Sasanian Seals and Sealings in the A. Saeedi Collection Rika Gyselen, 2007 Most of the Sasanian seals published in this catalogue have been in the Saeedi family collection for several decades. The collection, however, has continued to grow since this publication was conceived, with more seals being added to it as the opportunity arose. The 131 seals included here are only a small part of the collection, and the sample applies to the clay sealings covered in this work. Where more than one sealing bears the same impression, we have contented ourselves with reproducing one well-preserved specimen, or, where necessary, two less well-preserved ones. This work, therefore, does not include all the sealings cited in my previous work on administrative seals. A concordance between those cited in that work and those published here is instead provided. Comprising as it does some 463 clay sealings, at least half of which bear the seals of administrative bodies or high-ranking dignitaries, this collection is the richest ever to have been published.

Biological Control of Insect and Mite Pests in Iran Javad Karimi, Hossein Madadi, 2021-04-28 The book provides a reference to biological control of arthropod pests in agriculture and of public health importance in Iran. A quick glance over the literature shows a long history of biocontrol attempts in the country. Some historically important events highlighting the interest of Iranian academic, research and extension fields to the natural enemies and their applied aspects are provided. Iran, with an exception of the former USSR, was a pioneer in both basic and applied biocontrol in West Asia. The book consists of four parts: three parts for predators, parasitoids and pathogens, and last part for other approaches and analyses of the current state of biological control in Iran. The

book provides the most up-to-date information on pest control and related topics of entomology in Iran. The chapters are written by scholars from major Universities and research centers in Iran.

Procopius of Caesarea: The Persian Wars Geoffrey Greatrex, 2022-10-31 Procopius was the major historian of the reign of Justinian and one of the most important historians of Late Antiquity. This is the first extensive commentary on his Persian Wars since the nineteenth century. The work is among the most varied of the author, incorporating the history and geography not only of Mesopotamia and the Caucasus, but also of southern Arabia and Ethiopia, Iran and Central Asia, and Constantinople itself. Each major section is introduced by a section on the history of the events concerned and on the treatment of these events by Procopius and other sources. The volume is equipped with an introduction, three appendices, and numerous maps and plans. All sections of the work that are commented on are translated. The book will therefore be of use to specialists and the general reader alike. A complete translation of the work, with lighter annotation, is being published separately.

The Sasanian Era Vesta Sarkhosh Curtis, Sarah Stewart, 2010-07-20 This latest volume in The Idea of Iran series concentrates on the Sasanian period. Seizing power from the previous dynasty - the Parthians - the Sasanians ruled Iran and most of the ancient Near East from 224 until 642 CE. They are particularly fascinating because of their

adherence to Zoroastrianism, an ancient dualistic Iranian religion named after the prophet Zarathustra (or, in Greek, Zoroaster). The Sasanians expressed the divine aspect of their rule in a variety of forms, such as on coins, rock reliefs and silver plates, and architecture and the arts flourished under their aegis. Sasanian military success brought them into conflict with Rome, and later Byzantium. Their empire eventually collapsed under the force of the Arab army in AD 642, when Zoroastrianism was replaced with Islam. Engaging with all the major aspects of Sasanian culture, twelve eminent scholars address subjects which include: early Sasanian art and iconography; early Sasanian coinage; religion and identity in the Sasanian empire; later Sasanian orality and literacy; and state and society in late antique Iran. The volume in question arguably comprises the most complete and comprehensive treatment of the Sasanian civilization yet to be published in English.

ReOrienting the Sasanians Khodadad Rezakhani, 2017-03-15 A narrative history of Central Asia after the Greek dynasties and before Islam Central Asia is commonly imagined as the marginal land on the periphery of Chinese and Middle Eastern civilisations. At best, it is understood as a series of disconnected areas that served as stop-overs along the Silk Road. However, in the mediaeval period, this region rose to prominence and importance as one of the centres of Persian-Islamic culture, from the Seljuks to the Mongols and Timur. Khodadad Rezakhani tells the back story of this rise to prominence, the story of the famed Kushans and mysterious Asian Huns, and their role in shaping both the Sasanian Empire and the rest of the Middle East. Contextualises Persian history in relation to the history of Central Asia Extends the concept of late antiquity further east than is usually done Surveys the history of Iran and Central Asia between 200 and 800 bc and

contextualises the rise of Islam in both regions "e;

