Build Your Own Free to Air Antenna Solution Ryan Seager,2013-10-07 This book will show you how to build a simple yet effective Free-To-Air Antenna solution that will allow you to get free High Definition channels on your television. Are you fed up with monthly Cable TV bills? The days of the 'rabbit-ears' and fuzzy reception are over! Television signals are now transmitted over the airwaves as high definition signals that can be freely accessed with the right equipment. Now anyone can eliminate their monthly Cable bill with this Free HDTV solution. There is no need for a de-scrambler, a converter or any other high-tech devices. You can build your own antenna with simple low cost materials. This can be a fun and educational project for any individual or a whole family. This

solution has been implemented and tested first hand by the author. It works! Includes a list of all materials needed. The easy step-by-step instructions include tons of clear photographs so you can see at a glance what each step involves. This solution works on virtually any television sold since 2009. All you need is ANT 1 IN connection on the back of your tv (an antenna connection). This does not require a satellite or have anything to do with satellite technology. Almost all networks now broadcast using HD signal technology and more channels are being added all the time. You no longer have to worry about poor reception from old UHF/VHF signals. Build this antenna and get crisp, clear channels for free! Say goodbye to your cable company! Be the first person on your street with completely legal AND free cable channels!

Build A 35' Free Standing Tilt-Over Antenna Tower David J. Gingery,2015-05-21 Whether you're a ham radio operator, CB operator or an FM or TV buff you will probably have considered installing a tower to raise your antenna for better performance. And then you discovered how much such improvements cost. The good news is that it is entirely practical to build one yourself and this guide will show you how. Standard water pipe in 1 and 1/2 size and 3/4 electrical conduit are welded up with 3/8 rebar and 1/4 hot rolled bar to form the column. Pivoted at the 12' height, it tilts over with a light duty boat trailer winch so that you never need climb it to work on the antenna. Set in a full cubic yard of concrete, it needs no annoying hazardous guy wires to spoil your yard. The one depicted here has withstood five years of Missouri high winds without harm, though large trees were ripped

out. It's a simple durable design. You'll need an arc welder capable of 75 amps, a hacksaw, some clamps, plywood for the jigs and standard hardware items. Complete step by step instructions with illustrations.

Antennas & Streaming Ken N. Wickham, 2014-06-10 This book helps guide you to plan, set up, and integrate antenna and streaming services into your entertainment system. The antenna section covers basic steps to planning what type of TV antenna you will need, and helps you find and use free online tools. Four sites and tools help you to discover over-the-air broadcast TV available for your area that your antenna can receive. Step-by-step installing roof antennas is not covered in this guide, rather it lists some of the available parts of an outdoor antenna system. The streaming section covers basic steps to planning what type of streaming device and service you will need, and helps you find and use free online tools. Three free online content search engines are explained and demonstrated. It also has 3 charts and information comparing over 20 devices. Links are presented for online Network content. Recommends the best devices and streaming services for different situations.

Power Gains for Antennas Over Lossy Plane Ground Mark T. Ma, Lillie C. Walters, 1969 Theoretical power-gain formulas for 13 different antenna models above a flat homogeneous lossy ground are derived in terms of frequency, antenna geometrics, and ground constants. The radiation

resistance required in the formulation is calculated with an assumed sinusoidal current distribution.
