**Birder on Berry Lane** Robert Tougas, 2020-03-17 A month-by-month guide to the birds that flock to the peaceful New England backyard of a noted writer, birder, and naturalist. Robert Tougas's house on Berry Lane may look like a typical Connecticut suburban home, but as his fascinating year-long account reveals, its three-acre backyard is

teeming with nature's mysteries. Acutely sensitive to the activities of birds, Tougias notes which species are present, which are breeding, and where their nests are. He identifies each species by its song, and brings us on a journey of appreciation as we learn the wonders of bird migration, the sensitive interaction of birds with their habitat, and the hidden meaning of their call notes and songs. Intimate and acutely observed writing reveals the miracles of the ordinary in the subtle changes, season to season, of the ecosystem of the woods, streams, and meadow that make up the sprawling backyard on Berry Lane. We are led to consider, too, the dangers posed by the climate crisis and unthinking human development. The quietly powerful writing tunes our senses to the change of the seasons, the return of warblers in spring, geese flying south in the fall--all happening on time as they have for eons. Beautifully illustrated with twenty-five line drawings, *Birder on Berry Lane* is a book of sublime simplicity that teaches an appreciation for what we commonly overlook. "Birder on Berry Lane weaves a remarkably rich tapestry, describing many birds' lives around a single place and showing just how connected to them we can become. Robert Tougias proves that if we look, we can see so much more than we think, even in our own backyards." Brian Sullivan eBird project leader, Cornell University Author of *Better Birding--Tips, Tools, and Concepts for the Field*

**Eliza Berry A Second Chance** Daniella Colombo, 2022-02-09 Should a young girl save her father at the cost of trillions of fathers? Eliza, a tormented thirteen-year-old, lives in the near future in a city called Cresco. After her dad disappears down a wormhole, she's catapulted into the intrigues of an incredible, unfamiliar alien world on Earth. Realising that everything she once knew was a lie, and with her emerging but unreliable special powers, Eliza teams up with her new friends, TrueBias, Yardley and Zeno, and sets out on a quest to save her father. She soon discovers that it's not only her dad who is in mortal danger, but so is the survival of the whole galaxy. She has to protect the precious Luxlumen stone from the Viscorpus race. But even if she secures the stone, as the only bargaining tool, does she use it to save her father or the galaxy? How can she save them both? A note from Daniella. Choosing an appropriate book for your child, or even for yourself, can be challenge, and with so many on offer, sometimes making the right choice is a lucky dip! The Look Inside feature is excellent, as it gives

you the opportunity to see the style of writing, and the initial direction of the story. It is important to highlight that this book is written in British-English and has not been 'translated' into American-English; therefore, for younger readers, there may be some confusion with language, such as: Lift = Elevator Flat = Apartment Pavement = Sidewalk I thought I would also add some further information to help you with your choice. Eliza Berry—A Second Chance does not contain any foul language, drug use/misuse, and there is no reference to sex or any sexual scenes or associated language. The story does however contain fight scenes, which although are not heavily graphic, and some are quite comical, sometimes Eliza and her pals are in real danger, and there are descriptions of being strangled and held by the throat or hair, and other characters being hurt. We assume one character is dragged into outer space, but this is not confirmed. This is a light science fiction novel for children from the age of 10 upwards. Eliza Berry, the main character, is a girl of little confidence and, as much as this is a story is about adventure and discovery, it is also a story of how Eliza transforms from an individual with low self-esteem and poor self-worth. As many 13-year-olds, she is struggling to find her place in the world, and this story, I'd like to think, takes us on a journey where Eliza learns to love and accept herself for her uniqueness. Accepting who we are is an important part of growing up, and I touch on the themes of domestic violence, low self-esteem, love, family, feelings of abandonment, isolation, fear, friendship, trust, acceptance and honesty. All of us are special and unique, and we all have a superpower. It's just hard sometimes to find it!

*Android at Arms* Andre Norton, 2015-12-01 When Andas Kastor awakens in an alien land, he must figure out if he's the true emperor of his home world or an evil double In a stark, arid wasteland, a man awakens from a frozen state. As he stares out his narrow slit of a window, he has no memory of how he got there—or why. All he knows is his name: Andas Kastor, Imperial Prince of Inyanga. But instead of the luxurious trappings of his royal palace, he's in a hellish, storm-lashed place punctuated by howling winds and shattering streaks of lightning. And he's not alone. In this uninhabited world, he meets five other survivors, also of noble birth. They include the scaled, emerald-haired Elys of Posedonia and clawed, fanged Lord Yolyos of Sargol. They all speak the same Basic language, as befits those from neighboring spheres. Were they abducted, spirited to this alien planet, and held in mind-lock while evil doppelgangers ruled in their places? After a daring escape, Andas returns to Inyanga—only to discover that decades have passed and another sits on his throne. Now, hunted across barriers of time, Andas must fight external and internal enemies to save his civilization and uncover the truth about his identity.

