Adrian West

The Stars Hans Augusto Rey,1980 Written with the primary purpose of enabling everyone to gain more pleasure from stargazing.

The Last Stargazers Emily Levesque,2020-08-04 The story of the people who see beyond the stars—an astronomy book for adults still spellbound by the night sky. Humans from the earliest civilizations through today have craned their necks each night, using the stars to orient themselves in the large, strange world around them. Stargazing is a pursuit that continues to fascinate us: from Copernicus to Carl Sagan, astronomers throughout history have spent their lives trying to answer the biggest questions in the universe. Now, award-winning astronomer Emily Levesque shares the stories of modern-day stargazers in this new nonfiction release, the people willing to adventure across high mountaintops and to some of the most remote corners of the planet, all in the name of science. From the lonely quiet of midnight stargazing to tall tales of wild bears loose in the observatory, *The Last Stargazers* is a love letter to astronomy and an affirmation of the crucial role that humans can and must play in the future of scientific discovery. In this sweeping work of narrative science, Levesque shows how astronomers in this scrappy and evolving field are going beyond the machines to infuse creativity and passion into the stars and space and inspires us all to peer skyward in pursuit of the universe's secrets.

Unwinding Anxiety Judson Brewer, 2021-03-09 New York Times and Wall Street Journal bestseller A step-by-step plan clinically proven to break the cycle of worry and fear that drives anxiety and addictive habits We are living through one of the most anxious periods any of us can remember. Whether facing issues as public as a pandemic or as personal as having kids at home and fighting the urge to reach for the wine bottle every night, we are feeling overwhelmed and out of control. But in this timely book, Judson Brewer explains how to uproot anxiety at its source using brain-based techniques and small hacks accessible to anyone. We think of anxiety as everything from mild unease to full-blown panic. But it's also what drives the addictive behaviors and bad habits we use to cope (e.g. stress eating, procrastination, doom scrolling and social media). Plus, anxiety lives in a part of the brain that resists rational thought. So

we get stuck in anxiety habit loops that we can't think our way out of or use willpower to overcome. Dr. Brewer teaches us to map our brains to discover our triggers, defuse them with the simple but powerful practice of curiosity, and to train our brains using mindfulness and other practices that his lab has proven can work. Distilling more than 20 years of research and hands-on work with thousands of patients, including Olympic athletes and coaches, and leaders in government and business, Dr. Brewer has created a clear, solution-oriented program that anyone can use to feel better - no matter how anxious they feel.
