**Warhol-isms** Andy Warhol,2022-05-10 A unique collection of brilliant quotations from the legendary Pop artist One of the most influential artists of his time and ours, Andy Warhol is nearly as renowned for what he said as for what he did. Indeed, he is so quotable that things he never said are endlessly and plausibly attributed to him, including, fittingly, the most celebrated fake Warhol saying—"In the future, everyone will be world-famous for 15 minutes." Warhol-isms separates legend from fact to present a unique and comprehensive collection of authentic quotations from the Pop artist. Gathered from interviews and other primary sources, these deadpan, droll, ironic, and sincere gems—in which a superficial embrace of superficiality often disguises provocative, unconventional ideas—provide compelling insights into the life and work of an artist who has left an indelible mark on art and popular culture. Select quotations from the book: I think an artist is anybody who does something well.I went to [a psychiatrist] once, and he never called me back.They always say that time changes things, but you actually have to change them yourself.I've never met a person I couldn't call a beauty.New things are always better than old things.I'm still a commercial artist. I was always a commercial artist.

**Museum Experience Design** Arnold Vermeeren,Licia Calvi,Amalia Sabiescu,2019-06-06 This state-of-the-art book explores the implications of contemporary trends that are shaping the future of museum experiences. In four separate sections, it looks into how museums are developing dialogical relationships with their audiences, reaching out beyond their local communities to involve more diverse and broader audiences. It examines current practices in involving crowds, not as passive audiences but as active users, co-designers and co-creators; it looks critically and reflectively at the design implications raised by the application of novel technologies, and by museums becoming parts of connected museum systems and large institutional ecosystems. Overall, the book chapters deal with aspects such as sociality, creation and sharing as ways of enhancing dialogical engagement with museum collections. They address designing experiences - including participatory exhibits, crowd sourcing and crowd mining - that are meaningful and rewarding for all categories of audiences involved. Museum Experience Design reflects on different approaches to designing with novel technologies and discusses illustrative and diverse roles of technology, both in the design process as well as in the experiences designed through those processes. The trend of museums becoming embedded in ecosystems of organisations and people is dealt with in chapters that theoretically reflect on what it means to design for ecosystems, illustrated by design cases that exemplify practical and methodological issues in doing so. Written by an interdisciplinary group of design researchers, this book is an invaluable source of inspiration for researchers, students and professionals working in this dynamic field of designing experiences for and around museums.
