The Origins of Iron Metallurgy in Africa Hamady Bocoum, 2004 The work of specialists archaeologists, historians, ethnologists, metallographs and sociologists gathered in this volume show the vitality of research being carried out on iron processing in Africa since as early as the third millennium B.C.

Food Safety Culture Frank Yiannas, 2008-12-10 Food safety awareness is at an all time high, new and emerging threats to the food supply are being recognized, and consumers are eating more and more meals prepared outside of the home. Accordingly, retail and foodservice establishments, as well as food producers at all levels of the food production chain, have a growing responsibility to ensure that proper food safety and sanitation practices are followed, thereby, safeguarding the health of their guests and customers. Achieving food safety success in this changing environment requires going beyond traditional training, testing, and inspectional approaches to managing risks. It requires a better understanding of organizational culture and the human dimensions of food safety. To improve the food safety performance of a retail or foodservice establishment, an organization with thousands of employees, or a local community, you must change the way people do things. You must change their behavior. In fact, simply put, food safety equals behavior. When viewed from these lenses, one of the most common contributing causes of food borne disease is unsafe behavior (such as improper hand washing, cross-contamination, or undercooking food). Thus, to improve food safety, we need to better integrate food science with behavioral science and use a systems-based approach to managing food safety risk. The importance of organizational culture, human behavior, and systems thinking is well documented in the occupational safety and health fields. However, significant contributions to the scientific literature on these topics are noticeably absent in the field of food safety.

Malaria Dyann Fergus Wirth, Pedro L. Alonso, 2017 Malaria is a mosquito-borne disease caused by parasitic protozoa that belong to the genus *Plasmodium*. This disease imposes a significant global health burden, claiming the lives of several thousand children and pregnant women each day. Increasing antimalarial drug resistance and the complexity of the *Plasmodium* life cycle, among other factors, have made eradication difficult. Written and edited by experts in the field, this collection from Cold Spring Harbor Perspectives in Medicine examines the biology, pathology, and epidemiology of malaria, as well as ongoing efforts to treat infections and manage their spread. Contributors discuss the *Plasmodium* life cycle, focusing on the molecular mechanisms by which the various parasitic stages induce clinical symptoms, interact with the immune system, and lead to further transmission of malaria. They also explore topics such as the interaction between mosquito reproduction and *Plasmodium* development, epigenetic regulation of malaria-associated genes, and unique features of malaria in pregnant women (e.g., parity-dependent susceptibility) and describe how an improved understanding of these phenomena may lead to novel intervention strategies. The driving forces behind antimalarial drug resistance are covered, as is progress in developing an effective vaccine and controlling mosquito populations. This volume is therefore an essential reference for all scientists, clinicians, and public health professionals interested in understanding malaria and reducing its devastating effects.

Picture-Book Professors Melissa M. Terras,2018-10-04 How is academia portrayed in children's literature? This Element ambitiously surveys fictional professors in texts marketed towards children. Professors are overwhelmingly white and male, tending to be elderly scientists who fall into three stereotypes: the vehicle to explain scientific facts, the baffled genius, and the evil madman. By the late twentieth century, the stereotype of the male, mad, muddlehead, called Professor SomethingDumb, is formed in humorous yet pejorative fashion. This Element provides a publishing history of the role of academics in children's literature, questioning the book culture which promotes the enforcement of stereotypes regarding intellectual expertise in children's media. The Element is also available, with additional material, as Open Access.

The Indigenous World 2016 Caecilie Mikkelsen,Diana Vinding,2016-04-30 In over sixty articles and country reports, The Indigenous World 2016 provides a comprehensive update on the current situation of indigenous peoples' causes, their human rights, and reports on the most important developments in international processes of relevance to indigenous peoples during 2015. It is an indispensable guide to issues and developments that have impacted indigenous peoples worldwide. Indigenous and non-indigenous scholars and activists write the articles contained in The Indigenous World. It is edited and produced by the International Work Group for Indigenous Affairs.

