Alarabia: A Communicative Approach to Learning Arabic for Non-Native Speakers Mahmoud Amer, 2010-08-19 This book is meant to assist students learning Arabic with the basics in communication and sentence structure. Because this book focuses on the communicative aspect of using Arabic, the first few chapters will introduce students to expressions in everyday speech in a colloquial Jordanian dialect. In later chapters, however, texts written in Modern Standard Arabic (MSA) are presented and examined.

Novel Text Entry and Mobile Interaction Techniques for Arabic Language Users Karim Mohsen Mahmoud El Batran, 2015 Inspired by an observational study of Egyptian Agricultural Census counters, this research aims to improve mobile data entry through better form navigation and improved Arabic text entry. Four improvements were taken into consideration in sequence: (1) minimizing large forms to fit small mobile device screens and easing form navigation process, (2) optimizing Arabic keyboard layout to suit Arabic Language users, (3) introducing Gesture-based Arabic Writing Pads (GBAWPs) that fit small mobile device screens and smart watch surfaces, and (4) enhancing a quantitative prediction model to overcome the defect in modeling interactions on mobile devices. This research shows an improvement of form navigation on mobile devices. The approach is based on computerizing forms and using Panning and Zooming as a navigation technique. In order to do so, an observational study was conducted on the Egyptian Agricultural Census (EAC). However, there were considerable challenges in reducing the size of the paper forms to fit mobile devices and introducing fast navigation technique. It was concluded after computerizing the forms that using the Panning and Zooming technique scored less completion task time and workload in comparison to the tabbed navigation technique. Moreover, this research presents a new design of an Arabic keyboard

layout for effective text entry on touch screen mobile phones. The approach is based on Pareto front optimization using three metrics: minimizing finger travel distance in order to maximize speed, minimizing neighboring key error ambiguities in order to maximize the quality of spell correction, and maximizing familiarity for Arabic Language users through approximate alphabetic sorting. In user studies, the new layout showed an observed improvement in typing speed in comparison to a common Arabic layout. Currently, there is an opportunity to research new optimized keyboard designs with less usage experience than QWERTY as in mainstream Western European languages. Pareto optimization can produce high quality keyboards for alphabet based languages that could be beneficial when there is less reluctance to change from QWERTY. Furthermore, this research also illustrates Gesture-based text entry as a method used for mobile devices. Its success and acceptance is critically dependent on the reliability of gesture recognition. The gesture recognition of the GBAWP is accomplished through a sequence of touched points or swipes on the screen. In order to maximize the text area field and minimize the number of keys displayed on the screen, a 12-key GBAWP interface was introduced appearing like a 12-key physical keypad phone. Considering the Arabic letters characteristics, structure, and maximizing speed, a 6-key GBAWP layout based on dot recognition was introduced. After conducting usability tests on both the 12-key and 6-key GBAWP, it was found that users could perform text entry on mobile devices using the 12-key GBAWP with an estimate of 2.9 words-per-minute on average. They also executed text entry tasks on a Sony SmartWatch 2 with an average of 3.2 words-per-minute. This could increase to an estimate of 4.5 words-per-minute on average, on the long term. While entry speeds were slow, users found it easy to use and it supports largely eyes free interaction. Gesture-based technique enables users to perform Arabic text entry on small display mobile devices and watches using both the 12-key and 6-key

GBAWP. Finally, this research introduces an enhancement to KLM (Keystroke-Level Model), a quantitative prediction model predicting the user's behaviour in low-level tasks. This was accomplished by extending it with three new operators describing interactions on mobile touchscreen devices and tablets. The approach is based on Fitts' Law to identify a performance measure estimate equation for each of the introduced interactions. Three prototypes were developed to serve as a test environment in validating Fitts equations and estimating the parameters for these interactions. Three-thousand and ninety observations took place with a total of 51 users. The studies confirmed that most interactions fitted well with Fitts' Law. On the other hand, it was noticed that Fitts' Law does not fit well on small mobile device screens when the Index of Difficulty exceeds 4 bits. These results enable developers of mobile device and tablet applications to describe tasks as a sequence of operators used and predict user interaction times prior to creating prototypes.