**Mobile Tech Report 2014** John R. Roberts, 2014-01-10 If you read technology news, you'll notice it's not just a story of amazing new product introductions, or even that plus copycat product introductions. All the usual aspects of business are there: fierce competition, new contenders, old survivors, great ideas but business failures, mediocre ideas that somehow seem to succeed and prosper. As a reporter, commentator and blogger on mobile technology, I've collected what happened in the industry in 2013 and make predictions on what will and won't happen in 2014. You can read what did happen in the mobile technology in 2013. Often I deliver a comment with the news item and usually there is a link to the web page of the original announcement. This way you can dive into any

detail level you desire, read my news feed for the overview or follow the related web link to the longer article. History is moving so fast now that it is all recorded electronically, but I'm surprised no one else has collected it and presented it for consideration. Here is 2013 from the mobile technology industry for your consideration along with my own observations and opinions about where things are headed. It's often overlooked that the technology industry is an industry. By that I mean its main concerns are profit and growth. As consumers we love the new products and unique abilities we are gaining from technology, but it is a business akin to any other, trying to seduce us to pry money out of our wallets. So I cover the horse race aspect of the business, who's up, who's down. Is that changing? Is that likely to change? The longer implications of what the technology industry is doing are vast and social. We are moving to an always on, always connected society where we can communicate with someone instantly and find an answer to any question quickly. The entire database of human knowledge is now available in the palm of your hand whenever you desire it. Everything is there, the good, the bad, right and wrong, hate and love, music and noise. We are obsessed with technology, not in and of itself, but as a means to an end. Technology is the means to satisfy our curiosity or even our desire for self-expression. We are taking photos machine gun-style with our smartphones and choose the few to share. As humans we are gathering ever more data about ourselves and sharing more about ourselves than we probably thought possible. Bill Gates was once asked why the computer industry had generated so much improvement in its products over a relatively few years. He gave some boring answer about Moore's Law, but the real answer is that computers are in their teenage years. They are growing and growing. They will not always do so. So too the technology industry is in a state of rapid change. I see the shift to smaller devices as a new paradigm, smashing some businesses and growing others into giants. Their stories are here in the news. In short here are predictions for what won't and will happen in 2014 for the mobile technology industry, breakdowns of marketshare figures on the horse race aspect of the business, chapters on Apple, Samsung, Google, Microsoft, Nokia, BlackBerry, Amazon, Yahoo, news about social media giants Facebook, Twitter, Google+, LinkedIn, Foursquare, SnapChat and the carriers themselves Verizon, AT&T, Sprint and T-Mobile. You can also review my 2013 mobile predictions and see my track record on predictions. Finally there are some essays on how all this mobile tech is figuring into our lives. I've divided the news into the subjects it covers, but also put in the appendix all the news as it came out in chronological ordering. You can read the firehose of events in the appendix, or just read about one topic at a time in the earlier chapters. Table of Contents Preface Introduction Chapter 1: 2014 Predictions Chapter 2: Mobile Marketshare Chapter 3: Apple Chapter 4: Samsung Chapter 5: Google Chapter 6: Microsoft Chapter 7: Nokia Chapter 8: BlackBerry Chapter 9: Amazon Chapter 10: Social Media Chapter 11: Yahoo Chapter 12: Carriers Chapter 13: 2013 Predictions Chapter 14: Essays Appendix

**How to Build an Android** David F. Dufty, 2012-06-05 The stranger-than-fiction story of the ingenious creation and loss of an artificially intelligent android of science-fiction writer Philip K. Dick In late January 2006, a young robotocist on the way to Google headquarters lost an overnight bag on a flight somewhere between Dallas and Las Vegas. In it was a fully functional head of the android replica of Philip K. Dick, cult science-fiction writer and counterculture guru. It has never been recovered. In a story that echoes some of the most paranoid fantasies of a Dick novel, readers get a fascinating inside look at the scientists and technology that made this amazing android possible. The author, who was a fellow researcher at the University of Memphis Institute of Intelligent Systems while the android was being built, introduces readers to the cutting-edge technology in robotics, artificial intelligence, and sculpture that came together in this remarkable machine and captured the imagination of scientists, artists, and science-fiction fans alike. And there are great stories about Dick himself—his inspired yet deeply pessimistic worldview, his bizarre lifestyle, and his enduring creative legacy. In the tradition of popular science classics like *Packing for Mars* and *The Disappearing Spoon*, *How to Build an Android* is entertaining and informative—popular science at its best.

**Androids** Chet Haase,2022-07-12 The fascinating inside story of how the Android operating system came to be. In 2004, Android was two people who wanted to build camera software but couldn't get investors interested. Today, Android is a large team at Google, delivering an operating system (including camera software) to over 3 billion devices worldwide. This is the inside story, told by the people who made it happen. Androids: The Team that Built the Android Operating System is a first-hand chronological account of how the startup began, how the team came together, and how they all built an operating system from the kernel level to its applications and everything in between. It describes the tenuous beginnings of this ambitious project as a tiny startup, then as a small acquisition by Google that took on an industry with strong, entrenched competition. Author Chet Haase joined the Android team at Google in May 2010 and later recorded conversations with team members to preserve the early days of Android's history leading to the launch of 1.0. This engaging and accessible book captures the developers' stories in their own voices to answer the question: How did Android succeed?

**Multiple Criteria Decision Making Methods with Multi-polar Fuzzy Information** Muhammad Akram,Arooj Adeel,2024-01-04 This book presents an extension of fuzzy set theory allowing for multi-polar information, discussing its impact on the theoretical and practical development of multi-criteria decision making. It reports on set of hybrid models developed by the authors, and show how they can be adapted, case by case, to the lack of certainty under a variety of criteria. Among them, hybrid models combining m-polar fuzzy sets with rough, soft and 2-tuple linguistic sets, and m-polar hesitant fuzzy sets and hesitant m-polar fuzzy are presented, together with some significant applications. In turn, outranking decision-making techniques such as m-polar fuzzy ELECTRE I, II, III and IV methods, as well as m-polar fuzzy PROMETHEE I and II methods, are developed. The efficiency of these decision-making procedures, as well as other possible extensions studied by the authors, is shown in some real-world applications. Overall, this book offers a guide on methodologies to deal with the multi-polarity and fuzziness of the real-world problems, simultaneously. By including algorithms and computer programming codes, it provides a practice-oriented reference guide to both researchers and professionals working at the interface between computational intelligence and decision making.
