**Reality Media** Jay David Bolter,Maria Engberg,Blair MacIntyre,2021-11-16 How augmented reality and virtual reality are taking their places in contemporary media culture alongside film and television. T This book positions augmented reality (AR) and virtual reality (VR) firmly in contemporary media culture. The authors view AR and VR not as the latest hyped technologies but as media—the latest in a series of what they term “reality media,” taking their places alongside film and television. Reality media inserts a layer of media between us and our perception

of the world; AR and VR do not replace reality but refashion a reality for us. Each reality medium mediates and remediates; each offers a new representation that we implicitly compare to our experience of the world in itself but also through other media. The authors show that as forms of reality media emerge, they not only chart a future path for media culture, but also redefine media past. With AR and VR in mind, then, we can recognize their precursors in eighteenth-century panoramas and the Broadway lights of the 1930s. A digital version of Reality Media, available through the book's website, invites readers to visit a series of virtual rooms featuring interactivity, 3-D models, videos, images, and texts that explore the themes of the book.

***Finding Truth in Fiction*** Karen E. Dill-Shackleford, Cynthia Vinney, 2020-02-06 In *Finding Truth in Fiction*, two media psychologists reveal that there's much more to our desire to seek out stories in film, TV, and books than simple diversion - fiction can help us find truth in our real lives. Whether you consider yourself a fan of popular media or whether you find yourself thinking of a particular fictional scene for inspiration, you are not alone. Though some assume that interest in a fictional world is a sign of psychological trouble, the authors enthusiastically disagree. Because story worlds are simulations of our social world, we use them to make sense of our experiences and even decide what kind of people we want to be. This makes fiction far from trivial. By exploring our relationship with fictional stories and characters, the authors will examine how we create mental models in our minds so we can understand stories and characters and how we differentiate between the identities of characters and the actors who play them. What story arcs, such as the hero's journey, are we drawn to again and again? How do the moments that strike us as important in a story change as we age and move through different stages in our life? Delving into these questions and many more, the authors conclude that being a fan is not just healthy, it's human.

***Bodies and Mobile Media*** Ingrid Richardson, Rowan Wilken, 2023-11-10 Have you ever considered how mobile media change what we see, hear and pay attention to, or how they alter our movement through the city? Over the last decade, mobile media and communication technologies have become deeply integral to our perception and bodily experience of the world. In *Bodies and Mobile Media*, Ingrid Richardson and Rowan Wilken explore mobile media as a lens through which to understand how embodiment both shapes, and is shaped by, media experience. It offers a unique approach by focusing on specific sensory affordances and body parts – including the eyes, ears, face, hands and feet – to consider the uneven ratios of sensory perception at work in our engagement with mobile devices. Each chapter provides rich and accessible narratives of mobile media practices interwoven with current scholarship in media studies and phenomenology, with a concluding chapter that reflects on mobile media use as a synesthetic experience. By interpreting theoretical insights about the relationship between the body and technology, the book serves as an important work of knowledge translation. This work is crucial, the authors argue, if we are to critically understand how our perception and experience of the world are mediated by technology. This book will be of interest to students and scholars in media, communication and cultural studies.

***Video Games and Spatiality in American Studies*** Dietmar Meinel, 2022-02-21 While video games have blossomed into the foremost expression of contemporary popular culture over the past decades, their critical study occupies a fringe position in American Studies. In its engagement with video games, this book contributes to their study but with a thematic focus on a particularly important subject matter in American Studies: spatiality. The volume explores the production, representation, and experience of places in video games from the perspective of American Studies. Contributions critically interrogate the use of spatial myths (wilderness, frontier, or city upon a hill), explore games as digital borderlands and contact zones, and offer novel approaches to geographical literacy. Eventually, *Playing the Field II* brings the rich theoretical repertoire of the study of space in American Studies into conversation with questions about the production, representation, and experience of space in video games.

***Watching You Sleep*** Kate N. Ryan, 2021 Abby, insomniac, and owner of a successful comic book store meets Jasper, a narcoleptic science fiction author. Can it possibly work? Abby's life turns upside down when she discovers Jasper Lee, a science fiction author, asleep in the superhero aisle. Suffering from the rare disorder narcolepsy, Jasper falls asleep unexpectedly and large surges of emotion can trigger a cataplectic attack – causing the loss of muscle tone and collapse. ***The Undead Truth of Us*** Britney S. Lewis, 2022-08-09 Death was everywhere. They all stared at me, bumping into one another and slowly coming forward. Sixteen-year-old Zharie Young is absolutely certain her mother morphed into a zombie before her untimely death, but she can't seem to figure out why. Why her mother died, why her aunt doesn't want her around, why all her dreams seem suddenly, hopelessly out of reach. And why, ever since that day, she's been seeing zombies everywhere. Then Bo moves into her apartment building—tall, skateboard in hand, freckles like stars, and an undeniable charm. Z wants nothing to do with him, but when he transforms into a half zombie right before her eyes, something feels different. He contradicts everything she thought she knew about monsters, and she can't help but wonder if getting to know him might unlock the answers to her mother's death. As Zharie sifts through what's real and what's magic, she discovers a new truth about the world: Love can literally change you—for good or for dead. In this surrealist journey of grief, fear, and hope, Britney S. Lewis's debut novel explores love, zombies, and everything in between in an intoxicating amalgam of the real and the fantastic.

***Film Marketing into the Twenty-First Century*** Nolwenn Mingant, Cecilia Tirtaine, Joël Augros, 2019-07-25 How do you

sell British humour to a French audience? Could piracy actually be good for the film business? Why are The Hobbit's revolutionary technologies not mentioned in some adverts? Exploring these questions and many more, Film Marketing into the Twenty-First Century draws on insights from renowned film academics and leading industry professionals to chart the evolution of modern film marketing. The first part of the book focuses on geographical considerations, showing how marketers have to adapt their strategies locally as films travel across borders. The second covers new marketing possibilities offered by the Internet, as Vine, Facebook and other participative websites open new venues for big distributors and independents alike. Straddling practical and theoretical concerns and including case studies that take us from Nollywood to Peru, this book provides an accessible introduction to the key issues at stake for film marketing in a global era.
