Exploding the Big Bang Theory Joseph Donnelly, 2015-08-14 The essence of this my third effort at publication now stands to be the true basis of our human species new working philosophy. My main interest is of our relationship with God on all fronts. Simple when realised we under the split headings of humanity in tribe, clan, national or of different skin colour configurations, have amassed over 10,000 religious philosophies to meet our personal needs. Of which none seem to work for all over the limit of tribe, clan national or colour configuration?! Because of the very modern sophisticated trend of rejecting God, generally understood to have been the creator; and in using the guessed at elements of how science really works or had been given credit for how it must work. Many in that field of study have felt qualified enough to snub those 10,000 religions by stating there never is or was God in any case? My personal stand and standards revolve around humanity in us, getting the understanding of God right in the first place, but slightly askew in the opinion we were expressly chosen by God to promote enlightenment upon the universe! Yes we got it right, there is God, and no arguments can be valid against this acceptance. To endorse that statement I have been able and commit my to be our understanding of how and why God set the clock of creation from the beginning of all time, now scientifically proved by us, through the open discovery of the God particle, much more than a scientific phenomena? . Part of my style and method stands to the terms of all religions in best choice to be monotheistic by character. This fits with the full progress of all histories naturally connecting with the future of self. Self to be the individuals we each are, but hailed to be of species over tribe, clan, colour or national. Our monotheistic relationship stands also to self, in that however we are in style by colour or creed. We will meet to be the same image of God as seen in self, but only able to manage that wonderful spectacle on Gods terms from our solid belief in God, reality, and our future! See what you think, when from now you can also evaluate the latest of sciences exposs over and above some of the scientific ranting of how any form of intelligent life began, but more importantly, why, remembering we are here on Gods terms not ours!

Big Bang Out, Multibang In Andre Trepanier, 2016-01-08 Multibang Cosmos invites you to replace the big bang paradigm of a mysterious and unique cosmic origin and expansion by the observed local multibang expansions within a permanent cosmic recycling of all electronuclear material. The progenitors of stars and galaxies are found in expanding shells colliding with their neighbors along dynamic common walls that are home to groups of galaxies that will in turn migrate to clusters. Large clusters end up in the crushing gravitational claws of giant black holes whose final compacted destiny is a local maxibang event—the birth of a new expanding bubble. A new method is presented to compute galactic rotation velocities from Doppler shift field data whereby Newtonian dynamics is adopted and applied to point-like corrections on a disk or a stack of disks where velocities differ strongly from those from a sphere. The model is applied to calculate the corrected mass of four typical galaxies wherein dark matter is repelled. It is extended to a number of low- and high-surface-brightness galaxies for comparison. Corrections for linear large-scale cosmic features are briefly presented. The Standard Model of electronuclear particles is introduced by questioning the speed of gravity and the unknown parameter extensions toward the Planck units where a mare incognitum is found with a new hypothetical black force acting against the collapse of black holes.

The Big Bang Theory and Light Spectra Rachel Keranen, 2016-12-15 Much of our contemporary understanding of space systems dates back to Isaac Newton. It's surprising to think that the underpinnings of astronomy are centuries old. While for a time it seemed as though major discoveries in the field had stagnated, in the early twentieth century, scientists like Albert Einstein and Max Planck redefined our understanding of light waves. And in 1948 scientists developed a theory about how our entire universe came to be, a theory that would be proven in 1965. The Big Bang Theory and Light Spectra is modeled closely on Next Generation Science Standards. The book explains the science behind these groundbreaking discoveries, profiles the scientists responsible, and details the technology astronomers and astrophysicists use to continue refining our knowledge.

Patentism Replacing Capitalism Samuel Meng, 2019-05-03 Based on economic knowledge and logical reasoning, this book proposes a solution to economic recessions and offers a route for societal change to end capitalism. The author starts with a brief review of the history of economics, and then questions and rejects the trend of recent decades that has seen econometrics replace economic theory. By reviewing the different schools of economic thought and by examining the limitations of existing theories to business cycles and economic growth, the author forms a new theory to explain cyclic economic growth. According to this theory, economic recessions result from innovation scarcity, which in turn results from the flawed design of the patent system. The author suggests a new design for the patent system and envisions that the new design would bring about large economic and societal changes. Under this new patent system, the synergy of the patent and capital markets would ensure that economic recessions could be avoided and that the economy would grow at the highest speed.

