a degree of ingenuity, in order to produce the best product. Few unique articles e.g., chain failure modes, lubrication of chain drive, timing belt pulleys, rope lay selection, wire rope manufacturing methods, effect of sheave size etc., are included. Friction materials are discussed in detail for both wet and dry running with the relevant charts used in industry. Design of journal bearing is dealt exhaustively. Salient Features: Compatible with the Machine Design Data Book (same author and publisher). Thorough treatment of the requisite engineering mechanics topics. Balance between analysis and design. Emphasis on the materials, properties and analysis of the machine element. Material, factor of safety and manufacturing method are given for each machine element. Design steps are given for all important machine elements. The example design problems and solution techniques are spelled out in detail. Objective type, short answer and review problems are given at the end of each chapter. All the illustrations are done with the help of suitable diagrams. As per Indian Standards.
