Perspectives and Trends in Education and Technology Anabela

Mesquita,António Abreu,João Vidal Carvalho,Cristina Helena Pinto de Mello,2023-01-02 This book presents high-quality, peer-reviewed papers from the International Conference in Information Technology & Education (ICITED 2022), to be held at the ESPM – Higher School of Advertising and Marketing, Rio de Janeiro, Brazil, between July 14 – 16, 2022. This book covers a specific field of knowledge. This intends to cover not only two fields of knowledge – Education and Technology – but also the interaction among them and the impact/result in the job market and organizations. It covers the research and pedagogic component of Education and Information Technologies and also the connection with Society, addressing the three pillars of higher education. This book addresses impact of pandemic on education and use of technology in education. Finally, it also encourages companies to present their professional cases which will be discussed. These can constitute real examples of how companies are overcoming their challenges with the uncertainty of the market.

Living Languages: An Integrated Approach to Teaching Foreign Languages in Secondary Schools Catherine Watts,Clare Forder,2013-06-17 Living Languages is simply bursting with practical and original ideas aimed at teachers and trainee teachers of foreign languages in secondary schools. Written by a team of experienced linguists, this book will inspire and motivate the foreign language classroom and the teachers who work within it. Living Languages comprises eight chapters and is structured around the integrated classroom,

merging language learning with different aspects of the wider curriculum such as multimedia, theatre and music, celebrations and festivals, sport, and alternative approaches to teaching languages. A DVD is also included with the book containing additional teaching materials and the associated films and audio recordings which make this a fully developed and effective teaching resource. Twenty-eight real-life case studies and projects are presented, all of which have been tried and tested in the classroom with many having won recent educational awards. Ideas and activities outlined in this unique resource include: Languages and multi-media projects involving different uses of technology such as film-making, Digital Storytelling and subtitling in different languages; Languages and theatre and music including the work of the Théâtre Sans Frontières with its Marie Curie Science Project; Motivating pupils to learn languages whilst keeping fit including examples from Score in French, The German Orienteering Festival and Handball in Spanish; Continuing Professional Development to inspire secondary language teachers to continue their individual professional development. The chapter contains concrete examples of others' experiences in this area and includes details of support organisations and practical opportunities. Each project is explored from the teachers' perspective with practical tips, lesson plans and reflections woven throughout the text such as what to budget, how to organise the pre-event period, how to evaluate the activity and whom to contact for further advice in each case. Activities and examples throughout are given in three languages – French, German and Spanish.

Constitution and Production of Mathematics in the Cyberspace Maria Aparecida Viggiani Bicudo, 2020-04-29 This book brings together various studies that assume phenomenology to analyze how mathematics education is affected by the experience of being in the cyberspace. The authors of the chapters included in this contributed volume work with the theoretical framework developed by authors such as Edmund Husserl, Martin Heidegger and Maurice Merleau-Ponty to investigate how mathematics is produced and comprehended in a new way of being in the world, with digital technologies. The aim of this book is not to explain the tools used and how one works with them in the cyberspace, aiming at better teaching and learning mathematics. Its purpose is to present philosophical investigations that contribute to the

understanding of the complexity of the world in which we are being researchers and mathematics teachers. By doing so, Constitution and Production of Mathematics in the Cyberspace – A Phenomenological Approach will help researchers and mathematics teachers understand their role in a world in which the experience of teaching and learning mathematics is being radically changed by new technologies and new ways of being in this world.

Future-proof CALL: language learning as exploration and encounters – short papers from EUROCALL 2018 Peppi Taalas, Juha Jalkanen, Linda Bradley, Sylvie Thouësny, 2018-12-08 The 26th EUROCALL conference was organised by the University of Jyväskylä (JYU) Language Campus and specifically the Language Centre. The theme of this year's conference was 'Future-proof CALL: language learning as exploration and encounters', which reflects an attempt to envision language teaching and learning futures in a changing world. What brought researchers together this year are shared concerns in relation to the sustainability of language learning and teaching in technology-rich contexts that are marked by ever-increasing complexity. The collection of short papers in this volume is a very thorough view into the conference proper exhibiting the complexity and novelty of the field of CALL. There are exciting new openings and a more profound exploration of theoretical underpinnings of the contemporary issues in teaching and learning, cross-cultural communication, mobile learning and the like.

Multimodal Composing in K-16 ESL and EFL Education Dong-shin Shin, Tony Cimasko, Youngjoo Yi, 2021-05-03 This book offers a comprehensive view of multimodal composing and literacies in multilingual contexts for ESL and EFL education in United States of America and globally. It illustrates the current state of multimodal composing and literacies, with an emphasis on English learners' language and literacy development. The book addresses issues concerning multilinguals' multimodal composing and reflects on what the nexus of multimodality, writing development, and multilingual education entails for future research. It provides research-driven and practice-oriented perspectives of multilinguals' multimodal composing, drawing on empirical data from classroom contexts to elucidate aspects of multimodal composing from a range of theoretical perspectives such as multiliteracies, systemic functional linguistics, and social semiotics. This book bridges the gap among theory, research, and practice in TESOL and applied linguistics. It serves as a useful resource for scholars and teacher educators in the areas of applied linguistics, second language studies, TESOL, and language education.

