Airbus A380 Guy Norris, 2005-11-10 Poised for takeoff on that hot morning in April 2005,

the Airbus A380 had the purposeful, powerful presence of a giant predatory bird. With its enormous gulled wings, imperiously tall tail, and broad, domed forepeak, it looked ready to take on the world. And along the way, it has had plenty of supporters—and critics. No civil airliner since the supersonic Concorde has aroused such emotion, such fascination, and such cause célèbre. To a confident Airbus and the thousands of awestruck workers who cheered it into that cloudless sky over Toulouse, it means so much more. The European company has been transformed under the broad wings of this incredible project into a single corporate entity—from a loose consortium into a new, more dynamic force to challenge its worthy adversary Boeing in every market sector.

Commercial Aviation Gerald Lee Dillingham, 2007 Airbus S.A.S., a European aircraft manufacturer, is introducing a new aircraft designated as the A380, which is expected to enter service in late 2007. The A380 will be the largest passenger aircraft in the world, with a wingspan of 262', a tail fin reaching 80' high, & a maximum takeoff weight of 1.2 million pounds. The A380 has a double deck & could seat up to 853 passengers. This report discusses: (1) the safety issues associated with introducing the A380 at U.S. airports; (2) the potential impact of A380 operations on the capacity of U.S. airports; & (3) how selected foreign airports are preparing to accommodate the A380. The author conducted site visits to the 18 U.S. airports & 11 Asian, Canadian, & European airports preparing to receive the A380. III.

The Airbus A380 Graham M. Simons, 2014-08-13 Every 7 minutes, an A380 takes off or lands somewhere in the world...The Airbus was initially designed and developed in order to provide a contender to the Boeing's growing monopoly of the skies in the biggest large-aircraft market in the world. Ambitious in design, the undertaking seemed mammoth. Yet scores of aviation engineers and pilots worked to get the design off the ground and the Airbus in our skies. This double-decker, wide-body, 4 engine jet airliner promised to redefine expectations when it came to commercial flight. Five years on from its launch, Graham Simons provides us with this, an impressively illustrated narrative history of the craft, its achievements, and the legacy it looks set to provide to a new generation of aviation engineers, enthusiasts and passengers. Operated by airlines such as Emirates, Singapore Airlines, Qantas and Lufthansa, the story of the A380 could be said to represent the story of modern-day travel itself, characterised by major technological advances across the world that constantly push the boundaries of expectation. Sure to appeal broadly across the market, this is very much a commemorative volume, preserving the history of this iconic craft in words and images.

Airbus A380 Robert Jackson,Glen Ashley,2021-07-30 “A great addition to the highly popular Flight Craft Series. This book reviews the history of . . . an iconic and important aircraft in civil aviation.” —Firetrench On April 27 2005, an aircraft under the power of six massive Rolls-Royce Trent 900 turbofan engines was making its first flight, and it was making history. For this was the Airbus A380, the largest passenger aircraft in the world. With air traffic continuing to double every fifteen years, the A380 was designed by Airbus Industrie to meet the needs of the passengers and airports, while also delivering the level of efficiency necessary to protect the environment for future generations. The design incorporated two full-length decks with wide-body dimensions, meaning its two passenger levels offered an entire deck’s worth of additional space compared to the next largest twin-engine jetliner. With more seats than any other aircraft, the A380 offered solutions to overcrowding; needing fewer journeys to carry 60 percent more passengers, making it the perfect solution to airport congestion, fleet planning optimization and traffic growth. Typical seating capacity was 525, although the aircraft was certified to carry up to 853 passengers. Production of the A380 peaked at thirty aircraft per year in 2012 and 2014. Then, in February 2019, the biggest customer, Emirates, announced that it was to reduce its latest order by thirty-nine aircraft in favour of two other Airbus Models, the A350 and A330neo, a version using the same engines as the Boeing 787 Dreamliner. For Airbus, it was the last act. The Company announced that production of the A380 would cease by 2021. “Full of great information.” —Airport Spotting
