Frédéric Houssin, Cédric Ramadier

Car Games Jo Pink, 2004 A collection of games to enjoy while traveling, including spotting games, guessing games, action games, imagination games, and word games.

First to the Finish Chip Lovitt, 2004-08-31 This large gamebook includes five action-packed racing games, four race car playing pieces, and an electronic, race-car sound Randomizer module that serves as electronic dice. The books also feature four popular NASCAR drivers-four-time NASCAR champion Jeff Gordon, 2003 champion Matt Kenseth, 2002 champion Tony Stewart, and popular driver Rusty Wallace, so kids can pretend to be one of these drivers as they play the games. Each spread contains a racetrack layout or race-related grid and players use the Randomizer to move around the game boards. Games include a tri-oval racetrack (like the Daytona 500) path game, a triple-track, three-races-in-one game, a pit-stop challenge, and two other fun games. In addition, action photos of NASCAR races, cars, and drivers accompany each game board.

The Evolution of Fantasy Role-Playing Games Michael J. Tresca, 2014-01-10
Tracing the evolution of fantasy gaming from its origins in tabletop war and

collectible card games to contemporary web-based live action and massive multi-player games, this book examines the archetypes and concepts within the fantasy gaming genre alongside the roles and functions of the game players themselves. Other topics include: how *The Hobbit* and *The Lord of the Rings* helped shape fantasy gaming through Tolkien's obsessive attention to detail and virtual world building; the community-based fellowship embraced by players of both play-by-post and persistent browser-based games, despite the fact that these games are fundamentally solo experiences; the origins of gamebooks and interactive fiction; and the evolution of online gaming in terms of technological capabilities, media richness, narrative structure, coding authority, and participant roles.

Start Your Engines Jim Parker, 2005 *Start Your Engines: Developing Driving*

and Racing Games is a unique book that will teach readers everything they need to set up different types of road conditions, create opponents, set up road hazards, generate weather conditions, manage collisions, and much more. Not only will readers end up with the knowledge and tools they need to create driving and racing games, they get a full-featured, playable racing game that they can expand and customize with the skills learned in the book. The book shows readers how to develop live-action, interactive racing games with a unique three-tiered approach. Readers will start off by learning how to build a model for a racing game and then apply the physics to create a simple 2D (flat) game while learning how to create a variety of vehicles, race opponents, and terrain. In tier two, readers learn how to go from 2D to 3D with the same game concepts illustrating how to take the same basic idea for a game (and gameplay) and use modeling tips and tricks to begin customizing features. In the final tier, the author takes the concepts of 3D driving games to Mars with data modeled from real Mars terrain. Readers will create a dune buggy race on the planet of Mars and learn to create cool racing action at a bizarre and treacherous location.
