Financial Performance of Telecom Companies, with special Reference to Bharti Airtel Ltd. Dr. Jyoti Ramesh Rao Kote,

Bharti Airtel (A) C. K. Prahalad, M. S. Krishnan, Sam Bryson, Joshua Katz, Sheel Mohnot, 2009-11-03 This case study on India's wireless giant Bharti Airtel (Airtel) is the first of two cases on the company that show how the firm exemplifies many of the tenets set forth in the book *The New Age of Innovation* by CK Prahalad and MS Krishnan. Case A presents the students with the history of India's wireless telecommunications industry and the unique challenges faced by operators in that environment. It also gives the background on Airtel, introduces its leaders, and describes some of the biggest challenges facing the company. Case A ends by asking students to analyze the Indian environment and capabilities of Airtel to determine what strategies the wireless provider should use for growth. Case B gives students the opportunity to see which strategies the company actually pursued and the results of those approaches.

Bharti Airtel (B) C. K. Prahalad, M. S. Krishnan, Sam Bryson, Joshua Katz, Sheel Mohnot, 2009-11-03 This case study on India's wireless giant Bharti Airtel (Airtel) is the second of two cases on the company that show how the firm exemplifies many of the tenets set forth in the book *The New Age of Innovation* by CK Prahalad and MS Krishnan. Case B presents the students with the varied strategies that Airtel has pursued to become one of the most

profitable wireless telecommunications companies in the world, despite the fact that it operates in one of the poorest countries on Earth. Airtel changed the industry by moving away from such standard metrics as Average Revenue Per User (ARPU) and has employed alternative measurements for success. It has also relied heavily on outsourcing non-core functions and designed unique Value-Added Services for its varied customer base. the case asks students how Airtel can maintain its culture of innovation while growing quickly. How will it be able to remain agile, entrepreneurial, and flexible in the face of the necessary standardization that accompanies scale?

This book explores indigenous African language media about media representations, media texts and contents, practice-based activities, audience reception and participation, television, popular culture and cinema, peace and conflict resolution, health and environmental crisis communication, citizen journalism, ethnic and identity formation, beat analysis and investigative journalism, and corporate communication. Regulating Blockchain Philipp Hacker, Ioannis Lianos, Georgios Dimitropoulos, Stefan Eich, 2019-08-01 Less than a decade after the Financial

Crisis, we are witnessing the fast emergence of a new financial order driven by three different, yet interconnected, dynamics: first, the rapid application of technology - such as big data, machine learning, and distributed computing - to banking, lending, and investing, in particular with the emergence of virtual currencies and digital finance; second, a disintermediation fuelled by the rise of peer-to-peer lending platforms and crowd investment which challenge the traditional banking model and may, over time, lead to a transformation of the way both retail and corporate customers bank; and, third, a tendency of de-bureaucratisation under which new platforms and technologies challenge established organisational patterns that regulate finance and manage the money supply. These changes are to a significant degree driven by the development of blockchain technology. The aim of this book is to understand the technological and business potential of the blockchain technology and to reflect on its legal challenges. The book mainly focuses on the challenges blockchain technology has so far faced in its first application in the areas of virtual money and finance, as well as those that it will inevitably face (and is partially already facing, as the SEC Investigative Report of June 2017 and an ongoing SEC securities fraud investigation show) as its domain of application expands in other fields of economic activity such as smart contracts and initial coin offerings. The book provides an unparalleled critical analysis of the disruptive potential of this technology for the economy and the legal system and contributes to

current thinking on the role of law in harvesting and shaping innovation.
