**Performance diagnosis and purchase examination of elite sport horses** Arno Lindner,2023-09-04 The focus of CESMAS 2010 in Sigtuna is 'Performance diagnosis and purchase examination of elite sport horses'. The multi authored articles deal with a range of complex topics. Performance evaluation, training guidance and management of race horses, sport horses and show jumpers before and after the competitive season is discussed over several chapters. This includes Body Condition scoring and on-track performance diagnosis. Particular attention is given to the optimal management of horses from birth to 2 years of age. Pre-purchase examination recommendations are made, specifically those done in the Netherlands and Germany, including that of the high level jumper. How genetics can help to find the ideal horse by noting positive and negative markers of performance and health is shown to be a valuable assessment tool in this process. Finally, topics such as variations among breeds in predisposition to injury, the role of shoes in horse performance, on track diagnosis of upper airways obstructions and equine osteochondrosis genetic markers are covered in the book. The book is a valuable resource to all who want to make informed decisions in the acquisition process of performance horses and manage them for sports.

Dead at First Sight Peter James,2019-05-16 Detective Superintendent Roy Grace exposes the dark side of internet dating in the intriguing crime novel Dead at First Sight, by award winning author Peter James. A man waits at a London airport for the love of his life to arrive. Across the Atlantic, a retired cop waits in a bar in Florida’s Key West for his first date with the lady who is his soulmate. The two men are about to discover they’ve been scammed out of almost every penny they have in the world – and that neither women exist. In the same week, Roy Grace is called to investigate the suicide of a woman in Brighton, that is clearly not what it seems. As his investigations continue, a handsome motivational speaker comes forward. He’s discovered his identity is being used to scam eleven different women online. The first he knew of it was a phone call from one of them saying, ‘You don’t know me, but I thought I knew you’. That woman is now dead. Roy Grace realizes he is looking at the tip of an iceberg. Can he bring down the murderous global empire built on clever, cruel internet scams? Although the Roy Grace novels can be read in any order, Dead at First Sight is the fifteenth title in the bestselling series. Discover more of the Brighton detective’s investigations with Find Them Dead and Left You Dead. Now a major ITV series, Grace, starring John Simm.

**Training for equestrian performance** Jane Williams,David Evans,2023-11-27 'Training for equestrian performance' is an essential guide for the modern equestrian competitor who wants to optimise their own and their horse's potential in training and competition, or for the equine sports science student wanting to understand the science of equestrian training. Leading equestrian researchers and performance analysis experts bring together the fundamental scientific principles which underpin competition preparation for the horse and rider. These include exercise physiology, psychology, conformation, biomechanics and feeding for performance. The book explores the principles of training and alternative training methods, and how these principles translate to management of the equine athlete to extend careers and prevent injury occurring. Suggestions for how to successfully develop training strategies and plans matched to short and long term training and competition goals are provided. Developments in performance analysis techniques and equipment for the horse and rider, independently and as a partnership, are reviewed. This enables the reader to select techniques and devise training regimes which can help them achieve their own competitive goals. The book concludes by applying science to the practical requirements of a range of equestrian disciplines, giving practical advice and explanations of how to use science and technology to improve fitness, prevent injury and to achieve competition success. Horse owners, students, veterinarians, coaches and many other participants in equestrian sports will find new knowledge and perspectives to consider. 'Training for equestrian performance' will become a must-have training companion for the modern equestrian who wants to leave nothing to chance in their competition preparation.

**RETI MARITTIME COME FATTORI DELL’INTEGRAZIONE EUROPEA MARITIME NETWORKS AS A FACTOR IN EUROPEAN INTEGRATION** Giampiero Nigro,2019 This wide-ranging theme takes Braudel's concept of the “Mediterranean” as its starting point. Braudel's vision of an enclosed sea as a geographical opportunity for economic integration between nations with different religions, languages and ethnicities and political bodies still functions as a model for studies on a wide range of contexts. The goal of the 50th Study Week was to go beyond the study of individual systems in isolation, and to combine instead different analysis of open and enclosed seas or coastal areas in order to understand the integration role played by maritime connections in Europe. Since in pre-industrial civilizations water transport was easier than land transport, the time has come to bring attention to the way these relationship networks operated both on a European level and with Asian and North African trade partners. This volume starts from the great research traditions which have, however, rarely been integrated on a larger and continental scale, and analyses them on either a regional or thematic basis. Immanuel Wallerstein has developed Braudel's concept by conceptualising its intercultural and transnational dimensions and its role in the system of labour. He called it a world system, not because it involves the whole world, but because it is larger than any legally defined political unit. And it is a world economy because the base link between the different parts of the system has an economic nature. The various regional research aspects and traditions have been linked together in a coherent approach which aims at evaluating: - What geographical, nautical, technical, economic, legal, social and cultural elements influenced the emergence of the various regional networks, and how these worked; - The nature and role of seaports as nodal points of sea routes and of their hinterland through rivers, canals and roads; - The commercial and personal ties between merchants and shipowners in various ports; - How regional networks connected with each other and how, over time, they ended up integrating into larger units; - How private networks, initially between merchant and seafarer organizations, ended up dealing with local authorities and, after their growth, with states and empires in order to protect their interests.