Pollutants and Water Management Pardeep Singh,Rishikesh Singh,Vipin Kumar Singh,Rahul Bhadouria,2021-04-12 POLLUTANTS AND WATER MANAGEMENT Pollutants and Water Management: Resources, Strategies and Scarcity delivers a balanced and comprehensive look at recent trends in the management of polluted water resources. Covering the latest practical and theoretical aspects of polluted water management, the distinguished academics and authors emphasize indigenous practices of water resource management, the scarcity of clean water, and the future of the water system in the context of an increasing urbanization and globalization. The book details the management of contaminated water sites, including heavy metal contaminations in surface and subsurface water sources. It details a variety of industrial activities that typically pollute water, such as those involving crude oils and dyes. In its discussion of recent trends in abatement strategies, Pollutants and Water Management includes an exploration of the application of microorganisms, like bacteria, actinomycetes, fungi, and cyanobacteria, for the management of environmental contaminants. Readers will also discover a wide variety of other topics on the conservation of water sources including: The role of

government and the public in the management of water resource pollution The causes of river system pollution and potential future scenarios in the abatement of river pollution Microbial degradation of organic pollutants in various water bodies The advancement in membrane technology used in water treatment processes Lead contamination in groundwater and recent trends in abatement strategies for it Highly polluting industries and their effects on surrounding water resources Perfect for graduate and postgraduate students and researchers whose focus is on recent trends in abatement strategies for pollutants and the application of microorganisms for the management of environmental contaminants, Pollutants and Water Management: Resources, Strategies and Scarcity also has a place in the libraries of environmentalists whose work involves the management and conservation of polluted sites.

Water Challenges of an Urbanizing World Matjaž Glavan,2018-03-21 Global water crisis is a challenge to the security, political stability and environmental sustainability of developing nations and with climate, economically and politically, induces migrations also for the developed ones. Currently, the urban population is 54% with prospects that by the end of 2050 and 2100 66% and 80%, respectively, of the world's population will live in urban environment. Untreated water abstracted from polluted resources and destructed ecosystems as well as discharge of untreated waste water is the cause of health problems and death for millions around the globe. Competition for water is wide among agriculture, industry, power companies and recreational tourism as well as nature habitats. Climate changes are a major threat to the water resources. This book intends to provide the reader with a comprehensive overview of the current state of the art in integrated assessment of water resource management in the urbanizing world, which is a foundation to develop society with secure water availability, food market stability and ecosystem preservation.

African Elephant Status Report 2002 J. J. Blanc,2003 The African elephant is the largest living land mammal, and their potential impact on their habitats raises important management issues both for protected areas and unprotected land. This Status Report, derived from data contained in the African Elephant Database, is rich in data and information on numbers, distribution and current issues, and provides continent-wide information that is vital for conservation. It will help wildlife management authorities to harmonize their policy and management decisions across regions, as well as the continent, to reduce conflict and relax the pressure on habitats.

Chemical and Technological Characterization of Dairy Products Michele Faccia,2021 Milk processing is one of the most ancient food technologies, dating back to around 6000 B.C. A huge number of milk products have been developed worldwide, representing a spectacular example of biodiversity and a priceless cultural heritage. After millennia of unanimous appreciation as a pillar of human nutrition, a series of questions about the desirability of their wide consumption have been raised. In the light of the growing threat deriving mostly from the spread of veganism and health consciousness, improving milk processing safety and dairy nutritional characteristics, as well as deepening their functional characteristics, are of a primary exigency. This Special Issue contains several articles focusing on this hot topic, all of which add knowledge to the field and supply interesting ideas

for developing new products and processes.

Building a Future on Peace and Justice Kai Ambos, Judith Large, Marieke Wierda, 2008-12-04 Results of the 2007 Nuremberg Conference on Peace and Justice: Tensions between peace and justice have long been debated by scholars, practitioners and agencies including the United Nations, and both theory and policy must be refined for very practical application in situations emerging from violent conflict or political repression. Specific contexts demand concrete decisions and approaches aimed at redress of grievance and creation of conditions of social justice for a non-violent future. There has been definitive progress in a world in which blanket amnesties were granted at times with little hesitation. There is a growing understanding that accountability has pragmatic as well as principled arguments in its favour. Practical arguments as much as shifts in the norms have created a situation in which the choice is increasingly seen as which forms of accountability rather than a stark choice between peace and justice. It is socio-political transformation, not just an end to violence, that is needed to build sustainable peace. This book addresses these dilemmas through a thorough overview of the current state of legal obligations; discussion of the need for a holistic approach including development; analysis of the implications of the coming into force of the ICC; and a series of hard case studies on internationalized and local approaches devised to navigate the tensions between peace and justice.
