The Long Shadow of Informality Franziska Ohnsorge, Shu Yu, 2022-02-09 A large percentage of workers and firms operate in the informal economy, outside the line of sight of governments in emerging market and developing economies. This may hold back the recovery in these economies from the deep recessions caused by the COVID-19 pandemic--unless governments adopt a broad set of policies to address the challenges of widespread informality. This study is the first comprehensive analysis of the extent of informality and its implications for a durable economic recovery and for long-term development. It finds that pervasive informality is associated with significantly weaker economic outcomes--including lower government resources to combat recessions, lower per capita incomes, greater poverty, less financial development, and weaker investment and productivity.

Global Economic Prospects, January 2020 World Bank Group, 2020-01-27 Global growth is projected to be slightly faster in 2020 than the post-crisis low

registered last year. While growth could be stronger if reduced trade tensions lead to a sustained reduction in uncertainty, the balance of risks to the outlook is to the downside. Growth in emerging market and developing economies is also expected to remain subdued, continuing a decade of disappointing outcomes. A steep and widespread productivity growth slowdown has been underway in these economies since the global financial crisis, despite the largest, fastest, and most broad-based accumulation of debt since the 1970s. In addition, many emerging market and developing economies, including low-income countries, face the challenge of phasing out price controls that impose heavy fiscal cost and dampen investment. These circumstances add urgency to the need to implement measures to rebuild macroeconomic policy space and to undertake reforms to rekindle productivity growth. These efforts need to be supplemented by policies to promote inclusive and sustainable long-term growth and accelerate poverty alleviation. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing countries, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced by these economies, whereas the June edition contains shorter analytical pieces.

Falling Long-Term Growth Prospects M. Ayhan Kose, Franziska Ohnsorge, 2024-03-06 A structural growth slowdown is under way across the

world: at current trends, the global rate of potential growth is expected to fall to a three-decade low over the remainder of the 2020s. Nearly all the forces that have powered growth and prosperity since the early 1990s have weakened. In addition, a series of shocks has affected the global economy over the past three years. A persistent and broad-based decline in long-term growth prospects imperils the ability of emerging market and developing economies to combat poverty, tackle climate change, and meet other key development objectives. The challenges presented by this potential inability call for an ambitious policy response at the national and global levels. This book presents the first detailed analysis of the growth slowdown and a rich menu of policy options to deliver better growth outcomes. -----

----- This book presents a sobering analysis of the secular growth slowdown based on the most comprehensive database of potential growth estimates available to date. With nearly all the forces that have driven growth and prosperity in recent decades now weakened, the book argues that a prolonged period of weakness is under way, with serious implications for emerging market and developing economies. The authors call for bold policy actions at both the national and global levels to lift growth prospects. The book is essential reading for policy makers, economists, and anyone concerned about the future of the global economy. Beatrice Weder di Mauro Professor of International Economics, Geneva Graduate Institute, and President of the

Centre for Economic Policy Research (CEPR) Economic policy making is becoming increasingly complicated in the 2020s. In addition to tackling traditional trade-offs in aggregate demand management and improving efficiency on the supply side, policy makers need to address new priorities and challenges, from addressing climate change and its impacts to improving income distribution, all in the context of lower growth rates, waning productivity growth, and flattening of the globalization process that has brought unprecedented prosperity across the globe and lifted more than a billion people out of poverty. In *Falling Long-Term Growth Prospects*, the authors do a phenomenal job of assessing these trends at the global and regional levels, identifying and unpacking salient twenty-first-century policy challenges, and providing thoughtful and evidence-based policy prescriptions for leaders in advanced, emerging market, and developing economies. Importantly, the book underscores that these challenges tend to be global and, hence, global cooperation at all levels is necessary to achieve optimal results. Alas, we seem to be going in the opposite direction; this book offers a road map to put us back on the path to creating a more integrated, prosperous, and equitable global community. Michael G. Plummer Director, SAIS Europe and ENI Professor of International Economics, The Johns Hopkins University

A Modern Guide to the Informal Economy Colin C. Williams, 2023-03-02 This Modern Guide presents a comprehensive synthesis of contemporary thought on the informal economy, which, as the author demonstrates – far from being a

peripheral feature of the global economy – is a system in which the majority of the global workforce are employed and which has pervasive detrimental effects. Formalising it is therefore a priority for most governments.

