The Non-Zombie Apocalypse Sechin Tower, 2014-06-15 The students of the Mechanical Science Institute-better known as the Mad Science Institute-are accustomed to being feared and misunderstood. The world simply isn't ready to know about their antimatter reactors, dangerous devices, or even their pet videogame-playing lizard-monster. Sophia Soap Lazarchek, one of the newest members of the Institute, is starting to realize that not all of life's problems can be solved with robots. At only sixteen, Soap has been shipped off to this special school for the college experience, which evidently includes eating cold pizza for breakfast, trying not to make a fool of herself on a date, and defending the world from doomsday machines. When an old enemy steals a prehistoric bioweapon capable of enslaving the planet, Soap and her classmates must put aside their differences and combine their unusual talents to unravel the conspiracy. If she is to prevent the approaching apocalypse, Soap will need to find the courage within herself to face down her own, personal nightmare before it infects everyone she's ever loved.

Detroit City Is the Place to Be Mark Binelli, 2013-11-05 Once America's capitalist dream town, Detroit is our country's greatest urban failure, having fallen the longest and the farthest. But the city's worst crisis yet (and that's saying something) has managed to do the unthinkable: turn the end of days into a laboratory for the future. Urban planners, land speculators, neo-pastoral agriculturalists, and utopian environmentalists--all have been drawn to Detroit's baroquely decaying, nothing-left-to-lose frontier. With an eye for both the darkly absurd and the radically new, Detroit-area native and Rolling Stone writer Mark Binelli has chronicled this convergence. Throughout the city's museum of neglect--its swaths of abandoned buildings, its miles of urban prairie--he tracks the signs of blight repurposed, from the school for pregnant teenagers to the killer ex-con turned street patroller,

from the organic farming on empty lots to GM's wager on the Volt electric car and the mayor's realignment plan (the most ambitious on record) to move residents of half-empty neighborhoods into a viable, new urban center. Sharp and impassioned, *Detroit City Is the Place to Be* is alive with the sense of possibility that comes when a city hits rock bottom. Beyond the usual portrait of crime, poverty, and ruin, we glimpse a future Detroit that is smaller, less segregated, greener, economically diverse, and better functioning--what might just be the first post-industrial city of our new century--

Public Private Partnerships Robert M. Clark, Simon Hakim, 2019-10-18 This book discusses Public-Private Partnerships (PPPs) and their potential to protect and maintain critical infrastructure in a variety of global governmental settings. Critical infrastructure is defined as essential services that underpin and support the backbone of a nation's economy, security, and health. These services include the power used by homes and businesses, drinking water, transportation, stores and shops, and communications. As governmental budgets dwindle, the maintenance of critical infrastructure and the delivery of its related services are often strained. PPPs have the potential to fill the void between government accounting and capital budgeting. This volume provides a survey of PPPs in critical infrastructure, combining theory and case studies to provide a comprehensive view of possible applications. Written by a diverse group of international experts, the chapters detail PPPs across industries such as transportation, social infrastructure, healthcare, emergency services, and water across municipalities from the US to New Zealand to Hong Kong. Chapters discuss objectives and legal requirements associated with PPPs, the potential advantages and limitations of PPPs, and provide guidance as to how to structure a successful PPP for infrastructure investment. This book is of interest to researchers studying public administration, public finance, and infrastructure as well as

practitioners and decision makers interested in instituting PPPs in their communities.

