Alpha Olefins Applications Handbook George Lappin, 2014-02-06 This book discusses the applications of higher linear alpha olefins containing 4 to 30 carbon atoms, describes current commercial uses of alpha olefins, and indicates potential new uses. It also documents methods of production and provides physical property and general property data on the olefins.

Move Alpha Howard Lasnik, Mamoru Saito, 1994 This major contribution to modern syntactic theory elaborates a principles-and-parameters framework in which the differences and similarities among languages with respect to WH-questions can be captured. Move Ü is part of an overall program, initiated by Noam Chomsky, to create a global theory in which the entire transformational component can be reduced to a single process, Move Ü. Lasnik and Saito are concerned particularly with bounding requirements on movement (Subjacency) and proper government requirements on traces (The Empty Category Principle). The first two chapters present and extend the ideas proposed in the author's earlier article, On the Nature of Proper Government. Included are detailed discussions of Ü-marking, the general rule Affect Ü, and the definition of proper government, particularly as these relate to WH constructions. The next two chapters propose a modification of Chomsky's Barriers Theory on the basis of a close examination of topicalization and examine the consequences of the modified theory. The discussion extends to restrictions on possible antecedent governors and the implications for quantifier raising and NP-movement of these restrictions. Consequences for Superiority are also considered, and a modified version of this condition is proposed, as is an extension of Chomsky's Uniformity Condition. The final chapter takes up further theoretical issues and alternative approaches. Howard Lasnik is Professor and Mamoru Saito is Associate Professor, both at the University of Connecticut.

The Alpha Series Workbook John Glenn, Jim Groth, 2006-10 What is the Alpha Series? Is it a program? Is it a religion? The simplest answer is that the Alpha Series explains the gospel of Jesus Christ in a way that ordinary people can understand and apply it to themselves. What makes the Alpha Series effective as a counseling model, discipleship course, training curriculum, or recovery tool is the fact that it is a practical application of the gospel which is the power of God unto salvation to everyone that believeth... (Romans 1: 16). People are hungry for the gospel of grace but turned off by religion. Because the Alpha Series is not religious but biblical in nature most people will be receptive to the teaching regardless of their background and life experience. Religion is man's attempt to manipulate deity by what he says or does. Biblical Christianity is a personal relationship with God based on believing in what He has done for us in Christ that we could not do for ourselves. The Alpha Series is simply an explanation of what the Bible says that God has done to make us worthy as persons. Whenever the gospel is taught it is the power of God that changes the lives of all who believe it. The Alpha Series is constructed in three main parts. Part one describes the manner in which personal and relational problems develop from the core emotions of fear of rejection and fear of failure due to low self esteem. The insight gained in understanding how problems develop sets the stage for the application of the gospel of Jesus Christ as the only workable solution. Part two provides a biblical foundation on which to build a healthy self-image based entirely upon our new identity in Christ. The good news of our union with Christ is applied to the daily task of allowing ourselves to be transformed by the renewing of the mind. Part three carries the gospel of our new identity in Christ to the logical end of ministering to the needs of others. Having been assured of our personal security in all that God has done for us in Christ, we have the confidence and power to concern ourselves with helping others.

True recovery is not complete until we learn to minister rather than manipulate. For additional information on the Alpha Series and its application visit the Alpha Ministries website at www.alphaministries.org.

The Alpha Series John Glenn, 2006-10 On a scale of 1 to 10, with 1 being sinful and worthless and 10 being absolutely perfect and righteous, how do you rate yourself, really? On that same scale, how does God rate you? The Alpha Series is a systematic study of all that God has done to make you a 10 and a course on how you can begin to see yourself the way God sees you. Knowing what God thinks about us gives us a choice in what we are going to believe about ourselves. Believing what God says he made us to be allows us the hope we need to cope with life. The joyful, confident expectation about our own future gives us the liberty to care about others. The Alpha Series may be used as a counseling model, a discipleship course, a faith based recovery tool, and a training curriculum. Along with the companion workbook it is suitable as basic curricula for all types of study groups and recovery programs.

Data Analysis and Applications 4 Andreas Makridakis, Alex Karagrigoriou, Christos H. Skiadas, 2020-03-31 Data analysis as an area of importance has grown exponentially, especially during the past couple of decades. This can be attributed to a rapidly growing computer industry and the wide applicability of computational techniques, in conjunction with new advances of analytic tools. This being the case, the need for literature that addresses this is self-evident. New publications are appearing, covering the need for information from all fields of science and engineering, thanks to the universal relevance of data analysis and statistics packages. This book is a collective work by a number of leading scientists, analysts, engineers, mathematicians and statisticians who have been working at the forefront of data analysis. The chapters included in this volume represent a cross-section of current concerns and research interests in these scientific areas. The material is divided into three parts: Financial Data Analysis and Methods, Statistics and Stochastic Data Analysis and Methods, and Demographic Methods and Data Analysis- providing the reader with both theoretical and applied information on data analysis methods, models and techniques and appropriate applications.