Ancient Taxation Jonathan Valk,Irene Soto Marín,2021-08-24 The studies collected in *Ancient Taxation* explore the extractive systems of eleven ancient states and societies from across the ancient world, ranging from Bronze Age China to Anglo-Saxon Britain. Together, the contributors explore the challenges of taxation in predominantly agro-pastoral societies, including basic tax strategy (taxing goods vs. labor, in kind vs. money taxes, direct vs. indirect, internal vs. external, etc.), assessment and collection (particularly over wide geographic areas or at large scale, e.g., by tax farming), compliance, and negotiating the cooperation of social, economic, and political elites or other critical social groups. By assembling such a broad range of studies, the book sheds new light on the commonalities and differences between ancient taxation systems, highlighting how studying taxes can shed light on the fiscal and institutional practices of antiquity. It also provides new impetus for comparative research, both between ancient societies and between ancient and modern extractive practices. This book will be of interest to those studying ancient history, economic history, the history of taxation, or comparative politics and economics--

The Oxford Handbook of Late Antiquity Scott Fitzgerald Johnson,2015-11 Late antiquity extends from the accession of the Christian emperor Constantine to the rise of

Persia Jeffrey Spier, Timothy Potts, Sara E. Cole, 2022-05-17 A fascinating study of Persia's interactions and exchanges of influence with ancient Greece and the Roman Empire. The founding of the first Persian Empire by the Achaemenid king Cyrus the Great in the sixth century BCE established one of the greatest world powers of antiquity. Extending from the borders of Greece to northern India, Persia was seen by the Greeks as a vastly wealthy and powerful rival and often as an existential threat. When the Macedonian king Alexander the Great finally conquered the Achaemenid Empire in 330 BCE, Greek culture spread throughout the Near East, but local dynasties—first the Parthian (247 BCE-224 CE) and then the Sasanian (224-651 CE)—reestablished themselves. The rise of the Roman Empire as a world power quickly brought it, too, into conflict with Persia, despite the common trade that flowed through their territories. Persia addresses the political, intellectual, religious, and artistic relations between Persia, Greece, and Rome from the seventh century BCE to the Arab conquest of 651 CE. Essays

by international scholars trace interactions and exchanges of influence. With more than three hundred images, this richly illustrated volume features sculpture, jewelry, silver luxury vessels, coins, gems, and inscriptions that reflect the Persian ideology of empire and its impact throughout Persia's own diverse lands and the Greek and Roman spheres. This volume is published to accompany a major international exhibition presented at the Getty Villa from April 6 to August 8, 2022.

Nine papers deal with the Khotanese and Tumshuquese language, one of Emmerick's main fields of research. The volume is accompanied by an updated Bibliography and Indices of quotations and of words.

Nomadism in Iran D. T. Potts, 2014-03-03 The classic images of Iranian nomads in circulation today and in years past suggest that Western awareness of nomadism is a phenomenon of considerable antiquity. Though nomadism has certainly been a key feature of Iranian history, it has not been in the way most modern archaeologists have envisaged it. Nomadism in Iran recasts our understanding of this timeless tradition. Far from constituting a natural adaptation on the Iranian Plateau, nomadism is a comparatively late introduction, which can only be understood within the context of certain political circumstances. Since the early Holocene, most, if not all, agricultural communities in Iran had kept herds of sheep and goat, but the communities themselves were sedentary: only a few of their members were required to move with the herds seasonally. Though the arrival of Iranian speaking groups, attested in written sources beginning in the time of Herodotus, began to change the demography of the plateau, it wasn't until later in the eleventh century that an influx of Turkic speaking Oghuz nomadic groups—true nomads of the steppe—began the modification of the demography of the Iranian Plateau that accelerated with the Mongol conquest. The massive, unprecedented violence of this invasion effected the widespread distribution of largely Turkic-speaking nomadic groups across Iran. Thus, what has been interpreted in the past as an enduring pattern of nomadic land use is, by archaeological standards, very recent. Iran's demographic profile since the eleventh century AD, and more particularly in the nineteenth and twentieth century, has been used by some scholars as a proxy for ancient social organization. Nomadism in Iran argues that this modernist perspective distorts the historical reality of the land. Assembling a wealth of material in several languages and disciplines, *Nomadism*

in Iran will be invaluable to archaeologists, anthropologists, and historians of the Middle East and Central Asia.