RELEASING THE CHURCH FROM ITS CULTURAL CAPTIVITY S K Tham, 2015-11-09 In this book, I would like you to come on a journey with me. It is a journey that I have been on, and I want to retrace the route that I have taken. Some parts of the journey may be familiar to you, but other parts may be new and sometimes scary. My journey is by no means at its end yet, but the delight that I have experienced beckons me to tell others and to take others along this journey. Many times along the way, I had to discard the cultural baggage that I had carried along because they became burdensome and prevented me from going further. I then had to adorn a totally new attire and at times change my lenses to see things clearer. I was reluctant to do that at first, but the moment I tried on the new lenses, I saw things that I had never seen before. That was exciting. Things came into much sharper focus. However, the distant view remained hazy, but this only made me more determined to journey on. With each new step I took, I saw a little more. Somehow the haze of the distant hills never lifted. It remained. I was only given a clear view of the immediate surroundings. Over time I became contented with that view knowing that in this journey the delight is limitless. (S K Tham) Those who have struggled with cross-cultural communication of the Word of God will find this book a great assistance. It is not that here at last is a method we can employ that will remove the barriers we face, but there is an explanation and one that is not restricted to any particular 'Christian' cultural group. Siew Kiong Tham has argued that the basic problem is not anthropological or cultural—it is theological. Knowing the triune God and having that knowledge effect Christian living and relationships lies at the heart of all we are about as believers and proclaimers. (Rev Dr Ian Pennicook, New Creation Teaching Ministry, NSW) We see our own culture as inviolable. Apart from Christ, it represents our lasting and 'sacred' endeavours. It fits us with 'the way things are done'. Dr Tham shows us that we may not simply overlay our culture with a form of external Christianity. The delivery of grace by the present reigning Lord Jesus can never be drooped over our culture as a better moral system that simply tidies up some minor cultural loose ends. The culture of the Father's family must break through as the culture of love seen and known only in the Cross. Only there do we discover the Father's lasting and sacred endeavours to form His culture within humanity. (Brian Arthur, Pastor, Bethel Christian Church)

Mango & Bambang: The Not-a-Pig (Book One) Polly Faber, 2016-06-28 An unlikely friendship blossoms between Mango, a little girl with an assortment of talents, and Bambang, an Asian tapir. Mango Allsorts is good at all sorts of things, not just karate and chess. Bambang is most definitely not-a-pig and is now lost in a very busy city. When the two unexpectedly meet, a friendship begins. Bambang requires a great deal of coaxing and comforting to help him acclimate to the big city, and Mango is just the girl for the job. But when Mango faces a nerve-racking challenge of her own, will Bambang be able to return the favor? Filled with adventures and plenty of banana pancakes, this collection of four stories is sure to amuse and inspire any child — or not-a-pig.

Replacing France Kathryn C. Statler, 2007-06-22 Using recently released archival materials from the United States and Europe, *Replacing France: The Origins of American Intervention in Vietnam* explains how and why the United States came to assume control as the dominant western power in Vietnam during the 1950s. Acting on their conviction that American methods had a better chance of building a stable, noncommunist South Vietnamese nation, Eisenhower administration officials systematically ejected French military, economic, political, bureaucratic, and cultural institutions from Vietnam. Kathryn C. Statler examines diplomatic maneuvers in Paris, Washington, London, and Saigon to detail how Western alliance members sought to transform South Vietnam into a modern, westernized, and democratic ally but ultimately failed to counter the Communist threat. Abetted by South Vietnamese prime minister Ngo Dinh Diem, Americans in Washington, D.C., and Saigon undermined their French counterparts at every turn, resulting in the disappearance of a French presence by the time Kennedy assumed office. Although the United States ultimately replaced France in

South Vietnam, efforts to build South Vietnam into a nation failed. Instead, it became a dependent client state that was unable to withstand increasing Communist aggression from the North. Replacing France is a fundamental reassessment of the origins of U.S. involvement in Vietnam that explains how Franco-American conflict led the United States to pursue a unilateral and ultimately imperialist policy in Vietnam.

Kiss Kiss, Bang Bang Ashley,Jaquavis,2011-06-08 When a set-up goes wrong and Six finds herself sleeping with the enemy, who will she choose, the man she loves, or the man she's supposed to hate? Detroit hustlers Free and Six have been together seven years, but their relationship has been nothing but drama. Free hasn't been faithful and Six has taken out her hurt by physically hurting the other women. Free ends up in jail for three years, and when he's sprung, he's not happy to learn that Six has been living the high-life on his dime and blown through \$100,000! Then Six gets entangled in one of Free's schemes and finds herself in a role almost too good to be true—posing as the woman of another man who actually treats her with respect. Though you can bet there won't be a happily ever after for anyone involved. . . .

