*Paths of Vengeance* Saurav H,2019-10-09 In a world where magic reigns supreme, nineteen-year-old R. Morcen is the seventh Soul-Wizard of the Arcane Academy, essentially the most powerful being on the Lost Continent. Promoted to the highest wizarding rank in the Academy, he begins to discover that the daily life at the Academy as he knew it was but a smiling facade, with deep dark secrets being covered up and whispered to one another behind the backs of the others. Simultaneously, in the condemned half-elf city of Edgewood, Xero Batlissa lives the way of the sword, having such skill and speed with the blade that he is often referred to as the golden ghost of the Edgewood. However, since the half-elf race have been scorned and held in contempt from time immemorial, his feats gather no fame and recognition outside his sheltered community. Life, however, is not all song and dance, as the two come to realise quickly under completely different circumstances and when their peaceful world of the Lost Continent suddenly turns chaotic, the all-important questions that surface up are but simple ones. In this epic tale of snow and flame; steel and shadow; the orcs and the undead; dragons, demons and eternal darkness, is there really any hope left at all for the goodly races? If society is supposedly governed by wisdom, then why is it that the clueless broken world is deemed right in our logical stead? What is good any longer, if another's perspective of the same good is evil? What is real anymore; and what then is not?

Crossroads Vinayak Mittal,2016-11-28 FOUR WARRIORS ONE BREATHTAKING MISSION UNCOUNTABLE NUMBER OF DEATHS ONE SINGLE AIM Suröta clan's hopes of finding the lost information is carried out by four brave warriors, Jaden, a ten-year-old kid, Frank, a powerful, bulky teenager, and best friend to Jaden, Rose, a beautiful young girl known for her stealth, and Arthur, the teen king of Suröta. Getting the information won't be easy. The lost information lies in the Arctic, a region feared by any warrior. But our heroes are adamant on getting the information. Also, this could be Jaden's chance to meet his long lost father. Jaden hopes to find his father but his sole objective is the quest. It would be the end of the world if the quest fails. The quest is one breathtaking experience, one packed with action and adventure. Our heroes wish to complete the quest, but the prophecy states that maybe, not all of them would turn out alive. This is a race against death to retrieve the lost glory of Suröta. WILL OUR HEROES SUCCEED? OR FALL TO THEIR DEATHS?

**Neural and Brain Modeling** Ronald MacGregor, 2012-12-02 Neural and Brain Modeling reviews  
models used to study neural interactions. The book also discusses 54 computer programs that  
simulate the dynamics of neurons and neuronal networks to illustrate between unit and systemic levels  
of nervous system functions. The models of neural and brain operations are composed of three  
sections: models of generic mechanisms; models of specific neuronal systems; and models of generic  
operations, networks, and systems. The text discusses the computational problems related to  
galvanizing a neuronal population through an activity in the multifiber input system. The investigator can  
use a computer technique to simulate multiple interacting neuronal populations. For example, he can  
investigate the case of a single local region that contains two populations of neurons: namely, a parent  
population of excitatory cells, and a second set of inhibitory neurons. Computer simulation models  
predict the various dynamic activity occurring in the complicated structure and physiology of neuronal  
systems. Computer models can be used in top-down brain/mind research where the systemic, global,  
and emergent properties of nervous systems are generated. The book is recommended for behavioral  
scientists, psychiatrists, psychologists, computer programmers, students, and professors in human  
behavior.

**The Nolan Variations** Tom Shone,2020-11-03 An in-depth look at Christopher Nolan, considered to be the most profound, commercially successful director at work today, written with his full cooperation. A rare, revelatory portrait, as close as you're ever going to get to the Escher drawing that is Christopher Nolan's remarkable brain (Sam Mendes). In chapters structured by themes and motifs (Time; Chaos; Dreams), Shone offers an unprecedented intimate view of the director. Shone explores Nolan's thoughts on his influences, his vision, his enigmatic childhood past--and his movies, from plots and emotion to identity and perception, including his latest blockbuster, the action-thriller/spy-fi *Tenet* (Big, brashly beautiful, grandiosely enjoyable--*Variety*). Filled with the director's never-before-seen photographs, storyboards, and scene sketches, here is Nolan on the evolution of his pictures, and the writers, artists, directors, and thinkers who have inspired and informed his films. Fabulous: intelligent, illuminating, rigorous, and highly readable. The very model of what a filmmaking study should be. Essential reading for anyone who cares about Nolan or about film for that matter.--Neal Gabler, author of *An Empire of Their Own: How the Jews Invented Hollywood* and *Walt Disney, The Biography*
