Billboard ,1993-08-14 In its 114th year, Billboard remains the world's premier weekly music publication and a diverse digital, events, brand, content and data licensing platform. Billboard publishes the most trusted charts and offers unrivaled reporting about the latest music, video, gaming, media, digital and mobile entertainment issues and trends.

Down for the Count Martin Popoff, Hugh Syme, Sean Kelly, 2023-12-05 One of hard rock's best kept secrets, Y&T (originally Yesterday & Today) burst out of the fertile San Francisco Bay Area music scene in 1974. From their 1976 debut to the present, Y&T has consistently been one of the most dependable melodic hard rock groups. *DOWN FOR THE COUNT* is an album by album look at their recorded studio output, with a varied list of writers, YouTubers, and other music fanatics offering their views on the Y&T catalogue. With striking cover art by the legendary Hugh Syme, *DOWN FOR THE COUNT: The Y&T Album Review* is the author's second book, following *UNSPOOLED: An Adventure In 8-Tracks*.

The Neuroscience and Psychophysiology of Experience-Based Decisions Eldad Yechiam, Itzhak Aharon, In experience-based decisions people learn to make decisions by sampling the relevant alternatives and getting feedback. The study of experience-based decisions has recently revealed some robust regularities that differ from how people make decisions based on descriptions. For example, people were found to underweight small probability events in experience-based decisions, while overweighting them in decisions based on descriptions (i.e. where the participants have full information about the outcome distributions but no feedback). This is now commonly referred to as the description-experience gap. In parallel to the recent advancement in Decision Science, neuroscientists have for a long while used the experience-based decisions paradigm for analyzing brain-behavior interactions. For example, phenomena such as the

feedback-based Error-Related Negativity (fERN) in event-related potentials and the role of non-declarative knowledge in selecting advantageously were discovered using experience-based tasks. The goal of the current Research Topic is to combine two sources of knowledge concerning experience-based decisions: State of the art models in decision science, and neuroscientific and psychophysiological approaches that shed light on the working of the brain in these decisions. Also relevant are process-based analyses of fractions of behavior in these types of decisions. We consider original empirical work and theoretical analyses of existing datasets.

The Life, Death, and Afterlife of the Record Store Gina Arnold,John Dougan,Christine Feldman-Barrett,Matthew Worley,2023-06-15 Once conduits to new music, frequently

bypassing the corporate music industry in ways now done more easily via the Internet, record stores championed the most local of economic enterprises, allowing social mobility to well up from them in unexpected ways. Record stores speak volumes about our relationship to shopping, capitalism, and art. This book takes a comprehensive look at what individual record stores meant to individual people, but also what they meant to communities, to musical genres, and to society in general. What was their role in shaping social practices, aesthetic tastes, and even, loosely put, ideologies? From women-owned and independent record stores, to Reggae record shops in London, to Rough Trade in Paris, this book takes on a global and interdisciplinary approach to evaluating record stores. It collects stories and memories, and facts about a variety of local stores that not only re-centers the record store as a marketplace of ideas, but also explore and celebrate a neglected personal history of many lives.

Predicting Outdoor Sound Keith Attenborough, Kai Ming Li, Kirill Horoshenkov, 2006-11-17 *Predicting Outdoor Sound* provides a scholarly yet practical examination of the phenomena that affect outdoor sound close to the ground and its prediction. It is devoted to bringing together theories and data to give both researchers and practitioners the basis for deciding which model to use in a given situation. The book covers recent advances in

The Trinity and Ecumenical Church Thought Revd Dr William C Ingle-Gillis, 2013-05-28 Some hundred years from inception, the ecumenical movement is stagnating. William C. Ingle-Gillis argues that the problem lies in modern ecumenism's treatment of denominational Churches as provisional entities requiring reunion to be more fully Christ's Body. In a work unique both to ecumenical studies and to trinitarian theology, the author redefines ecclesial life from the premise that God's essence is personhood-in-communion and that the ultimate calling of human persons is to share as fully in the divine life as Christ himself. Concluding that the Churches are, by the Spirit's action, a

tangible, dynamic event, wherein God makes visible his on-going reconciliation of the world to himself, Ingle-Gillis argues that the Churches' true life lies in coming-together, rather than being-together. This conclusion places ecumenism at the heart of Church life and witness.

