Image - Action - Space Luisa Feiersinger, Kathrin Friedrich, Moritz Queisner, 2018-10-08 Screen-based media, such as touch-screens, navigation systems and virtual reality applications merge images and operations. They turn viewing first and foremost into using and reflect the turn towards an active role of the image in guiding a user's action and perception. From professional environments to everyday life multiple configurations of screens organise working routines, structure interaction, and situate users in space both within and beyond the boundaries of the screen. This volume examines the linking of screen, space, and operation in fields such as remote navigation, architecture, medicine, interface design, and film production asking how the interaction with and through screens structures their users' action and perception.

Spectacular Men Sarah E. Chinn, 2017-03-01 In *Spectacular Men*, Sarah E. Chinn investigates how working class white men looked to the early American theatre for examples of ideal manhood. Theatre-going was the primary source of entertainment for working people of the early Republic and the Jacksonian period, and plays implicitly and explicitly addressed the risks and rewards of citizenship. Ranging from representations of the heroes of the American Revolution to images of doomed Indians to plays about ancient Rome, Chinn unearths dozens of plays rarely read by critics. *Spectacular Men* places the theatre at the center of the self-creation of working white men, as voters, as workers, and as Americans.

The Customer Centric Enterprise Mitchell M. Tseng, Frank Piller, 2011-06-27 Companies are being forced to react to the growing individualization of demand. At the same time, cost management remains of paramount importance due to the competitive pressure in global markets. Thus, making enterprises more customer centric efficiently is a top management priority in most industries. Mass customization and personalization are key strategies to meet this challenge. Companies like Procter&Gamble, Lego, Nike, Adidas, Land's End, BMW, or Levi Strauss, among others, have started large-scale mass customization programs. This book provides insight into the different aspects of building a customer centric enterprise. Following an interdisciplinary approach, leading scientists and practitioners share their findings, concepts, and strategies from the perspective of design, production engineering, logistics, technology and innovation management, customer behavior, as well as marketing.

Virtual reality, augmented reality, mixed reality, and other modes of digitally induced immersion herald a major cultural and economic shift in society. Top Secret America Dana Priest,William M. Arkin,2011-09-06 The top-secret world that the government created in response to the 9/11 terrorist attacks has become so enormous, so unwieldy, and so secretive that no one knows how much money it costs, how many people it employs or exactly how many agencies duplicate work being done elsewhere. The result is that the system put in place to keep the United States safe may be putting us in greater danger. In Top Secret America, award-winning reporters Dana Priest and William Arkin uncover the enormous size, shape, mission, and consequences of this invisible universe of over 1,300 government facilities in every state in America; nearly 2,000 outside companies used as contractors; and more than 850,000 people granted Top Secret security clearance. A landmark exposé of a new, secret Fourth Branch of American government, Top Secret America is a tour de force of investigative reporting--and a book sure to spark national and international alarm.

This study explores why these gone but not forgotten warrior monks remain prominent in popular culture; how history influenced the myth; and how the myth has influenced literature, film and video games.
