Sound Unbound Paul D. Miller,2008-03-14 The role of sound and digital media in an information-based society: artists—from Steve Reich and Pierre Boulez to Chuck D and Moby—describe their work. If Rhythm Science was about the flow of things, Sound Unbound is about the remix—how music, art, and literature have blurred the lines between what an artist can do and what a composer can create. In Sound Unbound, Rhythm Science author Paul Miller aka DJ Spooky that Subliminal Kid asks artists to describe their work and compositional strategies in their own words. These are reports from the front lines on the role of sound and digital media in an information-based society. The topics are as diverse as the contributors: composer Steve Reich offers a memoir of his life with technology, from tape loops to video opera; Miller himself considers sampling and civilization; novelist Jonathan Lethem writes about appropriation and plagiarism; science fiction writer Bruce Sterling looks at dead media; Ron Eglash examines racial signifiers in electrical engineering; media activist Naeem Mohaiemen explores the influence of Islam on hip hop; rapper Chuck D contributes “Three Pieces”; musician Brian Eno explores the sound and history of bells; Hans Ulrich Obrist and Philippe Parreno interview composer-conductor Pierre Boulez; and much more. “Press 'play,'" Miller writes, “and this anthology says 'here goes.'” The groundbreaking music that accompanies the book features Nam Jun Paik, the Dada Movement, John Cage, Sonic Youth, and many other examples of avant-garde music. Most of this content comes from the archives of Sub Rosa, a legendary record label that has been the benchmark for archival sounds since the beginnings of electronic music. To receive these free music files, readers may send an email to the address listed in the book. Audio Culture, Revised Edition Christoph Cox, Daniel Warner,2017-07-27 The groundbreaking Audio Culture: Readings in Modern Music (Continuum; September 2004; paperback original) maps the aural and discursive terrain of vanguard music today. Rather than offering a history of contemporary music, Audio Culture traces the genealogy of current musical practices and theoretical concerns, drawing lines of connection between recent musical production and earlier moments of sonic experimentation. It aims to foreground the various rewirings of musical composition and performance that have taken place in the past few decades and to provide a critical and theoretical language for this new audio culture. This new and expanded edition of the Audio Culture contains twenty-five additional essays, including four newly-commissioned pieces. Taken as a whole, the book explores the interconnections among such forms as minimalism, indeterminacy, musique concrète, free improvisation, experimental music, avant-rock, dub reggae, ambient music, hip hop, and techno via writings by philosophers, cultural theorists, and composers. Instead of focusing on some crossover between high art and popular culture, Audio Culture takes all these musics as experimental practices on par with, and linked to, one another. While cultural studies has tended to look at music (primarily popular music) from a sociological perspective, the concern here is philosophical, musical, and historical. Audio Culture includes writing by some of the most important musical thinkers of the past half-century, among them John Cage, Brian Eno, Ornette Coleman, Pauline Oliveros, Maryanne Amacher, Glenn Gould, Umberto Eco, Jacques Attali, Simon Reynolds, Eliane Radigue, David Toop, John Zorn, Karlheinz Stockhausen, and many others. Each essay has its own short introduction, helping the reader to place the essay within musical, historical, and conceptual contexts, and the volume concludes with a glossary, a timeline, and an extensive discography.

Structural, Syntactic, and Statistical Pattern Recognition Niels da Vitoria Lobo, Takis Kasparis, Michael Georgiopoulos, Fabio Roli, James Kwok, Georgios C. Anagnostopoulos, Marco Loog, 2008-12-02 This volume in the Springer Lecture Notes in Computer Science (LNCS) series contains 98 papers presented at the S+SSPR 2008 workshops. S+SSPR 2008 was the sixth time that the SPR and SSPR workshops organized by Technical Committees, TC1 and TC2, of the International Association for Pattern Recognition (IAPR) were held as joint workshops. S+SSPR 2008 was held in Orlando, Florida, the family entertainment capital of the world, on the beautiful campus of the University of Central Florida, one of the up and coming metropolitan universities in the USA. S+SSPR 2008 was held during December 4-6, 2008 only a few days before the 19th International Conference on Pattern Recognition (ICPR2008), which was held in Tampa, only two hours away from Orlando, thus giving the opportunity of both conferences to attendees to enjoy the many attractions offered by two neighboring cities in the state of Florida. SPR 2008 and SSPR 2008 received a total of 175 paper submissions from many different countries around the world, thus giving the workshop an international clout, as was the case for past workshops. This volume contains 98 accepted papers: 56 for oral presentations and 42 for poster presentations. In addition to parallel oral sessions for SPR and SSPR, there was also one joint oral session with papers of interest to both the SPR and SSPR communities. A recent trend that has emerged in the pattern recognition and machine learning research communities is the study of graph-based methods that integrate statistical and structural approaches.