The Southern African Development Community (SADC) and the European Union (EU) Johannes Muntschick, 2017-10-09 This book explores regionalism in the Southern African Development Community (SADC) and highlights the influence of the European Union (EU) as an extra-regional actor on the organization and integration process. The analysis is guided by theory and explains the emergence, institutional design and performance of SADC's major integration projects in the issue areas of the economy, security and infrastructure. It provides in this way a profound assessment of the organization as a whole. The study shows that South Africa plays a regional key role as driver for integration while external influence of the EU is ambivalent in character because it unfolds a supportive or obstructive impact. The author argues that the EU gains influence over regional integration processes in the SADC on the basis of patterns of asymmetric interdependence and becomes a 'game-changer' insofar as it facilitates or impedes solutions to regional cooperation problems.

Global Productivity Alistair Dieppe, 2021-06-09 The COVID-19 pandemic struck the global economy after a decade that featured a broad-based slowdown in productivity growth. *Global Productivity: Trends, Drivers, and Policies* presents the first comprehensive analysis of the evolution and drivers of

productivity growth, examines the effects of COVID-19 on productivity, and discusses a wide range of policies needed to rekindle productivity growth. The book also provides a far-reaching data set of multiple measures of productivity for up to 164 advanced economies and emerging market and developing economies, and it introduces a new sectoral database of productivity. The World Bank has created an extraordinary book on productivity, covering a large group of countries and using a wide variety of data sources. There is an emphasis on emerging and developing economies, whereas the prior literature has concentrated on developed economies. The book seeks to understand growth patterns and quantify the role of (among other things) the reallocation of factors, technological change, and the impact of natural disasters, including the COVID-19 pandemic. This book is must-reading for specialists in emerging economies but also provides deep insights for anyone interested in economic growth and productivity. Martin Neil Baily Senior Fellow, The Brookings Institution Former Chair, U.S. President's Council of Economic Advisers This is an important book at a critical time. As the book notes, global productivity growth had already been slowing prior to the COVID-19 pandemic and collapses with the pandemic. If we want an effective recovery, we have to understand what was driving these long-run trends. The book presents a novel global approach to examining the levels, growth rates, and drivers of productivity growth. For anyone wanting to understand or influence productivity growth, this is an essential read.

Nicholas Bloom William D. Eberle Professor of Economics, Stanford University
The COVID-19 pandemic hit a global economy that was already struggling with an adverse pre-existing condition—slow productivity growth. This extraordinarily valuable and timely book brings considerable new evidence that shows the broad-based, long-standing nature of the slowdown. It is comprehensive, with an exceptional focus on emerging market and developing economies. Importantly, it shows how severe disasters (of which COVID-19 is just the latest) typically harm productivity. There are no silver bullets, but the book suggests sensible strategies to improve growth prospects. John Fernald Schrodgers Chaired Professor of European Competitiveness and Reform and Professor of Economics, INSEAD

