Ill Nature Joy Williams,2015-10-10 Most of us watch with mild concern the fast disappearing wild spaces or the recurrence of pollution - related crises such as oil spills, toxic blooms in fertilizer-enriched rivers, and the increasing violence in our own country. Joy Williams does much more than watch. With guts and passion, she sounds the alarm over the general disconnection from the natural world that our consumer culture has created. The culling of elephants, electron-probed chimpanzees, and the vanishing wetlands are just some of her subjects. Razor-sharp, controversial, scathingly opinionated, and refreshingly unafraid of conflict, Williams refuses to compromise as she lashes out at the greed of Americans and decries our own turpitude. It is not enough to mourn the passing of the natural world, *Ill Nature* shouts. Get out of our homes and our cars and our cubicles and do something...now.

An Atlas of Endangered Alphabets Tim Brookes,2023-09-14 A global exploration of the many writing systems that are on the verge of vanishing, and the stories and cultures they carry with them. If something is important, we write it down. Yet 85% of the world's writing systems are on the verge of vanishing - not granted official status, not taught in schools, discouraged and dismissed. When a culture is forced to abandon its traditional script, everything it has written for hundreds of years - sacred texts, poems, personal correspondence, legal documents, the collective experience, wisdom and identity of a people - is lost. This Atlas is about those writing systems, and the people who are trying to save them. From the ancient holy alphabets of the Middle East, now used only by tiny sects, to newly created African alphabets designed to keep cultural traditions alive in the twenty-first century: from a Sudanese script based on the ownership marks traditionally branded into camels, to a secret system used in one corner of China exclusively by women to record the songs and stories of their inner selves: this unique book profiles dozens of scripts and the cultures they encapsulate, offering glimpses of worlds unknown to us - and ways of saving them from vanishing entirely.

The Camper Book Dave Hoekstra,Jon Sall,Jeff Daniels,2018-06-01 The Camper Book will captivate all those who dream of waving good-bye to the rat race from the window of their own moveable home, be it a camper, RV, travel trailer, camper van, or tiny camper. Not just for placid retirees anymore, camper culture has sprung up among simplicity-seeking millennials, retro-loving glampers, sports and movie stars, aging hippies, contract workers, road-schoolers, and others. Award-winning journalist Dave Hoekstra hit the road in his own custom camper van, named Bluebird, to explore the history, culture, subcultures, and future of camper life. Traveling and talking his way through US campsites, RV parks, landmarks, and communities, Hoekstra draws out revealing stories from all walks of life—from Americans who are downsizing material goods while upsizing spiritual pursuits to RV enthusiasts such as Grammy-winning singer-songwriter John Prine and Chicago Cubs manager Joe Maddon. A modern-day Studs Terkel, Hoekstra provides a delightful mix of oral history, in-depth reporting, and practical information, while photographer Jon Sall's beautiful color photographs illuminate the unique people, places, and rigs that typify camper life.

Regeneration Paul Hawken,2021-09-21 A radically new understanding of and practical approach to climate change by noted environmentalist Paul Hawken, creator of the New York Times bestseller *Drawdown* *Regeneration* offers a visionary new approach to climate change, one that weaves justice, climate, biodiversity, equity, and human dignity into a seamless tapestry of action, policy, and transformation that can end the climate crisis in one generation. It is the first book to describe and define the burgeoning regeneration movement spreading rapidly throughout the world. *Regeneration* describes how an inclusive movement can engage the majority of humanity to save the world from the threat of global warming, with climate solutions that directly serve our children, the poor, and the excluded. This means we must address current human needs, not future existential threats, real as they are, with initiatives that include but go well beyond solar, electric vehicles, and tree planting to include such solutions as the fifteen-minute city, bioregions, azolla fern, food localization, fire ecology, decommodification, forests as farms, and the number one solution for the world: electrifying everything. Paul Hawken and the nonprofit *Regeneration Organization* are launching a series of initiatives to accompany the book, including a streaming video series, curriculum, podcasts, teaching videos, and climate action software. *Regeneration* is the inspiring and necessary guide to inform the rapidly spreading climate movement.