Intersections of Peace and Language Studies Erin A. Mikulec, Sai Bhatawadekar, Cuhullan Tsuyoshi McGivern, Paul Chamness Iida, 2022-01-01 Readings in Language Studies, Volume 7: Intersections of Peace and Language

Studies features international contributions that represent state-of-the-field reviews, multi-disciplinary perspectives, theory-driven syntheses of current scholarship, reports of new empirical research, reflections on pedagogical practices, and critical discussions of major topics centered on the intersection of language studies and peace. Consistent with the mission of ISLS, the collection of 13 chapters in this volume seeks to “bridge these arbitrary disciplinary territories and provide a forum for both theoretical and empirical research, from existing and emergent research methodologies, for exploring the relationships among language, power, discourses, and social practices.” Language and peace are in themselves incredibly complex concepts. They are simultaneously interpersonal in their function and effect as well as intimately personal in their experience. From everyday communication to the pragmatics of world diplomacy, from embracing a foreign culture to embarking upon a journey of self-awareness, language and peace are inseparably intertwined. To reveal their myriad interconnections, in local and global contexts, is a limitless task; nevertheless, we attempt to bring you a few glimpses from far corners of the world. It is also a linguistic and postcolonial mission of this society and the book series to publish the voices of non-native speakers of English. Decolonizing the academic enterprise is part of our commitment to diversity.

CALL communities and culture – short papers from EUROCALL 2016 Salomi Papadima-Sophocleous, Linda Bradley, Sylvie Thouësny, 2016-12-18 The 23rd EUROCALL conference was organised by the Cyprus University of Technology Language Centre. The theme of the conference was “CALL communities and Culture”. Between the 24th and 27th August 2016, over 135 presentations were delivered and 27 posters were presented; 84 of these presentations appear in this volume of selected peer-reviewed short papers.

Rethinking Social Studies and History Education Cameron White, 2016-07-01 The book is unique in that it mixes theory and practical applications in rethinking traditional social studies education. It focuses on essays integrating media, popular culture, and alternative texts for teaching and learning in social studies and history education through a social education lens. Social education integrates social studies, media / popular culture, and cultural studies all within a social justice framework. The text provides 20+ curriculum themes with strategies to connect in teaching and learning, along with resources to extend depth of understanding. In addition, the pedagogical philosophy inherent in the essays is student-centered learning focusing on issues, problem, and project-based instruction. Although the themes are generally social studies and history focused, the links to media and popular culture can be integrated in other disciplines.

The Digital Social Alpha Possamai-Inesedy, Alan Nixon, 2019-12-02 The edited volume aims to present a critical analysis of the current state of research on religion and belief systems in the realm of the ‘Digital Social’. The rapid expansion and democratization of digital technologies in conjunction with the significant shifts taking place within the practices of religion and belief through digital technology demand a critical examination across the social sciences and humanities. These changes call for an overview of not only our current methodological tool box but also the epistemological and ethical considerations that researchers must contend with. The proposed volume provides a critical framework that recognizes that the social, and therefore the religious, cannot be fully understood without recognizing how

the digital world actively constitutes notions such as identity, social networks, embodiment, and social institutions. While some specific methods will be discussed, the volume's emphasis remains on the critical epistemological and logistical considerations that are needed when undertaking this form of research.

Mobile-First Journalism Steve Hill, Paul Bradshaw, 2018-10-10 Media publishers produce news for a full range of smart devices – including smartphones, tablets and watches. Combining theory and practice, Mobile-First Journalism examines how audiences view, share and engage with journalism on internet-connected devices and through social media platforms. The book examines the interlinked relationship between mobile technology, social media and apps, covering the entire news production process – from generating ideas for visual multimedia news content, to skills in verification and newsgathering, and outputting interactive content on websites, apps and social media platforms. These skills are underpinned with a consideration of ethical and legal concerns involving fake news, online trolling and the economics of mobile journalism. Topics include: understanding how mobile devices, social media platforms and apps are interlinked; making journalistic content more engaging and interactive; advice on how successful news publishers have developed mobile and social media strategies; adopting an approach that is entrepreneurial and user-centered; expert interviews with journalists, academics and software developers; learning key skills to launch and develop news websites, apps and social media outputs. Mobile-First Journalism is essential reading for journalism students and media professionals and of interest to those studying on courses in social and new media.

ICTs and Innovation for Didactics of Social Sciences Delgado-Algarra, Emilio José, 2020-02-14 The advancement of technology in today's world has led to the progression of several professional fields. This includes the classroom, as teachers have begun using new technological strategies to increase student involvement and motivation. ICT innovation including virtual reality and blended learning methods has changed the scope of classroom environments across the globe; however, significant research is lacking in this area. ICTs and Innovation for Didactics of Social Sciences is a fundamental reference focused on didactics of social sciences and ICTs including issues related to innovation, resources, and strategies for teachers that can link to the transformation of social sciences teaching and learning as well as societal transformation. While highlighting topics such as blended learning, augmented reality, and virtual classrooms, this book is ideally designed for researchers, administrators, educators, practitioners, and students interested in understanding current relevant ICT resources and innovative strategies for the didactic of social sciences and didactic possibilities in relation to concrete conceptual contents, resolution of problems, planning, decision making, development of social skills, attention, and motivation promoting a necessary technological literacy.