Evolution to the superhuman and prison-less community of the type 1 civilization. , According to the rate of development of our technology, we are about to enter the next stage of cultural and social evolution. Highly developed civilizations are classified into three types namely Type 1, Type 2, and Type 3. We are moving towards the type 1 civilization. The greatest feature of Type 1 civilization is that we can meet all our energy needs with the help of solar energy. If we can fully utilize solar energy, we will have the energy we need for free. This will greatly strengthen our economic structure. Because of this, the growth of our technology will get accelerated tenfold. This is both a boon and a bane for us. Technology will take us to greater heights. At the same time, these same technologies will cause our total destruction. Therefore, the whole world needs to become a like-minded society. So this book mainly discusses how we should change socially and culturally under the new circumstances. We also discuss how to build a sustainable human society. We are passing through a situation where hostilities between many countries can turn into war at any time. At the same time, separatists and extremists are on the rise within many countries. In such a situation it is a great danger if we enter a Type 1 civilization. Therefore, this book is mainly about finding a way to solve all the problems that exist on Earth today. Despite being rich in natural resources, many countries are in the depths of poverty. We can overcome this if we have a transparent society and governance system. The first thing we need to do is to become a socially conscious people. If every man becomes socially responsible, the earth will be peaceful. It is the responsibility of our rulers to mold such a society. Therefore, we are also discussing the need for a transparent governance system. Terrorism has become so strong in the world because of the competition between two superpower countries. You can also see in this book the need to avoid this competition. All human beings have a duty to create a peaceful earth. This book is my humble contribution to that end. Hope you will find it useful too.

Computational Methods in Economic Dynamics Herbert Dawid,Willi Semmler,2011-03-23 This volume is centered around the issue of market design and resulting market dynamics. The economic crisis of 2007-2009 has once again highlighted the importance of a proper design of market protocols and institutional details for economic dynamics and macroeconomics. Papers in this volume capture institutional details of particular markets, behavioral details of agents' decision making as well as spillovers between markets and effects to the macroeconomy. Computational methods are used to replicate and understand market dynamics emerging from interaction of heterogeneous agents, and to develop models that have predictive power for complex market dynamics. Finally treatments of overlapping generations models and differential games with heterogeneous actors are provided.

Heavenly Emperor of Gu Qiang Zai,2019-11-28 His beloved girl actually killed him on the wedding night, and his heart was penetrated by a sharp weapon and died. But he would not die so easily. Five hundred years later, he was born again to a teenager, determined to figure out why his wife killed him. He began a long cultivation path, and at the same time he gained the ability to live forever. Eventually, he grew into a peak power, and those who tried to hurt him were punished.☆About the Author☆Qiang Zai, a well-known online novelist, is good at writing novels of martial arts and fantasy, and his representative works include: Heavenly Emperor of Gu and Great Martial Arts System. Both novels received high marks.

Optimal Control Leslie M. Hocking,1991 Systems that evolve with time occur frequently in nature and modelling the behavior of such systems provides an important application of mathematics. These systems can be completely deterministic, but it may be possible too to control their behavior by intervention through controls. The theory of optimal control is concerned with determining such controls which, at minimum cost, either direct the system along a given trajectory or enable it to reach a given point in its state space. This textbook is a straightforward introduction to the theory of optimal control with an emphasis on presenting many different applications. Professor Hocking has taken pains to ensure that the theory is developed to display the main themes of the arguments but without using sophisticated mathematical tools. Problems in this setting can arise across a wide range of subjects and there are illustrative examples of systems from fields as diverse as dynamics, economics, population control, and medicine. Throughout there are many worked examples, and numerous exercises (with solutions) are provided.

The Hurting Circus Paul O'Brien,2017-05-16 The conclusion of the acclaimed trilogy in which professional wrestling meets Empire, called “a one-of-a-kind literary offering for die-hard wrestling fans” (RollingStone.com). It’s been twelve years since the New York wrestling territory was nearly burned to the ground. Twelve years since millions of dollars were lost because of a single bullet. Twelve years since Lenny Long last saw his family before being thrown in jail for killing Danno Garland. Now, Lenny has walked out of jail a changed man. Back on the outside, things haven’t gotten any easier. Danno’s death has made the spotlight shine on the world of professional wrestling a little too brightly for the comfort of many. Senator Tanenbaum is leading the charge to shut the whole thing down, while the other wrestling bosses haven’t wasted any time in trying to consolidate their territories and grab new ones. But Danno’s old crew isn’t about to let the other promoters take what is rightfully theirs, at least not without a fight. And, try as he might to get home, Lenny’s role in it all isn’t over. In this thrilling final chapter of Paul O’Brien’s gritty Blood Red Turns Dollar Green trilogy, it all comes down to Lenny. And twelve years is a long time to think and to plan.
