Area 51 Annie Jacobsen,2011-05-17 This compellingly hard-hitting bestseller from a Pulitzer Prize finalist gives readers the complete untold story of the top-secret military base for the first time (New York Times). It is the most famous military installation in the world. And it doesn't exist. Located a mere seventy-five miles outside of Las Vegas in Nevada's desert, the base has never been acknowledged by the U.S. government — but Area 51 has captivated imaginations for decades. Myths and hypotheses about Area 51 have long abounded, thanks to the intense secrecy enveloping it. Some claim it is home to aliens, underground tunnel systems, and nuclear facilities. Others believe that the lunar landing itself was filmed there. The prevalence of these rumors stems from the fact that no credible insider has ever divulged the truth about his time inside the base. Until now. Annie Jacobsen had exclusive access to nineteen men who served the base proudly and secretly for decades and are now aged 75-92, and unprecedented access to fifty-five additional military and intelligence personnel, scientists, pilots, and engineers linked to the secret base, thirty-two of whom lived and worked there for extended periods. In Area 51, Jacobsen shows us what has really gone on in the Nevada desert, from testing nuclear weapons to building super-secret, supersonic jets to pursuing the War on Terror. This is the first book based on interviews with eye witnesses to Area 51 history, which makes it the seminal work on the subject. Filled with formerly classified information that has never been accurately decoded for the public, Area 51 weaves the mysterious activities of the top-secret base into a gripping narrative, showing that facts are often more fantastic than fiction, especially when the distinction is almost impossible to make.

Area 51 Nick Redfern,2019-01-01 A revealing look at the secrets behind the most controversial U.S. Air Force base It's no secret that, roughly 100 miles north northwest of Las Vegas, in the middle of a remote dessert, sits an extension of the Edwards Air Force facility commonly known as Area 51, but its clandestine purpose and operations remain shrouded in secrecy. It's a highly classified, restricted area, but, cloaked in conspiracy theories, its history and true function remain a mystery. Is it only devoted to flight testing experimental aircraft and building black ops weapons systems as some contend? Or is it home to a dead alien, crashed UFOs, and extraterrestrial technology...? Or all of the above? Taking a thorough review of the historical record, eyewitness accounts, whistleblower testimony, and deathbed confessions, Area 51: The Revealing Truth of UFOs, Secret Aircraft, Cover-Ups and Conspiracies peers behind the classified secrets to understand the nature, history, and scope of the most controversial base in the United States. Redfern investigates the Cold War years, U-2 spy plane, SR-71 Blackbird, and chemical and nuclear weapon research as well as the base's link to an extraterrestrial presence on Earth, reports of alien autopsies, recovery of non-terrestrial spacecraft, and attempts to duplicate the fantastic, alien technology. From UFOs to secret aircraft and the CIA, shadowy government programs and unexplained events surrounding Area 51 are illuminated, including ... The government's Nevada land-grab at Paradise Ranch The U-2, the Blackbird, and the A-12 tests, refinements, and flights The Robert Scott Lazar revelations Roswell Incident and Project Mogul The development of "black helicopters" The "Autopsies - Bodies Unknown Origin 47" file Intelligence gathering through ESP, parapsychological, and mind control Secret research on teleportation Vast, hollowed-out chambers, tunnels, and hidden underground facilities And much, much more!!!

Area 51 - Black Jets Bill Yenne,2018-02-20 Area 51's most important military aviation developments are profiled in an illustrated format. When most of us think of Area 51, we think of aliens, UFOs, and controversial government cover-ups. It's easy to forget that, since the mid-1950s, the United States' famed extension of Edwards Air Force Base has served as a top-secret CIA testing ground for many of the most groundbreaking advancements in American military aviation technology. In Area 51 - Black Jets, author and military historian Bill Yenne offers the first fully illustrated chronology of Area 51's most famous aircraft projects, including Lockheed's U-2 Dragon Lady and SR-71 Blackbird reconnaissance planes, drones ranging from the early Lockheed D-21 to the modern-day General Atomics MQ-1 Predator, and the famous F-117 Nighthawk stealth fighter produced by the Have Blue program during the 1970s. Each project is given its own fascinating chapter illuminating the aircraft's development at this famed location. But beyond the aircraft themselves, Area 51 - Black Jets also covers a handful of the many classified experimental programs carried out at Area 51 over the years, such as Have Doughnut, Have Ferry, and Have Drill - secret undertakings that successfully reverse-engineered such enemy aircraft as the Russian MiG during the Cold War. Presented in beautiful hardcover format and illustrated with historic color and black-and-white photographs, diagrams, and maps, this book reveals Area 51 for what it truly is: a clandestine area for the United States' most cutting-edge technological innovators in military aviation.