American-Type Options Dmitrii S. Silvestrov, 2014-12-17 The book gives a systematical presentation of stochastic approximation methods for discrete time Markov price processes. Advanced methods combining backward recurrence algorithms for computing of option rewards and general results on convergence of stochastic space skeleton and tree approximations for option rewards are applied to a variety of models of multivariate modulated Markov price processes. The principal novelty of presented results is based on consideration of multivariate modulated Markov price processes and general pay-off functions, which can depend not only on price but also an additional stochastic modulating index component, and use of minimal conditions of smoothness for transition probabilities and pay-off functions, compactness conditions for log-price processes and rate of growth conditions for pay-off functions. The volume presents results on structural studies of optimal stopping domains, Monte Carlo based approximation reward algorithms, and convergence of American-type options for autoregressive and continuous time models, as well as results of the corresponding experimental studies.

HAIrcyclopedia Vol. 1 - The Legends Taylor T. Carlson, 2014-06-27 *HAIrcyclopedia Vol. 1 - The Legends* in the first book from Taylor T. Carlson, the Las Vegas Valley's biggest fan of hard rock and heavy metal. The book features profiles for 60 of the hottest bands of the 80s and beyond, from popular bands like Motley Crue, Poison, and Guns N Roses, right down to more obscure ones like Bang Tango, Tora Tora, and Honeymoon Suite. Each band has a band member list, discography, recommendations, and a band biography. Information has been

pulled from the author's extensive personal notes, and interviews with band members and fellow fans and experts. The book is printed in black and white and the emphasis is more on information - this is an encyclopedia, not a coffee table book. However, the book features extensive photographs from David Plastik, a legendary photographer of the era, as well as other contributors. The newest edition of the book features some minor revisions and some photos have been added/changed.

Drivin' Sideways: The Story Of The Band Danger Danger

Aaron Joy, 2019-11-24 This is the first book on Danger Danger, charting their life via researched history and words from all the members, from their early days as Hotshot to their quasi-reunion via the Defiants. This is an unauthorized fan publication. Many critics lump them in with their 1980's peers, but further listening makes it evident that Danger Danger had so much more to offer. While in the glam metal bubble their many textures got lost, only to then reinvent themselves once the grunge wave hit the musical shores. While the members have worked with Michael Bolton, Billy Sheehan, Motley Crue, Peter Dinklage, Alice Cooper, White Lion, David Lee Roth, Y&T, Megadeth, Joan Jett, Asia, Dee Snider, and Dio, among others. Now comes the history of Steve West, Bruno Ravel, Ted Poley, Paul Laine, Mike Pont, Phil Naro, Rob Marcello, Andy Timmons, Tony Bruno Rey, Al Pitrelli, Kasey Smith; touring members Steven Mazza of the Ted Poley Band, Steve Brown of Trixter, Scott Brown of Trooper; and roadie Kelly Nickels later of L.A. Guns.

Eddie Trunk's Essential Hard Rock and Heavy Metal, Volume II

Eddie Trunk, 2013-09-24 In the much-anticipated sequel to the bestselling Eddie Trunk's Essential Hard Rock and Heavy Metal, Trunk picks up where he left off by featuring 35 new bands, both legendary and forgotten, and sharing his passion for all things metal. Complete with his favorite playlists, band discographies, memorabilia, trivia, and more than 200 color photographs, this new book combines brief band histories with Trunk's unique

personal experiences and anecdotes in a must-read for all fans of rock and roll. Featuring a diverse lineup, from Marilyn Manson and Ace Frehley to Lita Ford and Whitesnake, Volume 2 salutes all those who are ready to rock!

The Rush Chronology Patrick Lemieux, 2015-09-16 Rush is one of rock's most influential bands. Ranked third in consecutive gold or platinum albums after the Beatles and the Rolling Stones, the band enjoys a devoted following by legions around the world and is revered by generations of musicians.