Spatial Audio Processing Jeroen Breebaart, Christof Faller, 2007-12-10 This book collects a wealth of information about spatial audio coding into one comprehensible volume. It is a thorough reference to the 3GPP and MPEG Parametric Stereo standards and the MPEG Surround multi-channel audio coding standard. It describes key developments in coding techniques, which is an important factor in the optimization of advanced entertainment, communications and signal processing applications. Until recently, technologies for coding audio signals, such as redundancy reduction and sophisticated source and receiver models did not incorporate spatial characteristics of source and receiving ends. Spatial audio coding achieves much higher compression ratios than conventional coders. It does this by representing multi-channel audio signals as a downmix signal plus side information that describes the perceptually-relevant spatial information. Written by experts in spatial audio coding, *Spatial Audio Processing*: reviews psychoacoustics (the relationship between physical measures of sound and the corresponding percepts) and spatial audio sound formats and reproduction systems; brings together the processing, acquisition, mixing, playback, and perception of spatial audio, with the latest coding techniques; analyses algorithms for the efficient manipulation of multiple, discrete and combined spatial audio channels, including both MP3 and MPEG Surround; shows how the same insights on source and receiver models can also be applied for manipulation of audio signals, such as the synthesis of virtual auditory scenes employing head-related transfer function (HRTF) processing and stereo to N-channel audio upmix. Audio processing research engineers and audio coding research and implementation engineers will find this an insightful guide. Academic audio and psychoacoustic researchers, including post-graduate and third/fourth year students taking courses in signal processing, audio and speech processing, and telecommunications, will also benefit from the information inside.

The Girl with 35 Names D. J. COLBERT, 2020-02-04 www.girlwith35names.com Each of us has the ability to make a difference through the gifts we give. The mission of *The Girl with 35 Names* is all about giving back. To fulfill that promise our gift is to donate 100% of profits raised from the sale of the book to charity. Ever since that snowy Russian winter's night when she was born, Molly has longed to know the secret behind each of her 35 names. When Molly unearths a pair of time-worn spectacles in her garden, she is drawn into a mysterious realm of vivid, magical discoveries. Who are these women she is named for and what have they gifted her? What are those fantastic colors swirling around the people she sees and the young man she meets on her wedding day? Will she have enough time to learn all she is meant to before the soldiers of the Red Army invade her small village, exploding her world into chaos and war? Fearing for her safety, Molly must flee her family home and travel across the Atlantic to the strange and frozen New England town of Peabody. The power of the spectacles becomes Molly's connection and her hope in her new home, as they weave her once again into a world of wonder and tiny miracles that will change her life and the lives of her community forever. Dear Reader, Molly is the girl with 35 names, each one of them special and not one the same... but this book is not only about Molly, it is about you too. Before you begin reading Molly's story, take a moment to think about your name. Why was it chosen for you and what does it mean? Take a moment to think about where your family came from, and take another moment to consider your roots as far back as they might go. Think about how an ancestor's decision to immigrate has made a difference in the life you now lead. Think about the talents, values, and desires you have; might these have come from someone before your time? How have you been touched by someone you may never meet? When you do, you will discover how very special and unique each one of us is. We each have a story to tell. I have made this journey of discovery and that is how I came to write *The Girl with 35 Names*. The character of Molly is based on the life of my Grandmother Malkah who grew up in a small village in Russia. She was married to a man she first met on her wedding day and because of the war that came to her country, she was forced to emigrate and build a new life in America. Her strength and courage, her adaptability and endless optimism, her joy of giving to others as well as her deep and tender love of family, inspired me to write this narrative of her

life. It is my hope that readers today will discover through Molly's experiences the joy of giving to others, and the importance of learning who we really are and where we come from. Together, let's make connections to our past and understand the impact these connections may have on our future. Molly's journey of self-discovery and sometimes magical experiences is one that mothers and daughters of all ages can relate to today. Her story celebrates women and the individuality of spirit that binds us all together.
