Bluetooth Remote Control for Arduino Using Android Herb Norbom,2019-03-08 This book is for the intermediate to advanced Arduino user. The reader will learn how to develop Arduino applications for the Uno and Nano that drive robots using an Android device. The remote control will use Bluetooth for communications. The Android software application is developed using the MIT App Inventor software. The MIT App Inventor is also under development for the iOS. It may become available soon.One project will use continuous rotation micro servos and the Nano. The second project will use the Uno and geared DC motors. The second project also contains a micro servo for rotating the Ultra-Sonic Sensor. Both projects will use HC-06 Bluetooth devices, the HC-05 will also work with possible minor wiring changes.With the Arduino the software developed is the same for the Uno and Nano, minor changes for uploading occur. The reader can substitute Arduino devices as desired. Possible wiring changes may be necessary depending on the device.The projects were developed on a Windows 10 PC and a Samsung Galaxy smartphone. While not tested the projects will probably work on Linux and OS platforms with some changes.The MIT App Inventor software is free and must be downloaded to your PC. Applications developed are stored in the cloud. A Google account is required, if you use Google mail you already have the account. The book does not go into details on the MIT App Inventor use. We recommend that the reader go through some of the excellent tutorials on-line. The book does provide compete screen shots of the MIT App Inventor Designer and Blocks used. The MIT app is very intuitive and quite powerful. This app greatly simplifies the development of Android applications. This book includes the printed source code and wiring diagrams for the projects. The electronic or digitized source code is available to download for an additional fee for a limited time. While not covered in this book one can easily see the development of many applications for smartphones and tablets.

Where's My Wand? Eric Poole,2010-05-27 Gut-splittingly funny...a deeply moving account of a boy's attempt to control his world with his own brand of magic. --People magazine, 4 stars. Tracey Ullman once described Eric Poole as the best undiscovered writer I ever met. Now the world can enjoy his achingly honest wit and gift for capturing real life characters in this memoir about growing up in the 1970's with an obsessive-compulsive mother and a crush on Endora from Bewitched.

Blown to Bits Harold Abelson,Ken Ledeen,Harry R. Lewis,2008 'Blown to Bits' is about how the digital explosion is changing everything. The text explains the technology, why it creates so many surprises and why things often don't work the way we expect them to. It is also about things the information explosion is destroying: old assumptions about who is really in control of our lives.

Remote Control Caetlin Benson-Allott,2015-01-29 Object Lessons is a series of short, beautifully designed books about the hidden lives of ordinary things. While we all use remote controls, we understand little about their history or their impact on our daily lives. Caetlin Benson-Allot looks back on the remote control's material and cultural history to explain how such an innocuous media accessory has changed the way we occupy our houses, interact with our families, and experience the world. From the first wired radio remotes of the 1920s to infrared universal remotes, from the homemade TV controllers to the Apple Remote, remote controls shape our media devices and how we live with them. Object Lessons is published in partnership with an essay series in The Atlantic.
