The Digital Mind Kristian Bankov, 2022-02-23 This book reveals the core features of digital culture, examined by means of semiotic models and theories. It positions commercial and market principles in the center of the digital semiosphere, avoiding the need to force the new cultural reality into the established textualist or pragmatist paradigms. The theoretic insights and case studies presented here argue for new semiotic models of inquiry that include working with big data, user experience and nethnography, along with conventional approaches. The book develops a new concept of identity in the digital age, analyzing the digital flows of recognition and value, which led to the tremendous success of Social Media and the Web 2.0 era. Self-expression, entertainment and consumerism are seen as the major drivers of identity formation in the post-truth era, where the self can no longer be considered independently of a given person's communication devices, where a substantial part of it is stored and actualized. It will be of interest to semioticians and researchers working on digital culture.

Wired TV Denise Mann, 2014-02-11 This collection looks at the post-network television industry's heady experiments with new forms of interactive storytelling—or wired TV—that took place from 2005 to 2010 as the networks responded to the introduction of broadband into the majority of homes and the proliferation of popular, participatory Web 2.0 companies like Facebook, YouTube, and Twitter. Contributors address a wide range of issues, from the networks' sporadic efforts to engage fans using transmedia storytelling to the production inefficiencies that continue to dog network television to the impact of multimedia convergence and multinational, corporate conglomeration on entrepreneurial creativity. With essays from such top scholars as Henry Jenkins, John T. Caldwell, and Jonathan Gray and from new and exciting voices emerging in this field, *Wired TV* elucidates the myriad new digital threats and the equal number of digital opportunities that have become part and parcel of today's post-network era. Readers will quickly recognize the familiar television franchises on which the contributors focus—including *Lost*, *The Office*, *Entourage*, *Battlestar Gallactica*, *The L Word*, and *Heroes*—in order to reveal their impact on an industry in transition. While it is not easy for vast bureaucracies to change course, executives from key network divisions engaged in an unprecedented period of innovation and collaboration with four important groups: members of the Hollywood creative community who wanted to expand television's storytelling worlds and marketing capabilities by incorporating social media; members of the Silicon Valley tech community who were keen to rethink television distribution for the digital era; members of the Madison Avenue advertising community who were eager to rethink ad-supported content; and fans who were enthusiastic and willing to use social media story extensions to proselytize on behalf of a favorite network series. In the aftermath of the lengthy Writers Guild of America strike of 2007/2008, the networks clamped down on such collaborations and began to reclaim control over their operations, locking themselves back into an aging system of interconnected bureaucracies, entrenched hierarchies, and traditional partners from the past. What's next for the future of the television industry? Stay tuned—or at least online. Contributors: Vincent Brook, Will Brooker, John T. Caldwell, M. J. Clarke, Jonathan Gray, Henry Jenkins, Derek Johnson, Robert V. Kozinets, Denise Mann, Katynka Z. Martínez, and Julie Levin Russo

Avalanche of Leads Dr. Elaine Williams-Morgan, 2023-09-27 In this informative book, Dr. Elaine Williams-Morgan explores social media, one of the greatest innovations of our time, chronicling its development from the early beginnings to the current time when there are over two hundred social networking platforms. The book highlights the disruptive character of social media and its commonalities with other disruptive technologies. The disruption is being experienced across a range of industries, including music, advertising, and the traditional media, as journalists, educators, and businesses take advantage of the critical mass that this innovation delivers. It outlines the avalanche of social media platforms available to users, led by Facebook, YouTube, and WhatsApp, and provides a roadmap for the development of an appropriate social media policy and strategy for navigating the digital era. The power inherent in the adoption of social networking tools to reduce marketing and promotional costs, facilitate efficiency and effectiveness in communication, and drive collaboration and innovation is underscored. These trends predict an increase in the number of social networking platforms and a broadening of the scope of these platforms. There is also an indication that as Internet access expands globally, a higher percentage of the global population will go online using their mobile devices and, specifically, for social networking. These developments, *Avalanche of Leads* emphasizes, make it imperative for individuals and businesses alike to take the steps necessary to develop a winning social media strategy that employs tools that have become important for life and business. A failure in this regard could mean being left out of the social media ecosystem, an environment rich with opportunities to thrive!

Super Awesome Action Heroes Trae Dorn, 2020-01-23 There are some rules in life: What goes up must come down, a penny saved is a penny earned, and most importantly - the main character in an action film can do just about anything if the FX budget is high enough. Super Awesome Action Heroes (SAAH) is a table top Role Playing Game System designed to emulate Action Films and the cinematic experience. SAAH requires, by rules, for players to describe what they're doing in detail, and forces even the most dedicated power-gamer... to actually Role Play most of the time.