Do U Remember? offers us a window into the past, showing life as it was then, and stirring in us the emotions of wonder and curiosity about those who have gone before us and the lives they lived. Drawdown Paul Hawken,2017-04-18 • New York Times bestseller • The 100 most substantive solutions to reverse global warming, based on meticulous research by leading scientists and policymakers around the world “At this point in time, the Drawdown book is exactly what is needed; a credible, conservative solution-by-solution narrative that we can do it. Reading it is an effective inoculation against the widespread perception of doom that humanity cannot and will not solve the climate crisis. Reported by-effects include increased determination and a sense of grounded hope.” —Per Espen Stoknes, Author, *What We Think About When We Try Not To Think About Global Warming* “There's been no real way for ordinary people to get an understanding of what they can do and what impact it can have. There remains no single, comprehensive, reliable compendium of carbon-reduction solutions across sectors. At least until now. . . . The public is hungry for this kind of practical wisdom.” —David Roberts, *Vox* “This is the ideal environmental sciences textbook—only it is too interesting and inspiring to be called a textbook.” —Peter Kareiva, Director of the Institute of the Environment and Sustainability, UCLA In the face of widespread fear and apathy, an international coalition of researchers, professionals, and scientists have come together to offer a set of realistic and bold solutions to climate change. One hundred techniques and practices are described here—some are well known; some you may have never heard of. They range from clean energy to educating girls in lower-income countries to land use practices that pull carbon out of the air. The solutions exist, are economically viable, and communities throughout the world are currently enacting them with skill and determination. If deployed collectively on a global scale over the next thirty years, they represent a credible path forward, not just to slow the earth's warming but to reach drawdown, that point in time when greenhouse gases in the atmosphere peak and begin to decline. These measures promise cascading benefits to human health, security, prosperity, and well-being—giving us every reason to see this planetary crisis as an opportunity to create a just and livable world.

Wallet Activism Tanja Hester,2021-11-16 2022 NATIONAL INDIE EXCELLENCE AWARDS FINALIST – SOCIAL/POLITICAL CHANGE • 2022 ASJA ANNUAL WRITING AWARD WINNER – SERVICE • 2022 NAUTILUS BOOK AWARDS GOLD MEDALIST – SOCIAL CHANGE & SOCIAL JUSTICE • 2022 AXIOM BUSINESS BOOK AWARD GOLD MEDALIST – PHILANTHROPY/NONPROFIT/SUSTAINABILITY How do we vote with our dollars, not just to make ourselves feel good, but to make a real difference? *Wallet Activism* challenges you to rethink your financial power so can feel confident spending, earning, and saving money in ways that align with your values. While we call the American system a democracy, capitalism is the far more powerful force in our lives. The greatest power we have—especially when political leaders won't move quickly enough—is how we use our money: where we shop, what we buy, where we live, what institutions we entrust with our money, who we work for, and where we donate determines the trajectory of our society and our planet. While our votes and voices are essential, too, *Wallet Activism* helps you use your money for real impact. It can feel overwhelming to determine “the right way” to spend: a choice that might seem beneficial to the environment may have unintended consequences that hurt people. And marketers are constantly lying to you, making it hard to know what choice is best. *Wallet Activism* empowers us to vote with our wallets by making sense of all the information coming at us,

and teaching us to cultivate a more holistic mindset that considers the complex, interrelated ecosystems of people and the planet together, not as opposing forces. From Tanja Hester, Our Next Life blogger and author of Work Optional, comes the mindset-shifting guide to help you put your money where your values are. Wallet Activism is not a list of dos and don'ts that will soon become outdated, nor does it call for anti-consumerist perfection. Instead, it goes beyond simple purchasing decisions to explore: The impacts a financial decision can have across society and the environment How to create a personal spending philosophy based on your values Practical questions to quickly assess the "goodness" of a product or an entity you may buy from The ethics of earning money, choosing what foods to eat, employing others, investing responsibly, choosing where to live, and giving money away For anyone interested in leaving the world better than you found it, Wallet Activism helps you build habits that will make your money matter.
