Appified Jeremy W Morris,Sarah Murray,2018-10-23 Snapchat. WhatsApp. Ashley Madison. Fitbit. Tinder. Periscope. How do we make sense of how apps like these-and thousands of others-have embedded themselves into our daily routines, permeating the background of ordinary life and standing at-the-ready to be used on our smartphones and tablets? When we look at any single app, it's hard to imagine how such a small piece of software could be particularly notable. But if we look at a collection of them, we see a bigger picture that reveals how the quotidian activities apps encompass are far from banal: connecting with friends (and strangers and enemies), sharing memories (and personally identifying information), making art (and trash), navigating spaces (and reshaping places in the process). While the sheer number of apps is overwhelming, as are the range of activities they address, each one offers an opportunity for us to seek out meaning in the mundane. Appified is the first scholarly volume to examine individual apps within the wider historical and cultural context of media and cultural studies scholarship, attuned to issues of politics and power, identity and the everyday.

Digital gambling brings gambling closer to the practices and features of videogames, as audio-visual simulations structure users' experiences. By studying digital gambling from media studies, videogame and cultural studies approaches, this book offers a new critical perspective on the issues raised by computer-mediated gambling, while expanding our perspective on what media and gambling are. In particular, it critically analyses terrestrial, mobile and online slot machines, online poker and stock trading apps through a selection of case studies.

The Crowdsourced Panopticon Jeremy Weissman,2021-02-25 Behind the omnipresent screens of our laptops and smartphones, a digitally networked public has quickly grown larger than the population of any nation on Earth. On the flipside, in front of the ubiquitous recording devices that saturate our lives, individuals are hyper-exposed through a worldwide online broadcast that encourages the public to watch, judge, rate, and rank people's lives. The interplay of these two forces - the invisibility of the anonymous crowd and the exposure of the individual before that crowd - is a central focus of this book. Informed by critiques of conformity and mass media by some of the greatest philosophers of the past two centuries, as well as by a wide range of historical and empirical studies, Weissman helps shed light on what may happen when our lives are increasingly broadcast online for everyone all the time, to be judged by the global community.

Salomon und Markolf - BSB Cgm 579 Gregor Hayden,1500 Englische Version: Der Ackermann aus Böhmen (1401) is, with the exception of a few Latin verses, the only surviving work by the notary, scribe and school principal Johannes from Teplá (Saaz) and is one of the most important German-language prose works of the late Middle Ages. It is the forensic dispute between death and its plaintiff, i.e. the wailer and accuser, who is styled as a farmhand and challenges death to a dispute about the early loss of his wife. But he is not a simple farmer, his plough is his poetic feather. The final prayer for his wife contains the name John as an acrostic. Despite autobiographical echoes and coping with the experience of loss, the work is more a fundamental discussion of the conditions of human existence. Death's defensive speeches often alternate ironically with the widower's grievances until the plaintiff is awarded the honour by divine arbitration, but death is awarded victory by judgement. The farmhand copy in Cgm 579 on leaf 40ra-55ra that is often superior to other text evidence was perhaps written in Egerland by an Upper Palatine Bohemian scribe in a liquid Bastarda Gothic script and is only structured with red chapter headings and simple initials. // Autor: Peter Czoik // Datum: 2016
