Road of the King Patrick Hoban, 2016-03-10 This book will teach a systematic approach to winning tournaments that we will be able to apply to any format, independent of context. While our focus will be on winning tournaments, much of what we talk about can be applied in a broader sense and the scope of what is written extends to many disciplines. We will take from areas such as philosophy, economics, psychology, business, and many of my own personal experiences as a player. The first section of the book will introduce the framework that we will build on throughout the book. Patrick Chapin's Theory of Everything is commonly used as the framework for card theory. We are going to start off by taking a look at it, but then we are going to get into some of the problems with using it as a guiding framework. After discussing the problems it has, we are going to attempt to build a better guiding framework. The second section of the book will focus on self. Much of this section will focus on what it means to be rational. We will begin by ensuring that we have the proper tools to make good decisions at our disposal. Next we will explore the various biases that cloud our judgments. Then we will discuss ways we can guard ourselves against these biases and come up with some ways of thinking about things that can better guide our decisions. The final part of this section will deal with properly motivating ourselves to do what it takes to see success. The third section will focus on developing our circle. Our circle is our team. These are the people who will help us see success and who we will help see success. We are going to talk about the tools our circle will use and how to get the most out of those tools, as well as discuss the kind of people we want in our circle. In the fourth section we're going to get down to the ins and outs of

technical play. We are going to be talking about the different kinds of resources within a game and about how our role varies within a game. Then we are going to discuss different approaches we can take with our plays to ensure that we are getting the most out of them. The final part of this section will talk about the right approach to have to tournaments to make sure we are on top of our game when the big day comes. The fifth section is going to focus on the mental aspects of the game. We are going to start off by talking about how to gauge our opponents' skill level so that we can adjust our plays and make them more effective. Then we are going to talk about how to get a read on our opponent's card and how to effectively get information out of them. After that we're going to talk about different ways of persuading our opponent into making the moves we want them to make. In the sixth section we will discuss effective deckbuilding. We will start off by discussing the deckbuilding philosophy and the first principles of deckbuilding. We will then discuss the various role cards can play in a game and talk about some shortcuts for evaluating them. Then we're going to talk about how probability affects our deckbuilding. After that we're going to build on the first principles of deckbuilding by introducing some deckbuilding rules to build consistent and powerful decks. We are also going to discuss deckbuilding curves that we can use to guide our choices. Finally we are going to discuss how to effectively side deck. In the final section we will discuss metagames. We will talk about how to identify shifts in the metagame and then move on to discussing some tournament strategies we can take to overcome the metagame. In the final chapter, we will come to understand how we can influence the format and plan for incremental development, so that we will be able to succeed throughout a format.

Twelve Years a Slave Solomon Northup, 2024-01-04
Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician,

Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Designing Games Tynan Sylvester, 2013-01-03 Ready to give your design skills a real boost? This eye-opening book helps you explore the design structure behind most of today's hit video games. You'll learn principles and practices for crafting games that generate emotionally charged experiences—a combination of elegant game mechanics, compelling fiction, and pace that fully immerses players. In clear and approachable prose, design pro Tynan Sylvester also looks at the day-to-day process necessary to keep your project on track, including how to work with a team, and how to avoid creative dead ends. Packed with examples, this book will change your

perception of game design. Create game mechanics to trigger a range of emotions and provide a variety of play
Explore several options for combining narrative with interactivity Build interactions that let multiplayer gamers get into each other's heads Motivate players through rewards that align with the rest of the game Establish a metaphor vocabulary to help players learn which design aspects are game mechanics Plan, test, and analyze your design through iteration rather than deciding everything up front Learn how your game's market positioning will affect your design

Light Sworn Jess Mountifield, 2021-12-02 An entire world enslaved Aella has known the dark elf ruling the elven homeland was free for some time, but she'd held hope that there were others who could fight and stand up to him. Now she knows that isn't true. With more than one portal open between the two worlds the elves and their allies are already stretched thin to defend them, but what if opening another could give them a chance to find some allies? Can Aella make a decision that she once thought was no one's to make? Will she risk everything to save everyone? Knowing that she grows stronger each day and everyone around her believes she will prevail isn't enough on its own. She might be Henera, but can she lead?
