**From the Fires of War: Ukraine's Azov Movement and the Global Far Right** Michael Colborne,2022-01-12 From its roots in revolution and war, Ukraine's Azov movement has grown from a militia of fringe far-right figures and football hooligans fending off Russian-backed forces into a multipronged social movement that has become the envy of the global far right. In this first English-language book on the Azov movement, Michael Colborne explains how Azov came to be and continues to exploit Ukraine's fractured social and political situation—including the only ongoing war on European soil – to build one of the most ambitious and dangerous far-right movements in the world.

**The Founding of Russia's Navy** Edward Phillips,1995-05-23 The reign of Peter the Great (1682-1725), long regarded as the turning point in the Europeanization of Russia, witnessed the establishment of Russia's first modern navy, the Azov Sea fleet. Its creation evokes a fundamental question about the era: was Peter a reformer or a revolutionary? This three-part study examines Russia's maritime experience in the 17th and early 18th centuries in order to address this central question. The author argues that Peter's development of the navy was revolutionary in the scale and level of technology brought to fruition through the reform of existing political and social structures.

**The Sea of Azov** Anne Joseph,2009 This is a collection of stories of betrayal and fear, desire and satisfaction, love, grief and revenge. Contributors include Ali Smith, Tamar Yellin, Amy Bloom and Karen Maitland.

**Two Cousins of Azov** Andrea Bennett,2017-07-13 A heartwarming novel about the surprise of second chances in the autumn of your life.

**Environmental Security in Watersheds: The Sea of Azov** Viktor Lagutov,2011-10-23 Watersheds, supplying crucial ecosystem services to humans, seem to be a logical territorial unit to integrate societal benefits and environmental needs in order to evaluate the sustainability of natural resource use patterns. Based on this belief the book is an attempt to initiate a comprehensive environmental security assessment in the basin of the Azov Sea, shared by Russia and Ukraine. Though the region provides a variety of essential services and plays a strategic role in national and international development plans, it has been excluded from most regional environmental discussions. At the same time there is an alarming degradation rate of basin freshwater ecosystems that has occurred due to overutilization of certain prioritized services (e.g. transportation). The collapse of neglected services (e.g. fishery and freshwater supply) poses serious threats to the national economies as well as the local population, and to mitigate these threats priority in water management should be given to securing sustainability of the regional freshwater ecosystems. In addition to the review of the current status of Azov ecosystem services, the authors analyze likely future availability and challenges. The relevant experience derived from basin management of the Black Sea and other similar basins is also discussed.

**Foreign Fighters in Ukraine** Kacper Rekawek,2022-12-30 Foreign Fighters in Ukraine is the first comprehensive academic study taking an in-depth look at foreigners who have chosen to fight in the conflict in Ukraine. While there has been considerable focus in policy, security and academic circles on the threat from returning jihadists – so-called returnee foreign terrorist fighters – the same danger from right-wing, but not essentially terrorist, extremists and others has been largely overlooked. As Westerners rushed to join the nascent Caliphate in Syria/Iraq, others simultaneously traveled to another foreign war on what many would call Europe's doorstep: the Russo-Ukrainian war. This book unmask this largely unknown group of fighters as the author dives into the fighters' ideological and social backgrounds, their motivations for joining the conflict, their travails on the way there and their battle record in Eastern Ukraine. To a large extent based on interviews with the fighters themselves, it is a study on how and why men risk their lives while fighting a foreign war – and attract the attention of security services at home upon their return. Particularly, given the Russian invasion of Ukraine in February 2022 and the growing interest in far-right violence worldwide, the book evaluates whether these returnees constitute another security threat to the West. This volume will be of interest to all those researching small wars, terrorism, peace and conflict studies and right-wing extremism.

**Ecology of Marine Ports of the Black and Azov Sea Basin** A. K. Vinogradov,Yu. I. Bogatova,I. A. Synegub,2017-08-18 This work examines the waters of marine ports as unique integrated aquatic ecosystems. It regards marine ports as entities comprising components of natural and anthropogenic origin, including pelagic, periphytal and benthal subsystems. Using selected Black and Azov Sea ports as examples, the book discusses the hydrodynamics and water exchange, which are weakened in ports compared with open coastal zones. It reflects consequences of the presence of hydrobionts and the accumulation of organic matter, which are promoted by the variety of hard substrata and the absence of fishery. The book is divided into five main chapters. The first chapter describes the general characteristics of the marine ports at the northern coast of the Black and Azov Seas and their shipping channels. Chapters 2 to 4 discuss the main abiotic and biotic peculiarities of the pelagial, periphytal and benthal subsystems of those marine ports, and chapter 5 deals with tropho-dynamic processes in their

ecosystems. A concluding section reflects recommendations how the ecosystems of ports in non-tidal seas may be ameliorated.
