Colouring Meaning Gill Philip, 2011-02-23 Primarily focused on idioms and other figurative phraseology, *Colouring Meaning* describes how the meanings of established phrases are enhanced, refocused and modified in everyday language use. Unlike many studies of creativity in language, this book-length survey addresses the matter at several levels, from the purely linguistic level of collocation, through its abstractions in colligation and semantic preference, to semantic prosody and connotation. This journey through both linguistic and cognitive levels involves the examination of habitual language and its exploitations, both mundane and colourful, explaining the phenomena observed in terms of current psycholinguistic research as well as corpus linguistics theory and analysis. The relationships between meaning in text and meaning in the mind are discussed at length and extensively illustrated with worked case studies to offer the reader a comprehensive overview of metaphorical and other secondary meanings as they emerge in real-world communicative situations.

The Economic Geography of Air Transportation John T. Bowen, 2010-04-05 Like the railroad and the automobile, the airliner has changed the very geography of the societies it serves. Fundamentally, air transportation has helped redefine the scale of human geography by dramatically reducing the cost of distance, both in terms of time and money. The result is what the author terms the 'airborne world', meaning all those places dependent upon and transformed by relatively inexpensive air transportation. *The Economic Geography of Air Transportation* answers three key questions: how did air transportation develop in the century after the Wright Brothers, what does it mean to live in an airborne world, and what is the future of aviation in this century? Examples are drawn from throughout the world. In particular, ample consideration is given to the situation in developing countries, where air transportation is growing rapidly and where, to a considerable degree, the future of the airborne world will be determined. The book weaves together the technological development of aviation, the competition among aircraft manufacturers and their stables of airliners, the deregulation and privatization of the airline industry, the articulation of air passenger and air cargo services in everyday life, and the challenges and controversies surrounding airports. It will be of particular interest to students and researchers in air transport history, the geography of the airline industry, air transport technological development, competition in the commercial aircraft industry, airport development, geography and economics. It will also be useful to professionals working in the airline, airport, and aircraft manufacturing industries.

In the Wilderness Kim Barnes, 1997-02-17 Poet Kim Barnes grew up in northern Idaho, in the isolated camps where her father worked as a logger and her mother made a modest but comfortable home for her husband and two children. Their lives were short on material wealth, but long on the riches of family and

friendship, and the great sheltering power of the wilderness. But in the mid-1960's, as automation and a declining economy drove more and more loggers out of the wilderness and into despair, Kim's father dug in and determined to stay. It was then the family turned fervently toward Pentecostalism. It was then things changed. In the Wilderness is the poet's own account of a journey toward adulthood against an interior landscape every bit as awesome, as beautiful, and as fraught with hidden peril as the great forest itself. It is a story of how both faith and geography can shape the heart and soul, and of the uncharted territory we all must enter to face our demons. Above all, it is the clear-eyed and moving account of a young woman's coming of terms with her family, her homeland, her spirituality, and herself. In presenting Kim Barnes the 1995 PENJerard Fund Award for a work-in-progress by an emerging female writer, the panel of judges wrote that In the Wilderness is far more than a personal memoir, adding that it stands almost as a cautionary example of the power of good prose to distinguish whatever it touches. Indeed, In the Wilderness is an extraordinary work, courageous, candid, and exquisitely written.

The Bison Hunters Shirley G East, 2018-12-22 "We must! Or we all will die here in these miserable Starving Mountains. They are out there, I know they must be." A pair of youths on the cusp of manhood bring The People across the great moving sand belt onto the Great Plains. A young woman is tested greatly by the Bison Spirit and found acceptable to lead The People back to the ways of their ancestors. But Basket is only half the way; they must be reunited. Soul brothers ripped asunder as evil claws its way in. Only Basket and Star Child can save the people and drive the evil away so that The People reach their destiny. At the end of the Younger Dryas—11,500 years ago—the rain returned. The Great Plains again supported vast herds of bison: bison antiquus. The People were living in fragmented groups at the edge of starvation, but gradually, they began to adapt to a new way of life and spread from south Texas to North Dakota. They were the Folsom Culture.

Aggregation-Induced Emission Ben Zhong Tang, Anjun Qin, 2013-09-05 Aggregation-Induced Emission (AIE) is a novel photophysical phenomenon which offers a new platform for researchers to look into the light-emitting processes from luminogen aggregates, from which useful information on structure–property relationships may be collected and mechanistic insights may be gained. The discovery of the AIE effect opens a new avenue for the development of new luminogen materials in the aggregate or solid state. By enabling light emission in the practically useful solid state, AIE has the potential to expand significantly the technological applications of luminescent materials. Aggregation-Induced Emission: Fundamentals is the first book to explore the fundamental issues of AIE, including the design, synthesis, and photophysical behavior of AIE-active molecules and polymers. The control of the morphological structures of the aggregates of AIE-active materials, and the experimental investigation and theoretical understanding of the AIE mechanism, are also covered in this volume. Topics covered include: AIE in group 14 metalloids AIE in organic ion pairs Red light-emitting AIE materials Supramolecular structure and AIE AIE-active polymers Enhanced emission by restriction of molecular rotation Crystallization-induced emission enhancement Theoretical understanding of AIE phenomena This book is essential reading for scientists and engineers who are designing optoelectronic materials and biomedical sensors, and will also be of interest to academic researchers in materials science and physical and synthetic organic chemistry, as well as physicists and biological chemists.

Strategies for Being Visible Susan Ritchie, 2019-01-25 Strategies for Being Visible: 14 Profile-Raising Ideas for Emerging Female Leaders is a practical handbook providing inspiration for women in early and middle leadership positions, in order to motivate them and equip them with the confidence, skills and

strategies they require to be more visible at work and raise their profile. This will then enable them to move into more senior positions and feed the pipeline that is needed for women to attain more board-level positions, taking their careers to whatever heights they choose. Self-promotion for women who don't want to feel they're showing off! 'Working in a tough and male dominated environment, I understand the difficulties women face to be heard and judged as equals. Strategies for Being Visible is a wonderful book for emerging female leaders, full of great information and skills to help everyone raise their profiles and achieve more at work.' The Principles and Practice of International Aviation Law Brian F. Havel, Gabriel S. Sanchez, 2014-03-31 This book provides an introduction to, and demystification of, the private and public dimensions of international aviation law. The air transport industry is not governed by a discrete area of the law but rather by a series of disparate transnational regulatory instruments. By combining classical doctrinal analysis with insights from newer disciplines such as international relations and economics, the book maps international aviation law's complex terrain for new and veteran observers alike.

The Greater Share of Honour Kim James, 2007 Seven men - three British, three French and one Senegalese - born hundreds of miles apart and separated by nationality, race, religion and class... yet all have a unity at the time of their death. Poets' Meeting William J. McGill, 2003-11-26 George Herbert (1593-1633) and R.S. Thomas (1913-2000), each a major English poet and an Anglican priest, lived in very different times, one before the Scientific Revolution, the Enlightenment, and industrialization, and one following. Yet the two men and their poetry bear striking resemblances: Both loved nature and music, both were pacifists, and both struggled with the claims of faith, the nature of the spiritual life, and the recurrent silences of God. This book demonstrates that when their lives and poems are studied side by side, each man enhances our understanding of the other. The first essay deals with their sense of calling as priests and poets. The work then explores topics that relate to their roles as parish priests: ministry, the Bible, the Eucharist, and prayer. Several essays follow dealing with broader questions of the human condition: faith, sin, love, reason and science, and nature. The work concludes by considering their poems about Christmas, Good Friday, and Easter.
