The Rough Guide to China David Leffman,Martin Zatko,2011-06-01 The Rough Guide to China covers of all of mainland China including Tibet, along with the special administrative regions of Hong Kong and Macau. Clear, detailed maps show all listed arrival points, accommodation, restaurants and sights, while boxes provide bilingual keys. Use it to explore the sophisticated nightlife emerging in Beijing and Shanghai, to chill out in the mellow travellers' havens of Dali and Yangshuo, or roam the streets of characterful antique towns such as Lijiang. Up to date descriptions give the low-down on famous sights such as Beijing's Forbidden City, the Terracotta Army outside Xi'an, limestone peaks around Guilin and the cruise through the mighty Three Gorges along the Yangzi. There's also full practical information for less-known attractions: hiking holy mountains such as Shandong's Tai Shan; where to experience the culture of China's many ethnic groups, including Tibetans, Miao, Dai and Mongolians; how to explore remoter rural areas; and where to experience local food, from streetside snack stalls to plush Beijing Duck restaurants.

Fodor's China Margaret Kelly,2009 Discusses the history and culture of China, offers practical travel advice, and recommends accommodations, restaurants, transportation, and attractions.

Hotspots Along China's Maritime Periphery U.s.-china Economic and Security Review Commission,U S -China Economic and Security Review,2017-10-16 The Chinese Communist Party believes there are several threats that exist along China's maritime periphery. These threat perceptions have a defined geographic focus and are informed by fears about Taiwan independence, challenges to China's claims in the South China Sea, and Japan's administrative control of the Senkaku Islands in the East China Sea. They result in a set of potential regional hotspots for which the People's Liberation Army is actively preparing for contingency operations. These operations, if executed, could lead to armed conflicts between China and U.S. allies, friends and partners in the Asia Pacific and could trigger a U.S. military response. Authoritative documents such as China's 2015 defense white paper identify several missions tasked to the PLA that directly apply to hotspot contingencies, such as safeguarding security and sovereignty along China's land and maritime borders, which would include claims to features in the East and South China Seas and unification of the motherland, code for preventing Taiwan's independence. To prepare for a potential crisis along China's maritime periphery, senior Chinese leaders have directed the PLA to develop contingency plans and expand its military capabilities. However, one of the most pressing concerns faced by PLA planners is the consideration that the U.S. will intervene in a conflict. This consideration has led the PLA to pursue a robust military modernization program that includes developing long-range strike capabilities to engage an adversary farther from China's coast, improving training to conduct joint warfighting operations and preparing to fight in new security domains such as space and cyberspace.

Digital Public Administration and E-Government in Developing Nations: Policy and Practice Halpin, Edward Francis,2013-03-31 In recent years, it has become apparent that there are very distinct gaps between developed and developing regions in the world, especially in regards to e-government systems, infrastructures, and processes. Digital Public Administration and E-Government in Developing Nations: Policy and Practice examines e-government from the perspective of developing nations and addresses issues and concerns of developing systems and processes. This publication is a valuable and insightful tool for researchers, practitioners, policymakers, and students in different fields who are interested in information systems, public policies, politics, and media and communication studies.

Loose-leaf Version for Essential Earth Thomas H. Jordan,John Grotzinger,2012-01-23 The Essential Earth is a whole new way to open students' eyes to the physical world around them, to learn how scientists explore it, and what we need to do to both protect ourselves from it (hazards) as well as protect it from us (global change). In just 14 chapters, it offers a well-focused introduction to the basics of geology that emphasize the process of science and how humans interact with our home, Spaceship Earth.

Beautified China Kris Provoost,2019-10-07 Beautified China shows the country's modern architecture in new light - CNN Style Photo-Series Provides an abstracted look at China's iconic architecture, - ArchDaily.com. This book of stunning photographs by architect and photographer Kris Provoost captures the wave of the architectural revolution in China. Internationally renowned architects such as Zaha Hadid, Rem Koolhaas, Ole Scheeren, Herzog & de Meuron, Daniel Liebeskind and many others have been engaged in creative, futuristic, and flamboyant projects in China in recent years. The sky is literally the limit, both in terms of construction, use of materials and design. Unimaginable forms, which defy all rules of gravity, come to life in immense skyscrapers. Beautified China offers an overview of these revolutionary designs, capturing their surreal impact in photographs that explore the free play of form that characterises each building. The book features essays by Rem Koolhaas, Ma Yansong & Ole Scheeren, among others, and each photograph is accompanied by information pertinent to the project, including function, environment, and context. AUTHOR: Kris Provoost is a Belgian architect and photographer. After receiving his Master's in Architecture, he moved to China, where he further expanded his career. He worked for, among others, Zaha Hadid Architects & Buro Ole Scheeren. He also focuses on architectural photography. His work has previously appeared in CNN Style, Dezeen, ArchDaily, Designboom, gooood, That's Mag Beijing, Time Out Shanghai, Abduzeedo, Fubiz, and T-Magazine. SELLING POINTS: * A photo essay by Belgian architect and photographer Kris Provoost capturing the boldest and most iconic structures of the architectural revolution in China * Striking images of fantastical buildings from unexpected angles and perspectives 180 colour, 40 b/w images

50 Years World Heritage Convention: Shared Responsibility - Conflict & Reconciliation Marie-Theres Albert,Roland Bernecker,Claire Cave,Anca Claudia Prodan,Matthias Ripp,2022-10-10 This open access book identifies various forms of heritage destruction and analyses their causes. It proposes strategies for avoiding and solving conflicts, based on integrating heritage into the 2030 Agenda for Sustainable Development. It reflects on the identity-building role of heritage, on multidimensional conflicts and the destruction of heritage, and considers conflict-solving strategies and future perspectives. Furthermore, it engages theoretically and practically with the concepts of responsibility, reconciliation and sustainability, relating mainly to four Sustainable Development Goals, i.e. SDGs 4 (education), 11 (e.g. World Heritage), 13 (climate action) and 17 (partnerships for the goals). More than 160 countries have inscribed properties on the UNESCO World Heritage list since the World Heritage Convention came into force. Improvements in the implementation of the Convention, such as the Global Strategy for a Representative, Balanced and Credible World Heritage List, have occurred, but other conflicts have not been solved. The book advocates for a balanced distribution of properties and more effective strategies to represent the global diversity of cultural and natural heritage. Furthermore it highlights the importance of heritage in identity building.

