The New Rules of Retail Robin Lewis,Michael Dart,2010-12-07 Unprecedented consumer power, enabled by technology and globalization is driving a revolutionary transformation that will lead to the demise of retail as we know it. The authors provide a unique and essential view of the future of the industry, arguing that a new business model is necessary in these new times, one based on: Preemptive, precise and perpetual distribution; A neurological customer connection; and total control of the value chain. Some of the authors' key insights and predictions include: * The collapse of the traditional retail/wholesale business model: The more enlightened retailers and wholesalers understand they must own and control the creation, distribution and presentation of their value, directly to the consumer.* Internet retailers such as Amazon, must ultimately open bricks and mortar stores: In an over-competed marketplace, preemptive distribution of value to precisely where and how the consumer wants it is vital, meaning that retailers and wholesalers must utilize all available distribution platforms, as well as create new distribution ideas.* Successful control of the total value chain is the key driver of economic success: Control does not necessarily mean ownership, as in complete vertical integration. Rather, it means that one must gain dominant control over all its functions as companies like Wal-Mart and Ralph Lauren, who don't own, but certainly control, their total value chains, demonstrate. * The imperative to control the value chain will favor those who own production: An increasing number of U.S. brands, wholesalers and retailers, will be acquired by Chinese manufacturers and other emerging countries who can

produce consumer goods at a low cost.

Cyber Society, Big Data, and Evaluation Gustav Jakob Petersson,Jonathan D. Breul,2017-07-12 We are living in a cyber society. Mobile devices, social media, the Internet, crime cameras, and other diverse sources can be pulled together to form massive datasets, known as big data, which make it possible to learn things we could not begin to comprehend otherwise. While private companies are using this macroscopic tool, policy-makers and evaluators have been slower to adopt big data to make and evaluate public policy. Cyber Society, Big Data, and Evaluation shows ways big data is now being used in policy evaluation and discusses how it will transform the role of evaluators in the future. Arguing that big data will play a permanent and growing role in policy evaluation, especially since results may be delivered almost in real time, the contributors declare that the evaluation community must rise to the challenge or risk being marginalized. This volume suggests that evaluators must redefine their tools in relation to big data, obtain competencies necessary to work with it, and collaborate with professionals already experienced in using big data. By adding evaluators' expertise, for example, in theory- driven evaluation, using repositories, making value judgements, and applying findings, policy-makers and evaluators can come to make better-informed decisions and policies.

Best iPad Apps Peter Meyers,2010-12-08 What really wows iPad fans is when their touchscreen does what's impossible on other gadgets: the finger-painting app that turns a cross-country flight into a moving art class, the mini music studio (two-dozen instruments strong, each with motion-induced warble effects), and the portable fireworks display that you sculpt by swiping. Problem is, with tens of thousands of apps available for your iPad, who knows what to download? You can try to sort through a gazillion customer reviews with a mix of 5- and 1-star ratings, but that's a head-hurting time-waster. The stakes are getting higher, too: instead of freebies and 99-cent trinkets, the price of iPad apps is steadily creeping up and beyond their iPhone predecessors. Best iPad Apps guides you to the hidden treasures in the App Store's crowded aisles. Author Peter Meyers stress-tested thousands of options to put together this irresistible, page-turner of a catalog. Inside these pages, you'll find apps as magical as the iPad itself.
