**Africa's Joola Shipwreck** Karen Samantha Barton,2020-12-10 In 2002, a government-owned Senegalese ferry named the Joola capsized in a storm off the coast of The Gambia in a tragedy that killed 1,863 people and left 64 survivors, only one of them female. The Joola caused more human suffering than the Titanic yet no scholarly research to date has explored the political and environmental conditions in which this African crisis occurred. *Africa's Joola Shipwreck: Causes and Consequences of a Humanitarian Disaster* investigates the roots of the Joola shipwreck and its consequences for Senegalese people, particularly those living in the rural south. Using three summers of field research in Senegal, Karen Samantha Barton unravels the geographical forces such as migration, colonial cartographies, and geographies of the sea that led to this humanitarian disaster and defined its aftermath. Barton shows how the Sufi tenet of "beautiful optimism" shaped community resilience in the wake of the shipwreck, despite the repercussions the event had on Senegalese society and space.

*Costume and Fashion: A Concise History (Sixth) (World of Art)* James Laver,2020-04-14 An authoritative account of the history of fashion and costume from prehistoric times to today. Costume and Fashion explores the forms and materials used in fashion through the ages, the underlying motives of fashion, and the ways in which clothes have been used to protect, express identity, and attract or influence others. This updated sixth edition features a new foreword and concluding chapter by Amy de la Haye and a new discussion about the major political shifts within the fashion industry, highlighting how it has responded to issues surrounding racism and sexism, LGBTQIA rights, mental health awareness, body and age diversity, and global sustainability. Generously illustrated with paintings, drawings, and photographs, and with a new angle on the emergence of ethical fashion, Costume and Fashion feels more current than ever.

Masters Theses in the Pure and Applied Sciences W. H. Shafer,2012-12-06 Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis (CINDAS) \* at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity were transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 25 (thesis year 1980) a total of 10,308 theses titles from 27 Canadian and 214 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. While Volume 25 reports theses submitted in 1980, on occasion, certain universities do report theses submitted in previous years but not reported at the time.
