AURO Gabe Merin,2021-10-20 Auro es el chico más intrigante y controversial de toda la universidad; alabado por muchos, acreedor de inimaginables rumores, reservado, pero sobre todo conocido por “no tener corazón”. Zoe ha sido una lejana admiradora de su belleza por mucho tiempo. Un extraño suceso hace que Zoe se vea envuelta en una serie de misteriosos encuentros con Auro, obligados a reunir juntos las partes del complicado rompecabezas del que ambos forman parte. Un nombre sin rostro, un macabro juego, un criminal internacional, un policía, una mafia y una mente maestra. Todos relacionados. Nada es lo que parece. Confiar no es una opción. ¿Te atreves a entrar en este juego mental?

Producing Music Russ Hepworth-Sawyer,Jay Hodgson,Mark Marrington,2019-03-28 During the last two decades, the field of music production has attracted considerable interest from the academic community, more recently becoming established as an important and flourishing research discipline in its own right. Producing Music presents cutting-edge research across topics that both strengthen and broaden the range of the discipline as it currently stands. Bringing together the academic study of music production and practical techniques, this book illustrates the latest research on producing music. Focusing on areas such as genre, technology, concepts, and contexts of production, Hepworth-Sawyer, Hodgson, and Marrington have compiled key research from practitioners and academics to present a comprehensive view of how music production has established itself and changed over the years.

The Art and Science of Surround and Stereo Recording Edwin Pfnazagl-Cardone,2021-01-09 This book presents an extensive and timely survey of more than 30 surround and 20 stereo-microphone techniques. Further, it offers, for the first time, an explanation of why the RCA Living Stereo series of legacy recordings from the 1950s and 60s is still appreciated by music lovers worldwide, despite their use of an apparently incorrect recording technique from the perspective of psychoacoustics. Discussing this aspect in detail, the book draws on the author's study of concert hall acoustics and psychoacoustics. The book also analyzes the fingerprint features of a selected number of surround and – more importantly – stereo microphone techniques in depth by measuring their signal cross-correlation over frequency and also using an artificial human head. In addition, the book presents a rating of microphone techniques based on the assessment of various acoustic attributes, and merges the results of several subjective listening tests, including those conducted by other researchers. Building on this knowledge, it provides fresh insights into important microphone system features, from stereo to 3D audio. Moreover, it describes new microphone techniques, such as AB-PC, ORTF-T and BPT, and the recently defined BQIrep (Binaural Quality Index of reproduced music). Lastly, the book concludes with a short history of microphone techniques and case studies of live and studio recordings.
