Cloud-Based Music Production Matthew T. Shelvock, 2020-02-18 *Cloud-Based Music Production: Samples, Synthesis, and Hip-Hop* presents a discussion on cloud-based music-making procedures and the musical competencies required to make hip-hop beats. By investigating how hip-hop producers make music using cloud-based music production libraries, this book reveals how those services impact music production en masse. *Cloud-Based Music Production* takes the reader through the creation of hip-hop beats from start to finish - from selecting samples and synthesizer

presets to foundational mixing practices - and includes analysis and discussion of how various samples and synthesizers work together within an arrangement. Through case studies and online audio examples, Shelvock explains how music producers directly modify the sonic characteristics of hip-hop sounds to suit their tastes and elucidates the psychoacoustic and perceptual impact of these aesthetically nuanced music production tasks. Cloud-Based Music Production will be of interest to musicians, producers, mixers and engineers and also provides essential supplementary reading for music technology courses.

The Eternalists Scott Kirkland, 2018-03-09 The Eternalists is about seven high school teenagers from New York City's metropolitan area recruited by an advanced educational program by a lottery to help further their education so they can attend college. Unbeknownst to the teens, there's a lot going on beneath the surface of this program. Before long, the teens are thrust into a world of mysticism, magic, and the underworld in order to help their teachers, the enigmatic but charismatic Dr. Maximillian and the lovely

Chokehold Paul Butler, 2018-09-18 Finalist for the 2018 National Council on Crime & Delinquency's Media for a Just Society Awards Nominated for the 49th NAACP Image Award for Outstanding Literary Work (Nonfiction) A 2017 Washington Post Notable Book A Kirkus Best Book of 2017 "Butler has hit his stride. This is a meditation, a sonnet, a legal brief, a poetry slam and a dissertation that represents the full bloom of his early thesis: The justice system does not work for

blacks, particularly black men.” —The Washington Post “The most readable and provocative account of the consequences of the war on drugs since Michelle Alexander’s *The New Jim Crow* . . .” —The New York Times Book Review “Powerful . . . deeply informed from a legal standpoint and yet in some ways still highly personal” —The Times Literary Supplement (London) With the eloquence of Ta-Nehisi Coates and the persuasive research of Michelle Alexander, a former federal prosecutor explains how the system really works, and how to disrupt it Cops, politicians, and ordinary people are afraid of black men. The result is the Chokehold: laws and practices that treat every African American man like a thug. In this explosive new book, an African American former federal prosecutor shows that the system is working exactly the way it's supposed to. Black men are always under watch, and police violence is widespread—all with the support of judges and politicians. In his no-holds-barred style, Butler, whose scholarship has been featured on 60 Minutes, uses new data to demonstrate that white men commit the majority of violent crime in the United States. For example, a white woman is ten times more likely to be raped by a white male acquaintance than be the victim of a violent crime perpetrated by a black man. Butler also frankly discusses the problem of black on black violence and how to keep communities safer—without relying as much on police. Chokehold powerfully demonstrates why current efforts to reform law enforcement will not create lasting change. Butler's controversial recommendations about how to crash the system, and when it's better for a black man to plead guilty—even if he's innocent—are sure to be game-changers in the national debate about policing, criminal justice, and race relations.

Mixing Music Russ Hepworth-Sawyer, Jay Hodgson, 2016-12-01 This series, Perspectives On Music Production, collects detailed and experientially informed considerations of record production

from a multitude of perspectives, by authors working in a wide array of academic, creative, and professional contexts. We solicit the perspectives of scholars of every disciplinary stripe, alongside recordists and recording musicians themselves, to provide a fully comprehensive analytic point-of-view on each component stage of record production. Each volume in the series thus focuses directly on a distinct aesthetic moment in a record's production, from pre-production through recording (audio engineering), mixing and mastering to marketing and promotions. This first volume in the series, titled *Mixing Music*, focuses directly on the mixing process. This book includes: References and citations to existing academic works; contributors draw new conclusions from their personal research, interviews, and experience. Models innovative methodological approaches to studying music production. Helps specify the term record production, especially as it is currently used in the broader field of music production studies.
