News Jackie Harrison,2005-11-10 Written in a clear and lively style, with examples across a range of media including print, radio, television and the internet, Jackie Harrison explains the different theoretical approaches that have been used to study news.

News and Journalism in the UK Brian McNair,2009-02-18 News and Journalism in the UK is an accessible and comprehensive introduction to the political, economic and regulatory environments of press and broadcast journalism in Britain and Northern Ireland. Surveying the industry in a period of radical economic and technological change, Brian McNair examines the main trends in journalistic media in the last two decades and assesses the challenges and future of the industry in the new millennium. Integrating both academic and journalistic perspectives on journalism, topics addressed in this revised and updated edition include: the rise of online journalism and the impact of blogging on mainstream journalism the emergence of 24 hour news channels in the UK the role and impact of journalism, with reference to issues such as democracy, health scares and the war on terror trends in media ownership and editorial allegiances 'Tabloidisation', Americanisation and the supposed 'dumbing down' of journalistic standards the implications of devolution for regional journalists.

Television News Ivor Yorke,2013-04-03 A straightforward account of the editorial and production processes used by journalists to bring television news to the viewer. It is an invaluable text for students on journalism courses, print and radio journalists moving into television and TV journalists wishing to update their knowledge. Takes into account the latest practices and issues in the television industry. This fourth edition has been thoroughly updated to take account of the latest practices and issues in the television industry. It includes new illustrations of developments from both a technological and an editorial perspective. In a changing broadcasting environment, newcomers to television journalism are finding themselves entering a world in which an empathy with

technology is as important as a way with words. The newsroom itself is now completely computerized and consequently new skills and working methods need to be mastered to take account of the revolutionary advances.

Misunderstanding News Audiences Eiri Elvestad, Angela Phillips, 2018-04-09 Misunderstanding News Audiences interrogates the prevailing myths around the impact of the Internet and social media on news consumption and democracy. The book draws on a broad range of comparative research into audience engagement with news, across different geographic regions, to provide insight into the experience of news audiences in the twenty-first century. From its inception, it was imagined that the Internet would benignly transform the nature of news media and its consumers. There were predictions that it would, for example, break up news oligarchies, improve plurality and diversity through news personalisation, create genuine social solidarity online, and increase political awareness and participation among citizens. However, this book finds that, while mainstream news media is still the major source of news, the new media environment appears to lead to greater polarisation between news junkies and news avoiders, and to greater political polarisation. The authors also argue that the dominant role of the USA in the field of news audience research has created myths about a global news audience, which obscures the importance of national context as a major explanation for news exposure differences. Misunderstanding News Audiences presents an important analysis of findings from recent audience studies and, in doing so, encourages readers to re-evaluate popular beliefs about the influence of the Internet on news consumption and democracy in the West.

The Darkest Time of Night Jeremy Finley, 2018-06-26 When four-year-old William vanishes in the woods behind his home, the only witness is his older brother who whispers, 'The lights took him,' and then never speaks again. With these words, the boys' grandmother Lynn Roseworth fears only she knows the truth. But coming forward would ruin her family and her husband's political career. As Lynn and her best friend Roxy revisit the secrets of her long-buried past to find clues that will lead to William, they'll get ensnared in a much larger conspiracy. The truth is hidden for a reason, and not even a grandmother's love may be enough to save her grandson from what is coming for them all

The Democratic Value of News Stephen Cushion, 2017-09-16 The ownership and funding of media organisations inevitably affects what news we receive everyday. But is public or private ownership better? Looking at how news is constructed in different contexts under public and commercial models, this book uses global comparative examples to give a topical insight into the world of broadcasting today.

The Discourse of Broadcast News Martin Montgomery, 2007-11-01 In this timely and important study Martin Montgomery unpicks the inside workings of what must still be considered the dominant news medium: broadcast news. Drawing principally on linguistics, but multidisciplinary in its scope, *The Discourse of Broadcast News* demonstrates that news programmes are as much about showing as telling, as much about ordinary bystanders as about experts, and as much about personal testimony as calling politicians to account. Using close analysis of the discourse of television and radio news, the book reveals how important conventions for presenting news are

changing, with significant consequences for the ways audiences understand its truthfulness. Fully illustrated with examples and including detailed examination of the high profile case of ex-BBC journalist Andrew Gilligan, *The Discourse of Broadcast News* provides a comprehensive study which will challenge our current assumptions about the news. *The Discourse of Broadcast News* will be a key resource for anyone researching the news, whether they be students of language and linguistics, media studies or communication studies.

Broken News Chris Stirewalt, 2022-08-23 One of America's most experienced and exemplary journalists has written an unsparing analysis of the dreadful consequences -- for journalism and the nation -- of 'how the news lost a race to the bottom with itself.'" -- George F. Will In this national bestseller, Chris Stirewalt, a former Fox News political editor, takes readers inside America's broken newsrooms that have succumbed to the temptation of "rage revenue." One of America's sharpest political analysts, Stirewalt employs his trademark wit and insight to reveal how these media organizations slant coverage -- and why that drives political division and rewards outrageous conduct. The New York Times wrote that Stirewalt's book is an often candid reflection on the state of political journalism and his time at Fox News, where such post-mortem assessments are not common... *Broken News* is a fascinating, deeply researched, conversation-provoking study of how the news is made and how it must be repaired. Stirewalt goes deep inside the history of the industry to explain how today's media divides America for profit. And he offers practical advice for how readers, listeners, and viewers can (and should) become better news consumers for the sake of the republic.

