Flash 8: The Missing Manual E. A. Vander Veer, 2006-03-22 Macromedia's Flash 8 is the world's premier program for adding animation to websites. And with the latest version, this popular program becomes more versatile, letting beginning webmasters and expert developers alike create sophisticated web content. But Flash isn't intuitive. And it doesn't come with a manual. Whether you want to learn the basics or unleash the program's true power, Flash 8: The Missing Manual is the ideal instructor. This hands-on guide to today's hottest web design tool is aimed at nondevelopers, and it teaches you how to translate your ideas into great web content. It begins with a solid primer on animation, which helps you get comfortable with the Flash interface. Once you have these basics under your belt, Flash 8: The Missing Manual moves on to advanced animations, including adding special effects and audio, video, and interactivity to your presentations. When you're really feeling steady, the book shows how to use a dollop of ActionScript to customize your content. It then teaches you how to publish your Flash creations for web surfers everywhere to enjoy. Along the way, the book shows you good design principles and helps you avoid elements that can distract or annoy an audience. Author Emily Vander Veer has more than a dozen books to her credit, including titles on web design and scripting--most written

for non-technical readers. Her background makes her the perfect author for a straightforward book on a complex subject. She takes Flash 8: The Missing Manual from the basics to the advanced, yet avoids a hasty jump into tough topics that can leave readers confused. Not only will Flash 8: The Missing Manual help you turn a concept into unique, dynamic content, but it will continue to serve as a reference as you develop your website.

Africa Development Indicators 2010 World Bank, 2010-04-27 Reliable quantitative data are essential for understanding economic, social and governance development because it provides evidence, and evidence are crucial to set policies, monitor progress and evaluate results. 'Africa Development Indicators 2010' (ADI) provides the most detailed collection of data on Africa available. It puts together data from different sources, and is an essential tool for policy makers, researchers, and other people interested in Africa. The opening articles of the 'ADI 2010' print edition focus on behaviors that are difficult to observe and quantify, but whose impact on service delivery and regulation has adverse long-term effects on households. The term 'quiet corruption' is introduced to indicate various types of malpractice of frontline providers (teachers, doctors, and other government officials at the front lines of service provision) that do not involve monetary exchange. The prevalence of quiet corruption and its long-term consequences might be even more harmful for developing countries, and for the poor in particular who are more exposed to adverse shocks

to their income and are more reliant on government services to satisfy their most basic needs.

Engaging the Public to Fight the Consequences of Terrorism and Disasters I. Apostol, J.

Mamasakhlisi, D. Subotta, 2015-05-07 Governments must work tirelessly to update their preparedness for dealing with natural and man-made disasters, as well as taking account of the increasingly present threat of terrorism. Efficient international cooperation is key to achieving safety and internationalizing security policy. This book presents the proceedings of the NATO Advanced Research Workshop (ARW) Engaging the Public to Fight the Consequences of Terrorism and Disasters, held in Tbilisi, Georgia, in June 2014. The purpose of the workshop was to analyze accumulated European theoretical knowledge and practical experience in the field of disaster prevention and the involvement of the public in preventing and fighting the consequences of terrorism, as well as natural and man-made disasters. There was a particular focus on the perspective of the region, especially with a view to meeting European Union standards and setting uniform and independent standards for hazard and risk assessment methods. The protection of economically critical infrastructure, such as dams, pipelines and transport and storage facilities, was addressed as were the issues of managing water and non-renewable resources, the disposal of dangerous chemicals and radioactive waste, and defensible methods of transport for fuel supplies and key personnel. Contributions

reflected the extensive experience of the participating NATO and partner countries, including Armenia, Austria, Bulgaria, Georgia, Germany, Italy, Moldova, the Netherlands, Romania, Turkey and Ukraine as well as international organizations such as UNECE and NATO.
