GRIFFIN: Red and the Big Bad Reaper Theodora Taylor,2022-02-24 RED: Five years ago, I was as boring as boring could be. Seriously, my name was Bernice. But then came that one month when I pretended to be somebody else entirely while working at a roadhouse biker bar.... Big Mistake. Huge. Who knew one month pretending to be an interesting bad girl could ruin a boring good girl's life? GRIFFIN: When I saw her, I knew she'd be mine. My old biker crew told me she was untouchable—that I'd never be able to land her without my fame and last name. So I did what any rock star with a big....ahem, ego would under the circumstances—wagered five figures on me seducing the untouchable girl behind the bar. RED: When the insanely hot biker, who wouldn't have looked at Boring Bernice twice, asks me to come back to his place, I decide, "why not?" It was just supposed to be a silly fling.... GRIFFIN: It was just supposed to be a stupid bet. But what started out as fake got plenty real—especially after I lost her. Five years. I spend five years searching for her. And when I find her.... RED: Five years. I managed to hide from him for five years. He's powerful and dangerous, and I'm not sure what he'll do if he discovers the secret I've been keeping from him for four years and nine months. So when he finds me.... What's this story called again? Escaping the Ruthless Biker? GRIFFIN: No, that's not the title. The story is called Red....Red and the Big Bad Reaper. And you're about to find out why.

Building Capacity for Health Informatics in the Future F. Lau,J.A. Bartle-Clar,G.

Bliss,2017-03 Health information technologies are revolutionizing and streamlining healthcare, and uptake continues to rise dramatically. If these technologies are to be effectively implemented, capacity must be built at a regional, national and global level, and the support and involvement of both government and industry will be vital. This book presents the proceedings of the 2017 Information Technology and Communications in Health conference (ITCH 2017), held in Victoria, BC, Canada, in February 2017. The conference considers, from a variety of perspectives, what is required to move the technology forward to real, sustained and widespread use, and the solutions examined range from improvements in usability and training to the need for new and improved design of information systems, user interfaces and interoperable solutions. Government policies, mandates, initiatives and the need for regulation are also explored, as is the requirement for improved interaction between industrial, governmental and academic partners. With its focus on building the next generation of health informatics and the capacity required to deliver better healthcare worldwide, this book will be of interest to all those involved in the provision of healthcare.
