Actions Speak Louder Than Words Celia Oyler,2012-03-22 How do educators engage students in community action projects without telling them what to think, how to think, or what to do? Is it possible to integrate social justice organizing into the curriculum without imposing one's political views on students? In Actions Speak Louder than Words, longtime activist and teacher educator Celia Oyler delves into such questions through firsthand accounts of social action projects. By moving beyond charity work or volunteerism, she shows how community activism projects offer fertile ground for practicing democratic engagement as part of classroom work. Actions Speak Louder than Words is a systematic, qualitative study offering in-depth and detailed portraits of teachers who design social action projects as part of the regular classroom curriculum. Each case forms a chapter organized as a narrative that includes excerpts from classroom dialogues, and interviews with students, teachers, and parents describing their social action projects with sufficient detail to give educators guidance for designing such projects for their own classrooms. The final chapter examines power, pedagogy, and learning outcomes across the cases, providing specific guidance to educators wishing to take up such projects and offering instructional and procedural advice as well as cautions. A fresh new example of taking up the challenge to teach toward equity and social justice, Actions Speak Louder than Words is an invaluable resource for educators who are passionate about the possibility of integrating activism and advocacy into curriculum as a means to engage in strong democracy.

Fighting Words Marc W. Steinberg, 2018-05-31 A key component of social life, discourse mediates the processes of class formation and social conflict. Drawing on dialogic theory and building on the work of E. P. Thompson, Marc W. Steinberg argues for the importance of incorporating discursive analysis into the historical reconstruction of class experience. Amending models of collective action, he offers new insights on how discourse shapes the dynamics of popular protest. To support his thesis, he presents studies of two English trade groups in the 1820s: cotton spinners from Lancashire factory towns and London silk weavers. For each case, Steinberg closely examines the labor process, industrial organization, social life, community politics, discursive struggles, and collective actions. By describing how workers shared experiences of exploitation and oppression in their daily lives, he shows how discourses of contention were products of struggle and how they framed possibilities for collective action. Embracing work in literary theory, sociocultural psychology, and cultural studies, *Fighting Words* claims a middle ground between postmodern and materialist analyses.
