Handbook of Phase Transfer Catalysis Y. Sasson, Ronny Neumann, 2012-12-06

Phase transfer catalysis is a sophisticated chemical technique which can be used to perform a variety of chemical reactions under mild conditions and with improved control. Since the concept was developed, both the theoretical and practical synthetic applications have seen considerable development, to the point where the technique can be applied to many areas of chemistry. Thus, phase transfer methods are now utilized in many applications, from research chemistry to full-scale production, where the benefits of faster, cleaner and more selective reactions are required. In this new book, the editors have brought together a range of contributors, each of whom is working at the forefront of the technology, to provide a clear, concise and authoritative review of this important area of chemistry. Industrial and academic chemists working on the synthesis, scale-up, production or analysis of a wide range of chemical products will find this book an essential reference on phase transfer technology.

Religion and Ideology in Assyria Beate Pongratz-Leisten,2015-09-25
Addressing the relationship between religion and ideology, and drawing on a range of literary, ritual, and visual sources, this book reconstructs the cultural discourse of Assyria from the third through the first millennium BCE. Ideology is delineated here as a subdiscourse of religion rather than as an independent category, anchoring it firmly within the religious world view. Tracing Assur's cultural interaction with the south on the one hand, and with the Syro-Anatolian horizon on the other, this volume articulates a northern cultural discourse that, even while interacting with southern Mesopotamian tradition, managed to maintain its own identity. It also follows the development of tropes and iconic images from the first city state of Uruk and their mouvance between myth, image, and royal inscription, historiography and myth, and myth and ritual, suggesting that, with the help of scholars, key royal figures were responsible for introducing new directions for the ideological discourse and for promoting new forms of historiography.