Studies on the Formation of Christian Armenia Nina G. Garsoïan, 2023-05-31 This is the third collection of articles by Nina Garsoïan on Early Armenian history and civilization. A number of articles included here continue earlier investigations of Iranian and Byzantine political and, especially, doctrinal and social influences on Medieval Armenia, precariously wedged between the two super-powers of the period, Byzantium and Sasanian Persia. A second theme is the development of the autocephalous Armenian Church as it freed itself from foreign pressures and achieved its own dogmatic position. Last, several studies consider some inadequacies in some recent historiography and suggest a more promising redirection in our approach to Armenian history and the formation of its national identity.

Arsāma and His World: the Bodleian Letters in Context Christopher J. Tuplin, John Ma, 2021-01-29 During the Second World War the Bodleian Library in Oxford acquired a set of Aramaic letters, eight sealings, and the two leather bags in which the sealed letters were once stored. The letters concern the affairs of Arsāma, satrap of Egypt in the later fifth century. Taken with other material associated with him (mostly in Aramaic, Demotic Egyptian, and Akkadian), they illuminate the Achaemenid world of which Arsāma was a privileged member and evoke a wide range of social, economic, cultural, organizational, and political perspectives, from multi-lingual communication, storage and disbursement of resources, and satrapal remuneration, to cross-regional ethnic movement, long-distance travel, religious practice, and iconographic projection of

ideological messages. Particular highlights include a travel authorization (the only example of something implicit in numerous Persepolis documents), texts about the religious life of the Judaeian garrison at Elephantine, Arsāma's magnificent seal (a masterpiece of Achaemenid glyptic, inherited from a son of Darius I), and echoes of temporary disturbances to Persian management of Egypt. But what is also impressive is the underlying sense of systematic coherence founded on and expressed in the use of formal, even formalized, written communication as a means of control. The Arsāma dossier is not alone in evoking that sense, but its size, variety, and focus upon a single individual give it a unique quality. Though this material has not been hidden from view, it has been insufficiently explored: it is the purpose of the three volumes of *Arsāma and his World: The Bodleian Letters in Context* to provide the fullest presentation and historical contextualization of this extraordinary cache yet attempted. Volume I presents and translates the letters alongside a detailed line-by-line commentary, while Volume II reconstructs the two seals that made the clay bullae that sealed the letters, with special attention to Arsāma's magnificent heirloom seal. Volume III comprises a series of thematic essays which further explore the administrative, economic, military, ideological, religious, and artistic environment to which Arsāma and the letters belonged.

Money, Power and Politics in Early Islamic Syria John Haldon, 2016-04-22 The transformation of the eastern provinces of the Roman empire from the middle of the seventh century CE under the impact of Islam has attracted a good deal of scholarly attention in recent years, and as more archaeological material becomes available, has been subject to revision and rethinking in ways that radically affect what we know or

understand about the area, about state-building and the economy and society of the early Islamic world, and about issues such as urbanisation, town-country relations, the ways in which a different religious culture impacted on the built environment, and about politics. This volume represents the fruits of a workshop held at Princeton University in May 2007 to discuss the ways in which recent work has affected our understanding of the nature of economic and exchange activity in particular, and the broader implications of these advances for the history of the region.

The Last Great War of Antiquity James Howard-Johnston, 2021 The last great war of antiquity was fought on an unprecedented scale along the full length of the Persian-Roman frontier. James Howard-Johnston pieces together the fragmentary evidence of this period to form, for the first time, a coherent story of the dramatic events, key players, and vast lands over which the conflict spread.

Historiography and Space in Late Antiquity Peter Van Nuffelen, 2019-08-29 The later Roman Empire was shrinking on the map, but still shaped the way historians represented the space around them.
