Inventing the Immigration Problem Katherine Benton-Cohen,2018-05-01 In 1907 the U.S. Congress created a joint commission to investigate what many Americans saw as a national crisis: an unprecedented number of immigrants flowing into the United States. Experts—women and men trained in the new field of social science—fanned out across the country to collect data on these fresh arrivals. The trove of information they amassed shaped how Americans thought about immigrants, themselves, and the nation's place in the world. Katherine Benton-Cohen argues that the Dillingham

Commission's legacy continues to inform the ways that U.S. policy addresses questions raised by immigration, over a century later. Within a decade of its launch, almost all of the commission's recommendations—including a literacy test, a quota system based on national origin, the continuation of Asian exclusion, and greater federal oversight of immigration policy—were implemented into law. Inventing the Immigration Problem describes the labyrinthine bureaucracy, broad administrative authority, and quantitative record-keeping that followed in the wake of these regulations. Their implementation marks a final turn away from an immigration policy motivated by executive-branch concerns over foreign policy and toward one dictated by domestic labor politics. The Dillingham Commission—which remains the largest immigration study ever conducted in the United States—reflects its particular moment in time when mass immigration, the birth of modern social science, and an aggressive foreign policy fostered a newly robust and optimistic notion of federal power. Its quintessentially Progressive formulation of America's immigration problem, and its recommendations, endure today in almost every component of immigration policy, control, and enforcement.

Word Freak Stefan Fatsis,2001-07-07 This "marvelously absorbing" book is "a walk on the wild side of words and ventures into the zone where language and mathematics intersect" (San Jose Mercury News). A former Wall Street Journal reporter and NPR regular, Stefan Fatsis recounts his remarkable rise through the ranks of elite Scrabble players while exploring the game's strange, potent hold over them—and him. At least thirty million American homes have a Scrabble set—but the game's most talented competitors inhabit a sphere far removed from the masses of "living room players." Theirs is a surprisingly diverse subculture whose stars include a vitamin-popping standup comic; a former bank teller whose intestinal troubles earned him the nickname "G.I. Joel"; a burly,

unemployed African American from Baltimore's inner city; the three-time national champion who plays according to Zen principles; and the author himself, who over the course of the book is transformed from a curious reporter to a confirmed Scrabble nut. Fatsis begins by haunting the gritty corner of a Greenwich Village park where pickup Scrabble games can be found whenever weather permits. His curiosity soon morphs into compulsion, as he sets about memorizing thousands of obscure words and fills his evenings with solo Scrabble played on his living room floor. Before long he finds himself at tournaments, socializing—and competing—with Scrabble's elite. But this book is about more than hardcore Scrabblers, for the game yields insights into realms as disparate as linguistics, psychology, and mathematics. Word Freak extends its reach even farther, pondering the light Scrabble throws on such notions as brilliance, memory, competition, failure, and hope. It is a geography of obsession that celebrates the uncanny powers locked in all of us, "a can't-put-it-down narrative that dances between memoir and reportage" (Los Angeles Times). "Funny, thoughtful, character-rich, unchallengeably winning writing." —The Atlantic Monthly This edition includes a new afterword by the author.

Bend, Not Break Ping Fu,MeiMei Fo,2013-11-26 Born on the eve of China's Cultural Revolution, Ping Fu was separated from her family at the age of eight. She grew up fighting hunger and humiliation and shielding her younger sister from the teenagers in Mao's Red Guard. At twenty-five, she found her way to the United States; her only resources were $80 and a few phrases of English. Yet Ping persevered, and the hard-won lessons of her childhood guided her to success in her new homeland. Aided by her well-honed survival instincts, a few good friends, and the kindness of strangers, she grew into someone she never thought she'd be—a strong, independent, entrepreneurial leader. "She tells her story with intelligence, verve and a candor that is often heart-rending." —The Wall Street Journal "This well-written tale of courage, compassion, and undaunted curiosity reveals the life of a genuine hero." —Booklist (starred review) "Her success at the American Dream is a real triumph." —The New York Post

Counterpoints Anti-Eviction Mapping Project,2021-08-03 Counterpoints: A San Francisco Bay

Area Atlas of Displacement and Resistance brings together cartography, essays, illustrations, poetry, and more in order to depict gentrification and resistance struggles from across the San Francisco Bay Area and act as a roadmap to counter-hegemonic knowledge making and activism. Compiled by the Anti-Eviction Mapping Project, each chapter reflects different frameworks for understanding the Bay Area's ongoing urban upheaval, including: evictions and root shock, indigenous geographies, health and environmental racism, state violence, transportation and infrastructure, migration and relocation, and speculative futures. By weaving these themes together, Counterpoints expands normative urban-studies framings of gentrification to consider more complex, regional, historically grounded, and entangled horizons for understanding the present. Understanding the tech boom and its effects means looking beyond San Francisco's borders to consider the region as a socially, economically, and politically interconnected whole and reckoning with the area's deep history of displacement, going back to its first moments of settler colonialism. Counterpoints combines work from within the project with contributions from community partners, from longtime community members who have been fighting multiple waves of racial dispossession to elementary school youth envisioning decolonial futures. In this way, Counterpoints is a collaborative, co-created atlas aimed at expanding knowledge on displacement and resistance in the Bay Area with, rather than for or about, those most impacted.

Games with a Purpose (GWAPS) Mathieu Lafourcade,Alain Joubert,Nathalie Le Brun,2015-06-29 Human brains can be seen as knowledge processors in a distributed system. Each of them can achieve, conscious or not, a small part of a treatment too important to be done by one.

These are also hunter / gatherers of knowledge. Provided that the number of contributors is large enough, the results are usually better quality than if they were the result of the activity of a single person, even if it is a domain expert. This type of activity is done via online games.

Facebook Nation Newton Lee,2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness – a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.