The Rise of 24-hour News Television Stephen Cushion, Justin Lewis, 2010 De-westernising journalism studies in an intelligent way, this book deserves to be read around the world.---Professor James Curran, Goldsmiths, University of London, United Kingdom --

The Future of Quality News Journalism Peter Anderson, Michael Williams, George Ogola, 2013-09-23 In the face of the continuously changing challenges of the digital age, it is difficult for quality news journalism to survive on any significant scale if a means for adequately funding it is not available. This new study, a follow-up to 2007's *The Future of Journalism in the Advanced Democracies*, includes a comparative analysis of possible alternative business models that may save the future of the quality news business across the developed, intermediate, and developing worlds. Its detailed evaluation encompasses also the different ways in which wider key issues are affecting the prospects for quality news as a core ingredient of effectively working democracies. It focuses on the United States, the United Kingdom, South Africa, India, Kenya, and selected parts of the Arab World, providing a comprehensive cross-cultural survey of different approaches to addressing these various issues. To keep the study firmly rooted in the real world the contributors include distinguished practitioners as well as experienced academics.

New Media, Old News Natalie Fenton, 2010 In a thorough empirical investigation of journalistic practices in different news contexts, 'New Media, Old News' explores how technological, economic and social changes have reconfigured news journalism, and the consequences of these transformations for a vibrant democracy in our digital

age.

News as Entertainment Daya Kishan Thussu, 2008-01-09 Thussu brings to this project the passion for news of a socially committed former journalist, the political economy of his international relations education and a formidable assembly of global detail, examining the recent explosion of 'infotainment'. - John Downing, Southern Illinois University Thussu's account of war as infotainment, the Bollywoodization of news and the emergence of a global infotainment sphere is as compelling as it is alarming. This is a significant and essential book for anyone interested in exploring the connections between news journalism, informed citizenship and democracy. - Bob Franklin, The Cardiff School of Journalism, Media and Cultural Studies Richly detailed and empirically grounded, this first book-length study of infotainment and its globalization by a leading scholar of global communication, offers a comprehensive and critical analysis of this emerging phenomenon. Going beyond - both geographically and theoretically - the 'dumbing down' discourse, largely confined to the Anglo-American media, the book argues that infotainment may have an important ideological role, a diversion in which 'soft news' masks the hard realities of neo-liberal imperialism. Chapters include a historical appraisal of infotainment; the infrastructure for its globalization as well as coverage of recent wars on television news as high-tech infotainment and the growing synergies between Hollywood and Bollywood-originated infotainment. A 'global infotainment sphere' is emerging, the book argues, within which competing versions of news - from 24/7 news networks to bloggers - coexist. Accessible, engagingly written and robustly argued, the book combines analyses of theoretical debates on infotainment with extensive and up-to-date comparative data.

News and Politics Stephen Cushion, 2015-03-24 News and Politics critically examines television news bulletins – still the primary source of information for most people – and asks whether the wider pace and immediacy of 24-hour news culture has influenced their format and style over time. Drawing on the concepts of mediatization and journalistic interventionism, Stephen Cushion empirically traces the shift from edited to live reporting from a cross-national perspective, focussing on the two-way convention in political coverage and the more interpretive approach to journalism it promotes. Challenging prevailing academic wisdom, Cushion argues that the mediatization of news does not necessarily reflect a commercial logic or a lowering of journalism standards. In particular, the rise of live two-ways can potentially enhance viewers' understanding of public affairs – moving reporters beyond their visual backdrops and reliance on political soundbites – by asking journalists to scrutinize the actions of political elites, interpret competing source claims and to explain the broader context to everyday stories. Considering the future of 24-hour news, a final discussion asks whether new content and social media platforms – including Twitter and BuzzFeed – enhance or weaken democratic culture. This timely analysis of News and Politics is ideal for students of political communication and journalism studies, as well as communication studies, media studies, and political science.

News and Journalism in the UK Brian McNair, Senior Lecturer Brian McNair, 2003-09-02 News and Journalism in the UK is an accessible and comprehensive introduction to the political, economic and regulatory environments of press

and broadcast journalism in Britain and Northern Ireland. Surveying the industry in a period of radical economic and technological change, Brian McNair examines the main trends in journalistic media in the last two decades and assesses the challenges and future of the industry in the new millennium. Integrating both academic and journalistic perspectives on journalism, topics addressed in this revised and updated edition include: *'tabloidization', Americanization and the supposed 'dumbing down' of journalistic standards *changing work patterns and the feminization of journalism *trends in media ownership and editorial allegiances *the impact of technological innovations such as digitalization, online media and 24 hour news *the implications of devolution for regional journalists.