Area 51 Dwight Zimmerman,2014-11-15 The actual history of the United States' worst-kept military secret revealed in graphic format. Though nearly everyone has heard of it, almost no one has known anything about it . . . until now. Located in the remote Nevada desert near the dry bed of Groom Lake, Area 51 is the most famous military installation in the world that doesn't officially exist. In Area 51, author Dwight Zimmerman and artist Greg Scott unravel the real history - minus the aliens and sci-fi movie plots - revealing in detail how for more than 60 years, the CIA, the U.S. Air Force, and aerospace company Lockheed Martin have all used Area 51 as a staging ground for test flights of experimental or highly classified aircrafts. Scott illustrates the Archangel-12 as well as follow-on aircrafts, such as the U-2, the SR-71 Blackbird, and the F-117 Nighthawk stealth fighter, while author Zimmerman tells the history of how they sprang from the research and development conducted at Area 51. This first-of-its-kind graphic history strips away the fantastical aspects of this mysterious location and establishes the actual, significant history made there. Zimmerman's rendition of the Area 51 story is a walk down memory lane for this former USAF insider. It superbly captures the history, mystery and folklore of one of America's best-kept secrets. Riveting, accurate, and thought-provoking for anyone with - and even those without - a Need-to-Know! - Michael Angley Colonel, USAF (ret) Special Agent, OSI (ret) Of all the books written about Area 51, the best and most accurate is the striking new graphic history written by best-selling author Dwight Jon Zimmerman and expertly illustrated by comic-book artist Greg Scott. Military historians and aviation enthusiasts will love it, as will anyone else who wants a fascinating and easy-to-digest history of America's most secret site. UFO enthusiasts,

conspiracy theorists and sci-fi fans might not find exactly what they're looking for here (though I suspect they'll enjoy it too), but this is the real story of the place where a handful of intelligence chiefs, aeronautical engineers and test pilots made history and changed the world. - Nick Pope (UK Ministry of Defense, 1985-2006)

Area 51 David Darlington,2014-01-07 Area 51, Dreamland, Groom Lake, Paradise Ranch, Watertown Strip, the Box: all refer to the top-secret research installation, located a hundred miles north of Las Vegas, which, for many, has come to stand for all that is shadowy and nefarious about the military-industrial-intelligence complex. Built under the direction of the CIA in the 1950s, the base served as the original test site for the U-2 spy plane and F-117 stealth fighter jet. In more recent years, Area 51 has spurred public interest from its role in the government's \$30 billion Black Budget, from legal claims of worker illness due to toxic burning, and from sensational charges about captured alien spacecraft. It has also given birth to a feisty guerrilla subculture bent on exploding the secrecy surrounding this mysterious spot. David Darlington unfolds the history, legs, and characters involved with Area 51, weaving a weird tale of intrigue and outrage and UFOs that speaks volumes about popular culture and American democracy at the of the twentieth century.

CIA Station D--Area 51 TD Barnes,2022 This is the first true story that uncovers Area 51 from a CIA insider's point of view. The veteran of Area 51 tells on the challenges, sacrifices, and accomplishments of those serving at Area 51. The CIA's recent declassification of secret documents have identified the CIA facility as Station D - Area 51, the most secretive and a power projection venue for testing secret, high-flying spy planes, developing stealth technology, conducting aerial reconnaissance, and exploiting acquired US adversaries' military assets. Giving particular details on the CIA's stealth-designed Mach 3 A-12 Blackbird aircraft, the highest flying and fastest manned, air-breathing plane ever, flying 2850 secret sorties out of Area 51. Area 51 was the genesis for the Navy's Top Gun Weapons School and the Air Force's Red Flag Exercises. The book includes a considerable amount of new material that no one, particularly in the United States, knows; some that even the Agency today had no idea went on. For the first time, the book details how the CIA set Area 51 up as a global operation: not only the creation and test-flying U-2 planes for placement in Europe, Turkey, and Japan, as well as flying 29 A-12 spy missions over Vietnam, North Korea and more - telling how the CIA ran Area 51 as a worldwide spy. It primarily discusses the CIA's struggles and challenges while creating the Area 51 flight test facility in the ZI with global reach and pioneering stealth technology and exploiting enemy aerial assets--

UFO Headquarters Susan Wright,1998-08-15 The government said it need Area 51 to protect America. They said they needed it for research. Now some say it has all been a terrible lie... In the annals of UFO controversies there has never been a place like this: sixty square miles of desert and scrub just north of Las Vegas, Nevada. Officially known as a U.S. Air Force testing ground, this area has accounted for more UFO sightings and more inexplicable activity than any other in the world. leading experts to dub Area 51 Earth's unofficial UFO headquarters. Now UFO writer Susan Wright seeks to answer the riddle once and for all, delving into previously secret government documents, drawing on eyewitness accounts, and ripping the veil of secrecy off Area 51 and the research that really goes on there. The result is the most shocking and thoroughly documented UFO book you have ever read, a book that demonstrates that for fifty years the U.S. government has had one overriding policy on Area 51: whenever confronted with suspicions, facts, or photographs-conceal, deny and lie...

