Överstigen gräns Bruno Netzell,2021-02-26 I samband med nedläggningen av det gamla regementet anordnar regementschefen en stor manöver. Den största manövern i regementets historia, för att minnas och hedra den tid som varit. Många soldater samlas i den lilla staden för att delta i övningarna, något som märks tydligt. Det förväntas bli lite gruff och bråk, men mot alla odds går någonting riktigt snett ... När två kroppar hittas i en av skyttegravarna tvingas de deltagande att syna sig själva och sina regementskamrater i sömmarna och göra allt de kan för att ta reda på vem den skyldige är. Bruno Netzell, född 1939, är en svensk författare som skriver deckare, thrillers och spänningsromaner. 2011 vann han Piratförlagets manustävling med sin bok Mobbing med motiveringen att den var spännande, underhållande och fångar läsarens intresse, egenskaper som även genomsyrar hans övriga böcker.

Spectroscopy of Crystals Containing Rare Earth Ions A.A. Kaplyanskii,R.M. McFarlane,2012-12-02 ``Spectroscopy of Crystals Containing Rare Earth Ions" contains chapters on some key problems selected from a broad range of spectroscopic studies of RE-activated solids including both crystalline and glassy materials. Progress in crystal field theory is surveyed, an area which is basic to our understanding of the energy levels. The treatment of dynamical properties includes studies of coherence phenomena in isolated ions, energy transfer between ions and co-operative phenomena associated with ion-ion and ion-lattice interactions. In addition, the role of electron spins and nuclear spins is studied by light scattering and double resonance techniques. The presence of inhomogeneous broadening of spectral lines is observed and studied in many contexts, leading to new insights into general problems of the disordered state. Considerable attention is devoted to describing new experimental techniques whose development is of prime importance for progress in the spectroscopy of RE-activated solids. Many of these rely on the development and application of tunable lasers. At the moment this is a very active field of spectroscopy with more exciting developments likely to occur in the future.

Whiteness Fractured Cynthia Levine-Rasky,2016-02-11 Whiteness Fractured examines the many ways in which whiteness is conceptualized today and how it is understood to operate and to effect social relationships. Exploring the intersections between whiteness, social class, ethnicity and psychosocial phenomena, this book is framed by the question of how whiteness works and what it does. With attention to central concepts and the history of whiteness, it explains the four ways in which whiteness works. In its examination of the outward and inward fractures of whiteness, the book sheds light on both its connections with social class and ethnicity and with the 'epistemology of ignorance' and the psychoanalytic. Representing the long career of whiteness on the one hand and investigating its expansion into new areas on the other, Whiteness Fractured reflects the growing maturity of critical whiteness studies. It undertakes a critical analysis of approaches to whiteness and proposes new directions for future action and enquiry. As such, it will appeal to scholars across the social sciences with interests in race and ethnicity, intersectionality, colonialism and post-colonialism, and cultural studies.
