Raspberry Pi Android Projects Gokhan Kurt,2015-09-25 Create exciting projects by connecting the Raspberry Pi to your Android phone About This Book Manage most of the fundamental functions of Raspberry Pi from your Android phone Use the projects created in this book to develop even more exciting projects in the future A project-based learning experience to help you discover amazing ways to combine the power of Android and Raspberry Pi Who This Book Is For The target audience for this book includes Raspberry Pi enthusiasts, hobbyists, and anyone who wants to create engaging projects

with Android OS. Some knowledge of Android programming would be helpful. What You Will Learn

- Install the tools required on your Pi and Android to manage and administer the Pi from Android
- Share your files between different Android devices using the Pi as a server
- Set up the Pi to live-stream the camera in surveillance mode and customize Android to receive this content
- Turn your Pi into a media center and control it from your Android
- See your Android display on a large screen using Raspberry Pi
- Connect your car's dashboard to your Android device using Raspberry Pi

In Detail Raspberry Pi is the credit card-sized, general purpose computer which has revolutionized portable technology. Android is an operating system that widely used in mobile phones today both on the high and low ends of the mobile phone market. However, there is little information about how to connect the two in spite of how popular both of them are. Raspberry Pi Android Projects starts with simple projects that help you access the command prompt and the desktop environment of Raspberry Pi from the comfort of your Android phone or tablet. Then, you will be introduced to more complex projects that combine the strengths of the Pi and Android in amazing ways. These projects will teach you how to manage services on the Pi from Android, share files between Android devices using the Pi as a server, administer and view the Pi's camera from Android in surveillance mode, and connect your car to the Pi and make data more accessible using Android. The introductory projects covered will be useful each time you need to access or administer your Pi for other purposes, and the more advanced projects will continue to be valuable even after you become an expert on Pi. By the end of this book, you will be able to create engaging and useful projects that will help you combine the powers of both Android and Raspberry Pi.

Style and approach A quick and easy-to-follow guide that will show how you can add up the power of Pi and Android by combining them.

Handbook of Research on Human Social Interaction in the Age of Mobile Devices Xu, Xiaoge, 2016-06-16 Digital innovations, such as mobile technologies, have had a significant impact on the way people relate to one another, as well as the way they obtain and distribute information. As mobile devices continue to evolve, it has become easier to socialize; however, these mobile advancements have also made certain aspects of interaction more complex. The Handbook of Research on Human Social Interaction in the Age of Mobile Devices features an interdisciplinary perspective on mobile innovations and the use of this technology in daily life. Investigating the successes, issues, and challenges of the utilization of mobile technology, this handbook of research is

a comprehensive reference source for professionals, educators, policymakers, and students interested in the impact these devices have on digital interaction, media, and communication.

Pro Android Wearables Wallace Jackson, 2015-07-07 *Pro Android Wearables* details how to design and build Android Wear apps for new and unique Android wearable device types, such as Google Android smartwatches, which use the new WatchFaces API, as well as health-monitoring features and other cool features such as altimeters and compasses. It's time to take your Android 5 Wear application development skills and experience to the next level and get exposure to a whole new world of hardware. As smartwatches continue to grab major IoT headlines, there is a growing interest in building Android apps that run on these wearables, which are now being offered by dozens of major manufacturers. This means more revenue earning opportunity for today's indie app developers. Additionally, this book provides new media design concepts which relate to using media assets, as well as how to optimize Wear applications for low-power, single-core, dual-core or quad-core CPUs, and how to use the IntelliJ Android Studio IDE, and the Android device emulators for popular new wearable devices.

Mobile Web Information Systems Florian Daniel, George A. Papadopoulos, Philippe Thiran, 2013-07-29 This book constitutes the refereed proceedings of the 10th International Conference on Mobile Web Information Systems, MobiWIS 2013, held in Paphos, Cyprus, in August 2013. The 25 papers (20 full research papers, 4 demonstration papers, and one abstract of the keynote speech) presented were carefully reviewed and selected from various submissions. The papers cover the following topics related to mobile Web and Information Systems (WISs), such as mobile Web services, location-awareness, design and development, social computing and society, development infrastructures and services, SOA and trust, UI migration and human factors, and Web of Things and networks.

Distributed Computing and Artificial Intelligence, 11th International Conference Sigeru Omatu, Hugues Bersini, Juan M. Corchado, Sara Rodríguez, Paweł Pawlewski, Edgardo Bucciarelli, 2014-05-30 The 11th International Symposium on Distributed Computing and Artificial Intelligence 2014 (DCAI 2014) is a forum to present applications of innovative techniques for studying and solving complex problems. The exchange of ideas between scientists and technicians from both the academic and industrial sector is essential to facilitate the development of systems that can meet the ever-increasing demands of today's society. The present edition brings together past experience, current work and promising future trends associated with distributed computing, artificial intelligence

and their application in order to provide efficient solutions to real problems. This year's technical program presents both high quality and diversity, with contributions in well-established and evolving areas of research (Algeria, Brazil, China, Croatia, Czech Republic, Denmark, France, Germany, Ireland, Italy, Japan, Malaysia, Mexico, Poland, Portugal, Republic of Korea, Spain, Taiwan, Tunisia, Ukraine, United Kingdom), representing a truly "wide area network" of research activity. DCAI'14 Special Sessions have been a very useful tool in order to complement the regular program with new or emerging topics of particular interest to the participating community. Special Sessions that emphasize on multi-disciplinary and transversal aspects, such as AI-driven methods for Multimodal Networks and Processes Modeling and Multi-Agents Macroeconomics have been especially encouraged and welcome. This symposium is organized by the Bioinformatics, Intelligent System and Educational Technology Research Group (<http://bisite.usal.es/>) of the University of Salamanca. The present edition was held in Salamanca, Spain, from 4th to 6th June 2014.
