Targeted Antigen Delivery: Bridging Innate and Adaptive Immunity Bénédicte Manoury, Piergiuseppe De Berardinis, 2019-05-15 The most efficient way to mount a sustained immune response is to target antigens to antigen presenting cells that trigger both innate and adaptive immune responses. A comprehensive view of the current approaches to the design of new antigenic formulations will enhance our understanding and perspective of targeted immunotherapy. The aim of this Research Topic is to provide an overview of the currently adopted targeting strategies by a collection of articles on: 1. Novel approaches of antigen targeting for immunotherapeutic strategies against cancer and/or infectious diseases. 2. Diversity and biology of dendritic cell subsets in human and mouse. 3. Combined strategies for the delivery of antigens and adjuvant molecules that stimulate innate immune responses and their influence on the quality of immune responses. 4. Impact of the receptor mediated intracellular trafficking on antigen presentation.

Micro- and Nanotechnology in Vaccine Development Mariusz Skwarczynski, Istvan Toth, 2016-09-20 This book provides a comprehensive overview of how use of micro- and

nanotechnology (MNT) has allowed major new advance in vaccine development research, and the challenges that immunologists face in making further progress. MNT allows the creation of particles that exploit the inherent ability of the human immune system to recognize small particles such as viruses and toxins. In combination with minimal protective epitope design, this permits the creation of immunogenic particles that stimulate a response against the targeted pathogen. The finely tuned response of the human immune system to small particles makes it unsurprising that many of the lead adjuvants and vaccine delivery systems currently under investigation are based on nanoparticles.

Provides a comprehensive and unparalleled overview of the role of micro- and nanotechnology in vaccine development Allows researchers to quickly familiarize themselves with the broad spectrum of vaccines and how micro- and nanotechnologies are applied to their development Includes a combination of overview chapters setting out general principles, and focused content dealing with specific vaccines, making it useful to readers from a variety of disciplines

Narcissistic Narrative Linda Hutcheon, 2010-01-01 Linda Hutcheon, in this original study, examines the modes, forms and techniques of narcissistic fiction, that is, fiction which includes within itself some sort of commentary on its own narrative and/or linguistic nature. Her analysis is further extended to discuss the implications of such a development for both the theory of the novel and reading theory. Having placed this phenomenon in its historical context Linda Hutcheon uses the insights of various reader-response theories to explore the "paradox" created by metafiction: the reader is, at the same time, co-creator of the self-reflexive text and distanced from it because of its very self-

reflexiveness. She illustrates her analysis through the works of novelists such as Fowles, Barth, Nabokov, Calvino, Borges, Carpentier, and Aquin. For the paperback edition of this important book a preface has been added which examines developments since first publication. *Narcissistic Narrative* was selected by Choice as one of the outstanding academic books for 1981-1982.

Royal Airs Sharon Shinn,2013-11-05 Master storyteller Sharon Shinn created the thrilling and enchanting world of Welce in her acclaimed novel *Troubled Waters*. Return with her to that elemental universe in this tale of secrecy, romance, and a battle for power... Josetta is a princess of one of the Five Families. But she is far from the throne, so she is free to spend her days working in the poorest sections of the city. Rafe Adova lives the life of a career gambler in those slums. He has no real ambition—until the night he helps a girl named Corene, who looks like she's stumbled into the wrong bar. Josetta is fascinated by the man who has helped her sister. Rafe is unlike anyone she's encountered—someone seemingly devoid of elemental blessings. Rafe is also drawn to Josetta, but when he is assaulted by foreign mercenaries and they discover the reason behind the attack, Rafe

and Josetta realize that the truth could endanger not only their newfound love, but also their very lives...
