*A Practical Introduction to Real-World Research* Loreen Wolfer, 2021-01-15 This practical text combines social research methods with coverage of statistical analysis to help students develop the applied research skills needed for future careers in public and private organizations, while also

delivering a solid foundation for those going on to graduate school. Throughout the book, the author offers a real-world example and then breaks it down into a decision tree, which helps lead students to a possible statistical decision (rather than starting with the statistic). This text gives students a toolbox of the most common and in-demand skills and demonstrates how those skills can be used to make the best research decisions. The book takes students through the entire real-world research process, from the formation of a research topic to measurement and sampling, to methods for gathering information and making sense of the data, and finally presenting to a non-academic audience in a way that gets the job done. Resources for instructors and students are available on an accompanying website for the book.

**The Best of Brush Country Bull 1977-1980** Henry B. Briscoe, 2012-03-14 A Depression-bred, Texas-style Mark Twain recaptures the life of the Brush Country and the heart of America. The best articles from the "Brush Country Bull" weekly newspaper column (1977-2005) in The Devine News by Henry B. Briscoe. Henry Briscoe had quite a life. It began simply on a Depression-era dairy farm near Devine, Texas, continued at Texas Tech University, and then took a 180-degree turn to the military. In the Air Force, Henry flew transport planes around the world, commanded a squadron in Vietnam, and assisted the Joint Chiefs of Staff at the Pentagon. But that Devine boyhood had a strong hold on him—spiny cactus, rattlesnakes, horny toads and all—so he settled there when his 25-year Air Force career was over. Soon after his return, Henry organized a deer-hunting contest and wrote an article about it in The Devine News. The town folk loved it, so he wrote another. And another. Thus began "Brush Country Bull," a folksy column that would run weekly for 27 years and recall, denounce, poke fun, and celebrate quite literally, EVERYTHING. With a range as big as Texas, Henry "jawed" about midnight buck hunting, dropping bulldozers on an ice island at the North Pole, making deer sausage, supporting the Devine Fire Department, critiquing elected officials, and learning the names of migrating birds. And that's just a sampling. So git you a good cup of coffee, head on out to that porch swing, and spend a little time with Henry.

Land, Water and Development Malcolm Newson, 2008-09-17 Water is newsworthy: there is, or will be, a world water crisis. Aggravated by climate change, we are approaching the limits of human exploitation of freshwater resources, notably in growing essential food. The complexities and uncertainties associated with improving our management of fresh water take the potential remedies out of the hands of simple, local, hard engineering and into much larger units - the basin, the ecosystem and the global context, and also require longer term perspectives. The Third Edition follows the same structure as its predecessors, presenting the historical and scientific backgrounds to land-water interactions and establishing the links with development processes and policies. Throughout, its two major messages are that our new philosophy should be one of 'humans in the ecosystem' and that the guidance from science, being uncertain and contested, must be operationalized in a participatory system of governance based on participation. Following a review of progress towards these elements in the developed world, the international case studies

update the situation in the developing world following the Millennium Development Goals, our new emphasis on poverty and on global food supplies. This book covers the multitude of scientific research findings, development of 'tools' and spatial/temporal scale challenges which have emerged in the last decade. Tensions are highlighted in the current and future role of large dams, country studies are retained (and considerably updated) and development contexts are explored in greater depth as a dividing line in capacity to cope with land and water stress. Technical issues have been expanded to cover major droughts, environmental flows and the restoration of rivers and wetlands. A separate chapter picks up these themes under terms of their relationship with uncertainty and the widespread perception that a new ethos of adaptive management is needed in the water sector. For students of geography, environmental science, hydrology, and development studies this innovative edition provides a reasoned, academic basis of evidence for sustainable, adaptive management of rivers and related large-scale ecosystems using more than 600 new sources. It will also prove invaluable for lecturers and practitioners.