Stranded at the Drive-In Garry Mulholland, 2011-11-24 Acclaimed writer of *This is Uncool* and *Popcorn* turns his attention to the (first ever) look at the teen movie. Everyone undergoes some kind of teenage trauma, and a fundamental way of coping, or rite of passage, is the teen movie. Yet until now there has been no book that explores this successful movie sub-genre with any depth. Step forward Garry Mulholland, who, taking his cue from his previous, hugely acclaimed pop culture list books (*This is Uncool* and *Fear of Music*), seeks to create a pantheon of the very finest teen movies, or in Garry Mulholland's words: 'I'll be doing what film critics have been loathe to do since the 1950s, and taking the entire subculture of teen movies seriously, making a constant and compelling argument that *Grease* and *A Nightmare on Elm Street* tell us a great deal more about modern life and human nature than *Citizen Kane* and *The Godfather*.' From *Kes* to *Fame*, *Badlands* to the *Breakfast Club*, and *National Lampoon's Animal House* to *Twilight*, Garry Mulholland re-evaluates a much maligned genre, and brings it all back again: the good, the bad and the traumatic.

Global Economic Prospects, January 2024 World Bank Group,2024-02-13 Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and developing economies, on a semiannual basis (in January and June). Each edition includes analytical pieces on topical policy challenges faced by these economies.

Formalization of the Informal Economy Colin C. Williams,2023-09-09 This Brief provides a cutting-edge evaluation of the application of digital technologies to tackle the informal economy. Employing institutional theory to explain the informal economy, this book reveals that the informal economy arises when formal institutional failings trigger a gap between the formal rules of the game and social norms. Chapters outline how use of digital technologies by public authorities, such as tax, social security and labor authorities, can alter social norms so that they accord with the formal rules of the game and generate a formalization of the informal economy. Setting out the e-government tools that can improve the relationship between businesses, employers, workers and citizens, and government, this book will be essential reading for academics and advanced students studying development economics, labor economics, public economics, behavioral economics, economic sociology and institutional economics as well as for government policymakers working in related fields.

Global Economic Prospects, June 2020 World Bank Group,2020-07-07 The

COVID-19 pandemic has, with alarming speed, dealt a heavy blow to an already-weak global economy, which is expected to slide into its deepest recession since the second world war, despite unprecedented policy support. The global recession would be deeper if countries take longer to bring the pandemic under control, if financial stress triggers defaults, or if there are protracted effects on households and firms. Economic disruptions are likely to be more severe and protracted in emerging market and developing economies with larger domestic outbreaks and weaker medical care systems; greater exposure to international spillovers through trade, tourism, and commodity and financial markets; weaker macroeconomic frameworks; and more pervasive informality and poverty. Beyond the current steep economic contraction, the pandemic is likely to leave lasting scars on the global economy by undermining consumer and investor confidence, human capital, and global value chains. Being mostly a reflection of the recent plunge in global energy demand, low oil prices are unlikely to provide much of a boost to global growth in the near term. While policymakers' immediate priorities are to address the health crisis and moderate the short-term economic losses, the likely long-term consequences of the pandemic highlight the need to forcefully undertake comprehensive reform programs to improve the fundamental drivers of economic growth, once the crisis abates. Global Economic Prospects is a World Bank Group Flagship Report that examines global economic developments and prospects, with a special focus on emerging market and

developing economies, on a semiannual basis (in January and June). The January edition includes in-depth analyses of topical policy challenges faced by these economies, while the June edition contains shorter analytical pieces.

When Race, Religion, and Sport Collide Darron T. Smith, 2015-10-30 When *Race, Religion, and Sport Collide* tells the story of Brandon Davies' dismissal from Brigham Young University's NCAA playoff basketball team to illustrate the thorny intersection of religion, race, and sport at BYU and beyond. Author Darron T. Smith analyzes the athletes dismissed through BYU's honor code violations and suggests that they are disproportionately African American, which has troubling implications. He ties these dismissals to the complicated history of negative views towards African Americans in the LDS faith. These honor code dismissals elucidate the challenges facing black athletes at predominantly white institutions. Weaving together the history of the black athlete in America and the experience of blackness in Mormon theology, *When Race, Religion, and Sport Collide* offers a timely and powerful analysis of the challenges facing African American athletes in the NCAA today.