The Central Intelligence Agency and Overhead Reconnaissance Gregory Pedlow,Donald Welzenbach,2016-03-15 The CIA's 2013 release of its book The Central Intelligence Agency and Overhead Reconnaissance 1954-1974 is a fascinating and important historical document. It contains a significant amount of newly declassified material with respect to the U-2 and Oxcart programs, including names of pilots; codenames and cryptonyms; locations, funding, and cover arrangements; electronic countermeasures equipment; cooperation with foreign governments; and overflights of the Soviet Union, Cuba, China, and other countries. Originally published with a Secret/No Foreign Dissemination classification, this detailed study describes not only the program's technological and bureaucratic aspects, but also its political and international context, including the difficult choices faced by President Eisenhower in authorizing overflights of the Soviet Union and the controversy surrounding the shoot down there of U-2 pilot Francis Gary Powers in 1960. The authors discuss the origins of the U-2, its top-secret testing, its specially designed high-altitude cameras and complex life-support systems, and even the possible use of poison capsules by its pilots, if captured. They call attention to the crucial importance of the U-2 in the gathering of strategic and tactical intelligence, as well as the controversies that the program unleashed. Finally, they discuss the CIA's development of a successor to the U-2, the Oxcart, which became the world's most technologically advanced aircraft. For the first time, the more complete 2013 release of this historical text is available in a professionally typeset format, supplemented with higher quality photographs that will bring alive these incredible aircraft and the story of their development and use by the CIA. This edition also includes a new preface by author Gregory W. Pedlow and a foreword by Chris Pocock. Skyhorse Publishing, as well as our Arcade imprint, are proud to publish a broad range of books for readers interested in history--books about World War II, the Third Reich, Hitler and his henchmen, the JFK assassination, conspiracies, the American Civil War, the American Revolution, gladiators, Vikings, ancient Rome, medieval times, the old West, and much more. While not every title we publish becomes a New York Times bestseller or a national bestseller, we are committed to books on subjects that are sometimes overlooked and to authors whose work might not otherwise find a home.

The Angels T. D. Barnes,2017-05-28 They all, President Truman, the Army, Air Force, Navy, and the Marine Corps feared the Central Intelligence Agency, yet the president tasked it with doing something that the Air Force would not do. That was to develop a manned overhead reconnaissance program to spy on Russia. Despite many technological and bureaucratic hurdles, the CIA, in eight months from contract to flying, and under budget, produces the revolutionary U-2 spy plane. A few months later, the CIA is overflying the Communist Soviet Union to disprove the feared bomber and missile gap between the two superpowers. The struggle between the CIA and the US Air Force to control the U-2 Angels and the persistent tension between the CIA and Presidents Truman and Eisenhower extends to the A-12 Archangels intended to replace the U-2. The CIA loses many lives of pilots flying out of the agency's remote site in Nevada known today as Area 51.

Extraterrestrials and U.F.O.s The New York Times Editorial Staff,2019-07-15 In December 2018, a bright blue light appeared over New York City. In thousands of Instagram posts and tweets, New Yorkers wondered: Could the light be signs of aliens? Although the lights turned out to be connected to a Queens powerplant, the curiosity they sparked speaks to the fascination we have for signs of life outside of Earth. The articles in this collection relate to the search for extraterrestrial life, detailing both the science that guides us toward it as well as the communities who believe it is already among us. In book reviews, op-eds, and feature reporting, scientists and journalists attempt to make sense of the question: Are we alone? Features such as a glossary and media literacy questions and terms engage readers beyond the text.

Nevada Test Site Peter W. Merlin,2016-10-10 Since Pres. Harry Truman established the Nevada Test Site (NTS) in December 1950, it has played a vital role in the security of the United States. For four decades, the test site's primary purpose was developmental testing of nuclear explosives. Atmospheric tests conducted over Yucca Flat and Frenchman Flat between 1951 and 1962 involved thousands of Army troops and Marines simulating nuclear battlefield conditions. Civil defense planners studied blast and radiation effects and evaluated bomb shelter designs. Testing moved underground in 1963 to eliminate radioactive fallout. Other projects at the NTS included nuclear rocket engine development for space travel, training for NASA's Apollo astronauts, excavation experiments, radioactive waste storage studies, and aircraft testing. Since the last underground nuclear test in 1992, this geographically diverse testing and training complex north of Las Vegas--known since 2010 as the Nevada National Security Site--has been used to support nuclear stockpile stewardship and as a unique outdoor laboratory for government and industry research and development efforts.
