Smartphone-Based Real-Time Digital Signal Processing Nasser Kehtarnavaz, Shane Parris, Abhishek Sehgal, 2015-08-19 Real-time or applied digital signal processing courses are offered as follow-ups to conventional or theory-oriented digital signal processing courses in many engineering programs for the purpose of teaching students the technical know-how for putting signal processing algorithms or theory into practical use. These

courses normally involve access to a teaching laboratory that is equipped with hardware boards, in particular DSP boards, together with their supporting software. A number of textbooks have been written discussing how to achieve real-time implementation on these hardware boards. This book discusses how smartphones can be used as hardware boards for real-time implementation of signal processing algorithms as an alternative to the hardware boards that are currently being used in signal processing teaching laboratories. The fact that mobile devices, in particular smartphones, have now become powerful processing platforms has led to the development of this book, thus enabling students to use their own smartphones to run signal processing algorithms in real-time considering that these days nearly all students possess smartphones. Changing the hardware platforms that are currently used in applied or real-time signal processing courses to smartphones creates a truly mobile laboratory experience or environment for students. In addition, it relieves the cost burden associated with using a dedicated signal processing board noting that the software development tools for smartphones are free of charge and are well-developed. This book is written in such a way that it can be used as a textbook for applied or real time digital signal processing courses offered at many universities. Ten lab experiments that are commonly encountered in such courses are covered in the book. This book is written primarily for those who are already familiar with signal processing concepts and are interested in their real-time and practical aspects. Similar to existing real-time courses, knowledge of C programming is assumed. This book can also be used as a self-study guide for those who wish to become familiar with signal processing app development on either Android or iPhone smartphones. All the lab codes can be obtained as a software package from <http://sites.fastspring.com/bookcodes/product/bookcodes>

Finding Your Voice in Radio, Audio, and Podcast Production Rob Quicke, 2023-12-19 This book provides a unique identity-centered approach to radio, audio, and podcast production which encourages readers to build their confidence and create audio content that matters to them. Written for those just starting out in audio production and focusing on the process of their self-development, readers will learn how to use sound to express themselves in a variety of ways and to create powerful stories in the process – all with the tools already available to them. At the centre of this approach is the author's R.E.A.L. method, referring to the creation of audio that is relatable, engaging, authentic, and liberating. Students will learn to apply this concept to each step of the production process, from planning and writing through to interviewing, broadcasting, and responding to feedback. By the end of this book readers will have developed a working knowledge of podcast, audio, and radio production alongside their own means of self-expression. Supported by exercises and interviews with audio practitioners throughout, Finding Your Voice in Radio, Audio, and Podcast Production is a key resource for anyone approaching radio, audio, or podcasting for the first time. A supporting companion website with Instructor and Student Resources is available at www.robquicke.com.

Proceedings of the Fifth International Conference on Arts and Design Education (ICADE 2022) Juju Masunah, Tati Narawati, Yudi Sukmayadi, Zakarias S. Soeteja, Trianti Nugraheni, Rita Milyartini, Agus Budiman, 2023-10-29 This is an open access book. The 5th INTERNATIONAL CONFERENCE ON ARTS AND DESIGN EDUCATION (ICADE) "Digital Media Literacy and Mastery of Post-pandemic in Arts and Design Education" BACKGROUND The past year has been one of enormous turbulence and upheaval where nobody has been left untouched by the impact of the global pandemic, even a great change has been forced upon artists and educators in their work creation process as well as learning and teaching practice. What and how artists and educators have thought and gone through to keep their field sustained should be disseminated as a mutual learning to enhance our awareness on arts and design sustainability and role during pandemic. ICADE 5 aims to bring together leading academic artists, arts and design researchers and scholars to exchange and share their notion, experiences, and research results on all aspects of Digital Media Literacy and Mastery in Arts and Design education during pandemic and its urgencies after pandemics. It also provides a premier interdisciplinary platform for arts and design researchers, practitioners, and educators to present and discuss the most recent innovations, trends, and concerns as well as practical challenges encountered and solutions adopted which involves digital media literacy or mastery in the fields of Arts and Design education. The 5th International Conference on Arts and Design Education (ICADE) is a conference hosted by Faculty of Arts and Design Education Universitas Pendidikan Indonesia. This conference will be held on September 22nd, 2022 through Zoom Webinar. ICADE has covered a broad range of topic on music, dance, drama, visual arts, visual communication design, arts education, film and television, and multidisciplinary arts fields. This conference scopes may pertain how artist, designer, or arts and design educators finally adapt and conquer digital media to support their work creation and studies activities during pandemic; attitude changes toward art and design works creation; best practice of art and design creation and studies during pandemic; sorts of digital media which might be left or continuously used after pandemic; what finally the digital media can't ever cover during pandemic even to this moment (post-pandemic); potential disruptive/constructive point of digital media use; as well as other substance where we spot a relation between a digital media with arts and design creation and studies.
