**Arab Media** Noha Mellor,Khalil Rinnawi,Nabil Dajani,Muhammad I. Ayish,2013-05-20 This book provides a clear and authoritative introduction to the emerging Arab media industries in the context of globalization and its impacts, with a focus on publishing, press, broadcasting, cinema and new media. Through detailed discussions of the regulation and economics of these industries, the authors argue that the political, technological and cultural changes on the global media scene have resulted in the reorganization of the Arab media field. They provide striking examples of this through the particular effects on media policies, media technology and the content and genres developed for the new generation of media consumers. As part of the book's overview of the contemporary characteristics of Arab media, the authors outline the development of the role of modern Arab media from a tool of mobilizing the public to a tool of commercial and symbolic profit. Overall, the volume illustrates how the Arab region represents a unique case where the commercialization and liberalization of selected media industries has gone hand in hand with continuous state intervention and an increasing self censorship. Written for students without prior knowledge of the topic, Arab Media will be essential reading for all interested in the contemporary global media industries.

*Video Games Around the World* Mark J. P. Wolf,2015-05-01 Thirty-nine essays explore the vast diversity of video game history and culture across all the world's continents. Video games have become a global industry, and their history spans dozens of national industries where foreign imports compete with domestic productions, legitimate industry contends with piracy, and national identity faces the global marketplace. This volume describes video game history and culture across every continent, with essays covering areas as disparate and far-flung as Argentina and Thailand, Hungary and Indonesia, Iran and Ireland. Most of the essays are written by natives of the countries they discuss, many of them game designers and founders of game companies, offering distinctively firsthand perspectives. Some of these national histories appear for the first time in English, and some for the first time in any language. Readers will learn, for example, about the rapid growth of mobile games in Africa; how a meat-packing company held the rights to import the Atari VCS 2600 into Mexico; and how the Indonesian MMORPG Nusantara Online reflects that country's cultural history and folklore. Every country or region's unique conditions provide the context that shapes its national industry; for example, the long history of computer science in the United Kingdom and Scandinavia, the problems of piracy in China, the PC Bangs of South Korea, or the Dutch industry's emphasis on serious games. As these essays demonstrate, local innovation and diversification thrive alongside productions and corporations with global aspirations.