A New Direction for China's Defense Industry Evan S. Medeiros,Roger Cliff,Keith Crane,James C. Mulvenon,2005-12-19 Since the early 1980s, a prominent and consistent conclusion drawn from research on China's defense-industrial complex has been that China's defense-production capabilities are rife with weaknesses and limitations. This study argues for an alternative approach: From the vantage point of 2005, it is time to shift the focus of current research to the gradual improvements in and the future potential of China's defense-industrial complex. The study found that China's defense sectors are designing and producing a wide range of

increasingly advanced weapons that, in the short term, are relevant to a possible conflict over Taiwan but also to China's long-term military presence in Asia. Part of a larger RAND Project AIR FORCE study on Chinese military modernization, this study examines the current and future capabilities of China's defense industry. The goals of this study are to 1.

China's Business Reforms Russell Smyth, On Kit Tam, Malcolm Warner, Cherrie Jiu Hua Zhu, 2004-11-10 This book examines the key areas, all of which are linked, where China is grappling with institutional reforms as it opens up to the outside world.

Artificial Intelligence, China, Russia, and the Global Order Air University Air University Press, Nicholas D. Wright, 2019-10-19 Given the wide-ranging implications for global competition, domestic political systems and daily life, US policymakers must prepare for the impacts of new artificial intelligence (AI)-related technologies. Anticipating AI's impacts on the global order requires US policy makers' awareness of certain key aspects of the AI-related technologies--and how those technologies will interact with the rapidly changing global system of human societies. One area that has received little in-depth examination to date is how AI-related technologies could affect countries' domestic political systems--whether authoritarian, liberal democratic, or a hybrid of the two--and how they might impact global competition between different regimes. This work highlights several key areas where AI-related technologies have clear implications for globally integrated strategic planning and requirements.

The Birth of Now Jamie Cawley, 2018-08-22 In 1870, more than 4,000 years after it was built, the Great Pyramid at Giza in Egypt was still the world's tallest man-made structure. By 2010, only 140 years later, there were more than 10,000 buildings taller than the Great Pyramid. This book is about what caused this change and what will change next.

Crust and Lithosphere Dynamics Anthony B Watts, 2010-05-13 Treatise on Geophysics: Crust and Lithosphere Dynamics, Volume 6, provides a comprehensive review of the state of knowledge on crust and lithosphere dynamics, which is defined as the study of how the outermost layers of the Earth respond to loads that are emplaced on, within, and below it and its implications for plate mechanics and mantle flow. The book begins with a chapter on plate kinematics, which shows how new observations and methodologies have improved the resolution of relative and absolute plate motions. This is followed by studies of plate mechanics, focusing on the long-term rheology of the plates and response of the plates to both relatively short-term and long-term loads. The book also includes chapters that examine the evidence from surface heat flow, borehole breakouts, and magma models for the thermal and mechanical structure of the lithosphere; the deformation of the lithosphere in extensional and compressional settings. The final two chapters deal with the structural styles of faulting in the shallow brittle part of the lithosphere, the brittle-ductile transition, and the shear zone in the ductile part of the lithosphere; and how developments in plate mechanics have impacted our understanding of geological processes. Self-contained volume starts with an overview of the subject then explores each topic with in depth detail Extensive reference lists and cross references with other volumes to facilitate further research Full-color figures and tables support the text and aid in understanding Content suited for both the expert and non-expert

Rampant Diana Peterfreund, 2009-08-25 Forget everything you ever knew about unicorns. The fluffy, sparkly, friendly “horses” so popular the world over don’t exist. Real unicorns are killers. Beasts the size of elephants, with cloven hooves that shake the earth, hides impervious to bullets, and horns that contain a deadly poison, unicorns can outrun a sports car and smell a human from a mile away. And they can only be killed by virgin warriors descended from Alexander the Great. Sixteen-year-old Astrid Llewelyn has grown up with her mom Lilith’s tall tales about unicorns and their exalted family heritage, but figures her mom’s crazy. But the scary stories her mom told her about the monsters in her formative years left her with a firm phobia about unicorns, even the cutesy kind popular with young girls. But when one of the monsters attacks her boyfriend in the woods—thereby ruining any chance of him taking her to prom—Astrid finds herself headed to Rome to train as a unicorn hunter. “As swift and sure-footed as a killer unicorn, Rampant weaves a vibrant new mythology from venerable threads.”—Scott Westerfeld, bestselling author of the Ugliest series

China's Algorithms of Repression Maya Wang, 2019 This report presents new evidence about the surveillance state in Xinjiang, where the government has subjected 13 million Turkic Muslims to heightened repression as part of its 'Strike Hard Campaign against Violent Terrorism.' Between January 2018 and February 2019, Human Rights Watch was able to reverse engineer the mobile app that officials use to connect to the Integrated Joint Operations Platform (IJOP), the Xinjiang policing program that aggregates data about people and flags those deemed potentially threatening. By examining the design of the app, which at the time was publicly available, Human Rights Watch found that Xinjiang authorities are collecting a wide array of information from ordinary people.--Publisher website.