Transitioning Vocational Education and Training in Africa Simon McGrath, George Openjuru Ladaah, Heila Lotz-Sisitka, Stephanie Allais, Jacques Zeelen, Volker Wedekind, Presha Ramsarup, David Monk, Luke Metelerkamp, Jo-Anna Russon, 2023-01-06 EPDF and EPUB available Open Access under CC-BY-NC-ND

licence. The transition to more just and sustainable development requires radical change across a wide range of areas and particularly within the nexus between learning and work. This book takes an expansive view of vocational education and training that goes beyond the narrow focus of much of the current literature and policy debate. Drawing on case studies across rural and urban settings in Uganda and South Africa, the book offers a new way of seeing this issue through an exploration of the multiple ways in which people learn to have better livelihoods. Crucially, it explores learning that takes place informally online, within farmers' groups, and in public and private educational institutions. Offering new insights and ways of thinking about this field, the book draws out clear implications for theory, policy and practice in Africa and beyond.

Global Economic Prospects, January 2023 World Bank Group, 2023-02-17 Global growth is expected to decelerate sharply, reflecting synchronous policy tightening aimed at containing very high inflation, worsening financial conditions, and continued disruptions from Russia's invasion of Ukraine. Investment growth in emerging market and developing economies (EMDEs) is expected to remain below its average rate of the past two decades. Further adverse shocks could push the global economy into recession. Small states are especially vulnerable to such shocks because of the reliance on external trade and financing, limited economic diversification, elevated debt, and susceptibility to natural disasters. Against this backdrop, it is critical

that EMDE policy makers ensure that any fiscal support is focused on vulnerable groups, that inflation expectations remain well anchored, and that financial systems continue to be resilient. Urgent global and national efforts are also needed to mitigate the risks of global recession and debt distress in EMDEs and to support a major increase in EMDE investment.

Informality, Development, and the Business Cycle in North Africa Mr. Roberto Cardarelli, Hippolyte W. Balima, Chiara Maggi, Mr. Adrian Alter, Jérôme Vacher, Matthew Gaertner, Olivier Bizimana, Azhin Abdulkarim, Karim Badr, Shant Arzoumanian, Mahmoud Harb, Mariam El Hamiani Khatat, Ms. Priscilla S Muthoora, Aymen Belgacem, 2022-06-09 North African economies are characterized by a significant share of informal activity and employment. About two-thirds of workers in North Africa operate without any formal arrangement and social protection, and about 30 percent of GDP is estimated to be produced by informal workers and firms. This paper finds that while a few key structural characteristics could explain “normal” informality in North Africa, policy distortions explain a large share of excess informality. Among the structural factors that can lead to high informality, the relatively lower level of human capital and younger population help explain the high informality in the region, as low-skilled and young people generally find it more difficult to operate in the formal sector. At the same time, gaps in a set of policy indicators also explain the relatively high informality in North Africa. In particular, this paper finds that gaps in the quality of governance explain

about half of the excess informality experienced in North Africa compared with advanced economies. In this context, the expansion of the informal sector in Algeria and Tunisia from the mid-2000s partially reflects the deterioration in a few indicators of their governance and regulatory frameworks. In contrast, the decline in informality observed in Egypt, Mauritania, and Morocco over this period also reflects improved business regulations, governance, and tax systems, in addition to continued progress in economic development. While informality has traditionally buffered regional labor markets against the impact of recessions, the COVID-19 crisis has been different. North African economies have generally exhibited relatively stable unemployment rates, including during recessions, largely owing to their high levels of informality. However, informal employment has fallen significantly in North Africa during the pandemic, as lockdown measures have particularly affected high-informality service sectors. As the pandemic subsides and the lockdown measures are removed, the recovery of regional labor markets could exhibit a stronger-than-usual rebound of informal employment. Ensuring an inclusive recovery from the pandemic would call for renewed efforts to construct more modern (digitalized), more efficient, and fairer systems of social protection, building on the progress achieved in the region during the pandemic in extending safety nets to informal workers.