Icebergs, Zombies, and the Ultra-Thin Matthew

Soules, 2021-05-04 Soules's excellent book makes sense of the capitalist forces we all feel but cannot always name... Icebergs, Zombies, and the Ultra Thin arms architects and the general public with an essential understanding of how capitalism makes property. Required reading for those who think tomorrow can be different from today.— Jack Self, coeditor of *Real Estates: Life Without Debt* In *Icebergs, Zombies, and the Ultra Thin*, Matthew Soules issues an indictment of how finance capitalism dramatically alters not only architectural forms but also the very nature of our cities and societies. We rarely consider architecture to be an important factor in contemporary economic and political debates, yet sparsely occupied ultra-thin pencil towers develop in our cities, functioning as speculative wealth storage for the superrich, and cavernous iceberg homes extend architectural assets many stories below street level. Meanwhile, communities around the globe are blighted by zombie and ghost urbanism, marked by unoccupied neighborhoods and abandoned housing developments. Learn how the use of architecture as an investment tool has accelerated in recent years, heightening inequality and contributing to worldwide financial instability: • See how investment imperatives shape what and how we build, changing the very structure of our communities • Delve into high-profile projects, like the luxury apartments of architect Rafael Viñoly's 432 Park Avenue • Understand the convergence of technology, finance, and spirituality, which together are configuring the financialized walls within which we eat, sleep, and work Includes dozens of photos and drawings of architectural phenomena that have changed the way we live. Essential reading for anyone interested in architecture, design, economics, and understanding the way our world is formed.

In *The Holy Grain of Investing*, you'll discover: Where opportunities will arise as we transition from the 'free money' era of zero interest rates to a new more realistic environment. How to take advantage of the trillions flowing into private investments by owning a piece of the firms that manage the assets. How to take advantage of private credit as an alternative (or compliment) to bonds. How and why professional sports teams have become an asset class of their own. How the renewable energy revolution will create new winners and losers. How investments in private real estate can work as an inflationary hedge. Interviews, advice, and insights from some of the world's most formidable titans of industry, such as Howard Marks of OakTree Capital, Vinod Khosla of Khosla Capital, Barry Sternlicht of Starwood, Robert Smith of Vista, and Peter Theil of Founders Fund, among others. The market is changing, and the conventional wisdom no longer applies. Are you ready to add some fuel to your financial fire? Zombie Apocalypse Drac Von Stoller, 2023-11-16 The world once thrived with the pulse of life, but that was before the outbreak. It started inconspicuously, a whispered rumor about a strange illness, dismissed as a passing flu. But as the days wore on, whispers grew to panicked cries. It was a virus, relentless and merciless, turning the infected into mindless, flesh-craving monsters—zombies. The news broadcasts turned chaotic, urging people to stay indoors, to stock up on supplies, and to protect themselves at all costs. Every local and nationwide TV news station was overthrown by flesh-eating zombies. Cell phone towers were destroyed by the zombies thus disrupting cellphone service all over the whole United States of America. A country for the free and the brave turned upside down in the blink of an eye. The American people were running in the streets in a state of panic. Homes were destroyed by a fire that was set by the flesh-eating zombies. By now for some, the warnings came too late because the majority of Americans didn't have their TV sets turned on or radios, or had been sleeping or other distractions in everyday life we take for granted. Among them was Sarah, a young scientist working late in her lab when chaos broke loose. Sarah had always been a rational thinker and a problem-solver. As screams echoed through the halls and the stench of decay filled the air, she barricaded herself in a secure room, her heart pounding in her chest. Her mind raced—how had this happened?

Was there a cure?

Day of the Dog Mark Salvi, 2015-08-27 In the year 2020, racial tensions are on the rise throughout the United States. Protests and violence escalate throughout the country, and terrorists take advantage of the situation to launch a biological attack. Millions die—but even worse, the deadly disease known as canine flu afflicts the world’s dogs, turning people’s pets into horrifying zombie dogs. In a small North Georgia town, those who survive the initial attack set out on a dangerous trip to Savannah, hoping to make contact with friends and family who have started a survivors’ community. The US military and government struggle to regain control of the country from the USS Ronald Reagan, an aircraft carrier, stationed off the coast of South Carolina; from the Looking Glass Plane, a specially equipped Boeing 707 carrying vital military personnel; and US Strategic Command, or STRATCOM, in Omaha. Meanwhile, American society is in collapse; the power grid no longer functions, and nightly attacks from the zombie dogs mean all survivors are in constant danger. Even worse, the Looking Glass Plane goes down in Pennsylvania, leaving only a few people alive trying to rescue the nation from chaos. Only time will tell if they will succeed. In this novel, a terrorist attack brings about an apocalyptic landscape in which zombie dogs roam the night, changing survivors’ lives forever.