The Effects of Housing Prices and Monetary Policy in a Currency Union Oriol Aspachs-Bracons, Mr. Pau

Rabanal, 2011-01-01 The recent boom-and-bust cycle in housing prices has refreshed the debate on the drivers of housing cycles as well as the appropriate policy response. We analyze the case of Spain, where housing prices have soared since it joined the EMU. We present evidence based on a VAR model, and we calibrate a New Keynesian model of a currency area with durable goods to explain it. We find that labor market rigidities provide stronger amplification effects to all type of shocks than financial frictions do. Finally, we show that when the central bank reacts to house prices, the non-durable sector suffers an important contraction. As a result, the boom-and-bust cycle would not have been avoided if Spain had remained outside the EMU during the 1996-2007 period.

Welcome to Groove House Jill Meniketti, 2015-03-01 Lock up your grandmothers! . . . When rock's former biggest rebel loses everything, he's forced to call in favors from all the rock star royalty whom he'd burned his entire career. With a trashed comeback tour, creditors on his ass, no record deal, a health issue he doesn't even know how to spell, and nothing but a few bucks from the sale of his last guitar, Mike Mays is destitute for the first time in his rock star life. He's forced to crash his estranged, uptight daughter's tidy world, and when she kicks him out, to couch-surf halfway around the world at a ragtag farmhouse in Tuscany called Groove House—home to a pack of aging ex-rock

stars, who aren't thrilled to see him. Mike creates chaos at every turn, bulldozing everyone in his path. His raunchy offstage antics snagged headlines back in the '70s and '80s, but can the aging bad boy bluff his way out of his worst bungle yet and actually stage a comeback?

Irrational Judgments Kirsten Swenson, 2015-11-27 *Irrational Judgments* examines the close friendship and significant exchange of ideas between Eva Hesse (1936–1970) and Sol LeWitt (1928–2007) in New York City during the 1960s. Taking its title from LeWitt's statement "Irrational judgments lead to new experience," this book examines the breakthroughs of the artists' intertwined careers, offering a new understanding of minimal, post-minimal, and conceptual art amid the era's political and social upheavals. Kirsten Swenson offers the first in-depth discussion of the early critical developments of each artist: LeWitt's turn from commercial design to fine art, and Hesse's move from expressionist painting to reliefs and sculpture. Bringing together a wealth of documents, interviews, and images—many published here for the first time—this handsome publication presents an insightful account of the artists' influence on and support for each other's pursuit of an experimental practice. Swenson's analysis expands our understanding of the artists' ideas, the importance of their work, and, more broadly, the relationship of the 1960s New York art world to gender politics, the Vietnam War, and the city itself.

Projective Differential Geometry of Submanifolds M.A. Akivis, V.V. Goldberg, 1993-06-30 In this book, the general theory of submanifolds in a multidimensional projective space is constructed. The topics dealt with include osculating spaces and fundamental forms of different orders, asymptotic and conjugate lines, submanifolds on the Grassmannians, different aspects of the normalization problems for submanifolds (with special emphasis given to a connection in the normal bundle) and the problem of algebraizability for different kinds of submanifolds, the geometry

of hypersurfaces and hyperbands, etc. A series of special types of submanifolds with special projective structures are studied: submanifolds carrying a net of conjugate lines (in particular, conjugate systems), tangentially degenerate submanifolds, submanifolds with asymptotic and conjugate distributions etc. The method of moving frames and the apparatus of exterior differential forms are systematically used in the book and the results presented can be applied to the problems dealing with the linear subspaces or their generalizations. Graduate students majoring in differential geometry will find this monograph of great interest, as will researchers in differential and algebraic geometry, complex analysis and theory of several complex variables.

Time Series and Panel Data Econometrics M. Hashem Pesaran, 2015 This work describes and illustrates many advances that have taken place in a number of areas in theoretical and applied econometrics over the past four decades.

Operator Algebras Bruce Blackadar, 2006-03-09 This book offers a comprehensive introduction to the general theory of C^* -algebras and von Neumann algebras. Beginning with the basics, the theory is developed through such topics as tensor products, nuclearity and exactness, crossed products, K-theory, and quasidiagonality. The presentation carefully and precisely explains the main features of each part of the theory of operator algebras; most important arguments are at least outlined and many are presented in full detail.
