying to do more and more with content, but we give ourselves less and less time to do it. Structured content can help keep your rhetoric on track and your processes efficient. But how does it do that and what is the relationship between rhetoric and process? It is easy to get lost in sea of acronyms and buzz words: semantics, XML, metadata, DITA, structure, DocBook, hypertext, markdown, topics, XSLT, reuse, LaTeX, silos, HTML. Structured Writing cuts through the noise, explaining what structured writing is (you have been doing it all along) and how you can use different structures to achieve different purposes. It focuses on how you can partition and manage the complexity of the content creation process using structured writing techniques to ensure that everything is handled by the person or process with the skills, time, and resources to handle it effectively. Most importantly, this book shows you how the right structured writing techniques can improve the quality of your content and, at the same time, make your content processes more efficient without sacrificing quality for efficiency or vice versa. There are so many options available in the structured writing space today. This book will show you where each of them fits and help you choose the approach that is optimal for your content.

📖 **ENGINEERING HUMAN COMPUTER INTERACTION AND INTERACTIVE SYSTEMS** RIMMI BASTIDE,PHILIPPE PALANQUE,JÜRGEN ROTH,2005-07-04 As its name suggests, the EHCI-DSVIS conference has been a special event, merging two different, although overlapping, research communities: EHCI (Engineering for Human-Computer Interaction) is a conference organized by the IFIP 2.7/13.4 working group, started in 1974 and held every three years since 1989. The group's activity is the scientific investigation of the relationships among the human factors in computing and software engineering. DSVIS (Design, Specification and Verification of Interactive Systems) is an annual conference started in 1994, and dedicated to the use of formal methods for the design of interactive systems. Of course these two research domains have a lot in common, and are informed by each other's results. The year 2004 was a good opportunity to bring closer these two research communities for an event, the 11th edition of DSVIS and the 9th edition of EHCI. EHCI-DSVIS was set up as a working conference bringing together researchers and practitioners interested in strengthening the scientific foundations of user interface design, specification and verification, and in examining the relationships between software engineering and human-computer interaction. The call for papers attracted a lot of attention, and we received a record number of submissions: out of the 65 submissions, 23 full papers were accepted, which gives an acceptance rate of approximately 34%. Three short papers were also included. The contributions were categorized in 8 chapters: Chapter 1 (Usability and Software Architecture) contains three contributions which advance the state of the art in usability approaches for modern software engineering.