Using Linguistically Appropriate Practice Roma Chumak-Horbatsch, 2019-08-08 The presence of students for whom the school language is not their first language creates unique challenges and opportunities for teachers. This book provides an accessible guide to multilingual teaching using Linguistically Appropriate Practice (LAP) in diverse classrooms worldwide. It is firmly grounded in the latest research on multilingual learners and takes a realistic approach to teaching in linguistically diverse schools today. The author argues that successful multilingual teaching is an option for all teachers, and that it has benefits for every child in the classroom, as well as the wider school community. The book: - provides profiles of LAP in action around the world; - explains the relationship between theory and multilingual practice; - lays out the characteristics of the LAP teacher and the LAP classroom; - discusses challenges that have been identified by teachers using LAP in their classrooms; - provides a step-by-step guide to implementing and enriching LAP; - includes resources to support

multilingual teaching and learning. This book is an invaluable support and inspiration for practising teachers and trainee teachers. It will help them transform their classrooms into multilingual environments where all children have equal opportunity to participate, learn and grow.

Proceedings of the Applied Linguistics and Language Teaching Conference (ALLT) 2018: Teaching and Learning in a Globalised World Wafa Zoghbor, Suhair Al Alami, Thomaï Alexiou, 2019-03-03 Edited by: Wafa Zoghbor, Suhair Al Alami, & Thomaï Alexiou This volume contains a selection of eighteen articles that originated as papers presented at the Applied Linguistics and Language Teaching International Conference and Exhibition (ALLT 2018), which was held at Zayed University, Dubai, United Arab Emirates, in March 2018. The articles selected for inclusion showcase high quality contributions that document theory, research, and pedagogy within the field of Applied Linguistics and language teaching in the Arab Gulf and beyond. The articles are grouped into the following five broad sections: • Teaching of Writing Skills • Professional Development • Young Learners • Teaching, Learning, and Pedagogy • Language Teaching and Attitude The articles included in this volume represent the diverse background, experiences, and research interests of the ALLT presenters. The contributions are a mix of theoretical, empirical and pedagogical practices with a strong emphasis on English language use and function along with language teaching. This makes the Proceedings of the Applied Linguistics and Language Teaching (ALLT 2018) Conference an invaluable resource, addressing important aspects of contemporary research topics and lesson plans on language teaching.

Information Sources in Information Technology David Haynes,2013-02-07 The aim of each volume of this series Guides to Information Sources is to reduce the time which needs to be spent on patient searching and to recommend the best starting point and sources most likely to yield the desired information. The criteria for selection provide a way into a subject to those new to the field and assists in identifying major new or possibly unexplored sources to those who already have some acquaintance with it. The series attempts to achieve evaluation through a careful selection of sources and through the comments provided on those sources.

Validation of Score Meaning for the Next Generation of Assessments Kadriye Ercikan, James W. Pellegrino, 2017-03-27
Despite developments in research and practice on using

examinee response process data in assessment design, the use of such data in test validation is rare. *Validation of Score Meaning in the Next Generation of Assessments Using Response Processes* highlights the importance of validity evidence based on response processes and provides guidance to measurement researchers and practitioners in creating and using such evidence as a regular part of the assessment validation process. Response processes refer to approaches and behaviors of examinees when they interpret assessment situations and formulate and generate solutions as revealed through verbalizations, eye movements, response times, or computer clicks. Such response process data can provide information about the extent to which items and tasks engage examinees in the intended ways. With contributions from the top researchers in the field of assessment, this volume includes chapters that focus on methodological issues and on applications across multiple contexts of assessment interpretation and use. In Part I of this book, contributors discuss the framing of validity as an evidence-based argument for the interpretation of the meaning of test scores, the specifics of different methods of response process data collection and analysis, and the use of response process data relative to issues of validation as highlighted in the joint standards on testing. In Part II, chapter authors offer examples that illustrate the use of response process data in assessment validation. These cases are provided specifically to address issues related to the analysis and interpretation of performance on assessments of complex cognition, assessments designed to inform classroom learning and instruction, and assessments intended for students with varying cultural and linguistic backgrounds.
