🔍 A JEWEL AMID THE YELLOW DUST K. LEE WASHINGTON,2003 How do you feel when you take a new job? The first day of anxiety and uncertainty are eased with you blending into the system, and everyone and everything seems to adjust comfortably around you. What if you took a job on the other side of the world, where you could not understand the language, customs, currency, food, and just about everything else? YOU will be different for a whole year! This is the world of a foreign ESL teacher. A JEWEL AMID THE YELLOW DUST--K.O.R.E.A. will explain how this works.

🔍 INTEGRATED IMPACT ANALYSIS OF YELLOW-DUST STORMS NING AI,2003 The dust storm is a meteorological event that is caused by strong winds and proceeds from arid and semi-arid regions, transporting a thick cloud of fine sediments. In China, the sediments of dust storms mainly come from the desert and thus are called yellow-dust storms. Although these storms can disrupt socioeconomic activities widely and pose hazards to human health as well as to the ecosystem, no one has made a systematic socioeconomic analysis of yellow-dust storms. I provide an integrated regional socioeconomic framework to quantify the impacts of yellow-dust storms, as a conceptual model and a demonstration of applicable methodologies. I conduct a case study using 2000 Beijing data, mainly applying input-output analysis, dose-response analysis, and a benefit-transfer approach, and test my results with sensitivity analysis. I demonstrate that the economic impacts of yellow-dust storms have reached all sectors of the regional economy, and that their delayed impacts were more significant than the immediate impacts. Further, I clarify the extent of the economic impacts of yellow-dust storms by both backward and forward linkage analyses. On the basis of both quantitative and qualitative analysis results, I discuss the policy implications of yellow-dust control and show that water-resource planning is critical both for the prevention and mitigation of yellow-dust storm problems.

🔍 A FINE YELLOW DUST LAURA APOL,2021-08-01 In late April 2017, Laura Apol’s twenty-six-year-old daughter, Hanna, took her own life. Apol had long believed in the therapeutic possibilities of writing, having conducted workshops on writing-for-healing for more than a decade. Yet after Hanna’s death, she had her own therapeutic writing to do, turning her anguish, disbelief, and love into poems that map the first year of loss. This collection is the result of that writing, giving voice to grief as it is lived, moment by moment, memory by memory, event by event. While most writing about loss does so from a distance, Apol chooses instead to write from inside those days and months and seasons, allowing readers to experience alongside the poet the moments, the questions, and the deep longings that shape the first grief-year.

🔍 CHINESE YELLOW DUST AND KOREAN INFANT HEALTH DEOKRYE BAEK,DUHA TORE ALTINDAG,H. NACI MOCAN,2015 Naturally-occurring yellow sand outbreaks, which are produced by winds flowing to Korea from China and Mongolia, create air pollution. Although there is seasonal pattern of this phenomenon, there exists substantial variation in its timing, strength and location from year to year. Thus, exposure to the intensity of air pollution exhibits significant randomness and unpredictability. To warn residents about air pollution in general, and about these dust storms in particular, Korean authorities issue different types of public alerts. Using birth certificate data on more than 1.5 million babies born between 2003 and 2011, we investigate the impact of air pollution, and the avoidance behavior triggered by pollution alerts on various birth outcomes. We find that exposure to air pollution during pregnancy has a significant negative impact on birth weight, the gestation weeks of the baby, and the propensity of the baby being low weight. Public alerts about air quality during pregnancy have a separate positive effect on fetal health. We show that Korean women do not time their pregnancy according to expected yellow dust exposure, and that educated women’s pregnancy timing is not different from those who are less-educated. The results provide evidence for the effectiveness of pollution alert systems in promoting public health. They also underline the importance of taking into account individuals’ avoidance behavior when estimating the impact of air quality on birth outcomes. Specifically, we show that the estimated impact of air pollution on infant health is reduced by half when the preventive effect of public health warnings is not accounted for.

🔍 YELLOW DIRT JUDY PASTERNAK,2011-07-05 Tells the story of uranium mining on the Navajo reservation and its legacy of sickness and government neglect, documenting one of the darker chapters in 20th century American history. --From publisher description.

🔍 YELLOW DIRT R. ALLEN CHAPPELL,2021-02-28 Yellow dirt gathers in the creases of the toddler’s dirty blue jeans and on the little hands used to brush away a pesky fly. The same yellow particles that cling to the walls of the Hogan, contaminates the drinking water and fills the air where his father works only to come home covered in yellow dust. Yellow dirt. That enriches the powerful, at the expense of the unsuspecting Diné . Sam Klah, now a teenager and left to fend for himself after his mother’s death, is determined to leave the Chindi plagued Hogan and track down his only living relative--little knowing something far more terrifying than Chindi spirits awaits him just down the trail. The eleventh stand-alone book in Chappell’s exciting Navajo Nation Mystery series plunges readers into a deftly woven mystery within a mystery. The author’s unique gift is to hand over the reins to mystical places. Places many readers might never otherwise experience...along with the inimitable characters, old and new, that will linger on long after the story has ended.

🔍 JOSEON: ADDRESSING UNIFICATION & FINE DUST RANDELL STROUD,2021-12-19 The Korean Peninsula is geographically, technologically, and culturally, one of the most intriguing and important places on Earth. In this report submitted to the United Nations in Nairobi/Environmental Affairs and to the Korean Environmental Ministry, the pros and challenges of North/South unification as well as practical solutions for the eradication and/or reduction of the fine-dust air crisis, is addressed in this title. As an American descendant of those who fought in the Korean war, and adopted family members who share in the ethnic pride of the Joseon people, I owe it to them to offer my pragmatic and innovation solutions to these issues using philosophy, diplomacy, and technology to achieve peace, prosperity, and stability in this important region within our eastern hemisphere. In this title, I also push for hydrogen fuel alternatives and new technologies which are going through the patent pending process in order to help achieve these end-goals. I believe that maintaining responsibility over the Korean Peninsula and keeping our promises to those who died and bled for democracy to thrive there is the best way to maintain the region, and for the sake of my ancestors, I will commit myself to keeping their memories alive.

🔍 DOCUMENTS OF THE DUST BOWL R. DOUGLAS HURT,2019-04-01 This book provides a unique, thorough, and indispensable resource for anyone investigating the causes and consequences of the Dust Bowl. During the 1930s, drought and the cultivation of submarginal lands created a severe wind-erosion problem in the southern Great Plains, a region that became known as the Dust Bowl. During the worst dust storms, the blowing soil often turned day into night. Some people died when caught outside during a black blizzard, others developed dust pneumonia, and some residents moved to California. Most people, however, remained. Those who stayed and endured the storms had an abiding faith that federal resources and the return of normal rainfall would end the dust storms and return life to normal, free from the desperation and fear caused by the blowing soil. Documents of the Dust Bowl offers a fascinating documentary history of one of the worst ecological disasters in American history. It will enable high school students and academics alike to study the manner in which Dust Bowl residents confronted and endured the dust storms in the southern Great Plains during the 1930s.
